

Contents

Preface	v
Contributors	ix
1 Molecular and Cellular Hurdles to Xenotransplantation <i>Jeffrey L. Platt</i>	1
2 Pathological Responses to Xenotransplantation <i>Matilde Bustos and Jeffrey L. Platt</i>	45
3 Natural Xenoreactive Antibodies <i>Uri Galili</i>	57
4 Specificity of Xenoreactive Natural Antibodies <i>William Parker, Paul B. Yu, and Yuko C. Nakamura</i>	73
5 Biophysical Properties of Xenoreactive Natural Antibodies <i>William Parker, Ryan C. Fields, and Yuko C. Nakamura</i>	87
6 The Origin of Xenoreactive Natural Antibodies <i>Paul B. Yu</i>	103
7 Synthesis of Carbohydrate Antigens Recognized by Xenoreactive Antibodies <i>Mauro S. Sandrin and Ian F. C. McKenzie</i>	119
8 The Complement Barrier to Xenotransplantation <i>Agustin P. Dalmaso</i>	139
9 Defects and Amplification of Costimulation Across the Species <i>Nicola Rogers and Robert Lechler</i>	173

10	Antibody-Dependent Effects on Cellular Immunity	
	<i>Antonello Pileggi, R. Damaris Molano, Thierry Berney,</i>	
	<i>and Luca Inverardi</i>	199
11	Disordered Regulation of Coagulation	
	and Platelet Activation in Xenotransplantation	
	<i>Simon C. Robson</i>	215
12	Current Applications of Cellular Xenografts	
	<i>Albert S. B. Edge</i>	247
Index		265
