

Chemistry of Marine Water and Sediments

Bearbeitet von
Antonio Gianguzza, Ezio Pelizzetti, Silvio Sammartano

1. Auflage 2002. Buch. xviii, 508 S. Hardcover

ISBN 978 3 540 42055 2

Format (B x L): 15,5 x 23,5 cm

Gewicht: 2030 g

Weitere Fachgebiete > Geologie, Geographie, Klima, Umwelt > Geologie und
Nachbarwissenschaften > Geochemie

schnell und portofrei erhältlich bei

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beack-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

Part I Biogeochemical Processes at the Air-Water and Water-Sediment Interface	1
1 Sea Water as an Electrolyte	3
1.1 Introduction	3
1.1.1 Composition of Average Sea Water	3
1.1.2 The Concept of Salinity	6
1.1.3 Causes of Major Components Not Being Conservative	8
1.1.4 Physical Properties of Natural Waters	12
1.2 Modelling the Physical Properties of Natural Waters	18
1.3 Estimating the Properties of Mixed Electrolytes	23
1.4 Estimating Transport Properties	29
Acknowledgements	32
References	32
2 The Chemical and Physical Properties of Marine Aerosols: An Introduction	35
2.1 Introduction	35
2.1.1 Physical Characteristics of Aerosols	37
2.1.2 The Role of Clouds in the Aerosol Cycle	39
2.1.3 The Global Distribution of Aerosols Over the Oceans	41
2.1.4 Aerosol Composition	45
2.1.5 Temporal Variability of Marine Aerosols	47
2.2 Sea Salt Aerosols	49
2.2.1 Sea Salt Production and Size Distribution	49
2.2.2 The Contribution of Sea Salt to Submicrometre Aerosol	50
2.2.3 Sea Salt Aerosol and New Particle Production	51
2.3 The Oceanic Atmospheric Sulphur Cycle	51
2.3.1 Global Sulphur Budgets	52
2.3.2 SO_2 and nss-SO_4^{2-}	52
2.3.3 DMS and the Atmospheric Sulphur Cycle	54
2.3.4 MSA and nss-SO_4^{2-}	55
2.3.5 New-Particle Production from DMS over the Ocean	55
2.3.6 Impact on Climat	58
2.4 The Oceanic Atmospheric Cycle of Nitrates and Ammonium	58
2.4.1 Global Budgets of NO_y and NH_x	59

2.4.2	Concentrations of Nitrate and Ammonium in the Marine Atmosphere	61
2.4.3	Nitrate and Ammonium Aerosol Propertie	61
2.4.4	Organic Nitrogen Aerosol	62
2.4.5	Trends in Nitrate and Ammonium in Pollution Aerosol	62
2.4.6	Atmospheric Deposition and the Nitrogen-Nutrient Budget in the Ocean	63
2.5	Mineral Dust in the Marine Atmosphere	64
2.5.1	Global Distribution of Dust	64
2.5.2	Sources of Dust	65
2.5.3	Elemental Composition	67
2.5.4	Mineralogical Composition	70
2.5.5	Deposition of Dust to the Oceans	70
2.5.6	Impact of Dust on Marine Biogeochemistry Cycles	72
2.5.7	The Impact of African Deposition on the Nutrient Cycle	72
2.6	Other Aerosol Species and the Impact of Continental Source	74
2.7	Conclusions	76
	References	77
3	Photochemical Processes in the Euphotic Zone of Sea Water: Progress and Problems	83
3.1	Introduction	83
3.2	General Framework	84
3.2.1	Solar Flux	84
3.2.2	Light Attenuation	84
3.2.3	Factors Influencing Photoreactions	86
3.3	Main Photoprocesses Occurring in Water and Air	87
3.3.1	Direct Photolysis	87
3.3.2	Indirect Photoreactions	88
3.4	Role of Iron and Chlorine	95
3.4.1	Inorganic Cl Formation in the Marine Environment	95
3.4.2	Role of Iron in Surface Waters	96
3.4.3	Interactions Between Iron and Chloride	99
