

Chance Discovery

Bearbeitet von
Yukio Ohsawa, Peter McBurney

1. Auflage 2003. Buch. xxi, 402 S. Hardcover

ISBN 978 3 540 00549 0

Format (B x L): 15,5 x 23,5 cm

Gewicht: 799 g

Weitere Fachgebiete > Geologie, Geographie, Klima, Umwelt > Geologie und
Nachbarwissenschaften > Geoinformatik

schnell und portofrei erhältlich bei

The logo for beck-shop.de features the text 'beck-shop.de' in a bold, red, sans-serif font. Above the 'i' in 'shop' are three red dots of increasing size. Below the main text, the words 'DIE FACHBUCHHANDLUNG' are written in a smaller, red, all-caps, sans-serif font.

beck-shop.de
DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Table of Contents

Part I

Chance Discovery in the Complex Real World	1
1. Modeling the Process of Chance Discovery	
Yukio Ohsawa	2
1.1 Which Do You Want, a Rule or an Opportunity?	2
1.2 Is Chance Discovery Itself an Event or a Process?	3
1.3 From Knowledge Discovery to Chance Discovery	4
1.3.1 The Human as a Main Component of Chance Discovery ...	5
1.3.2 Communications, Key 1 for Chance Discovery	7
1.3.3 Scenic Information for Imagination, Key 2 for Chance Dis-	
covery	9
1.3.4 Data Modeling and Mining, Key 3 for Chance Discovery ...	9
1.3.5 Criteria for Evaluating a Discovered Chance	10
1.4 Double-Helical Model of Chance Discovery Process	11
1.5 Subsumption Architecture for Robust Helices	13
1.6 A Tentative Conclusion	14
References	15
2. Decisions by Chance and on Chance: Meanings of Chance in Recent	
News Stories	
Fumiko Yoshikawa	16
2.1 Introduction	16
2.2 The Etymology of <i>Chance</i>	17
2.2.1 Meanings of <i>Chance</i> in ME and Its Synonyms in OE	17
2.2.2 Definitions of <i>Chance</i> in the <i>OED2</i>	18
2.3 Meanings of <i>Chance</i> in Recent News Stories	21
2.3.1 The Classificatory Criterion	21
2.3.2 <i>Chance</i> Meaning ‘Opportunity’	22
2.3.3 <i>Chance</i> Meaning ‘Probability’	23
2.3.4 <i>Chance</i> Meaning ‘Fortune’	23
2.3.5 <i>Chance</i> Involving a Certain Degree of Risk	27
2.4 Discussion and Conclusion	27

References	29
3. Prediction, Forecasting, and Chance Discovery	
Yutaka Matsuo	30
3.1 Introduction	30
3.2 Existing Method of Prediction and Forecasting	31
3.2.1 Time-Series Prediction	31
3.2.2 ARMA Model	32
3.2.3 Pattern Recognition	33
3.2.4 Information Between the Past and the Future	34
3.2.5 Data-Mining Methods	34
3.3 Difference between Prediction/Forecasting and Chance Discovery ..	36
3.3.1 Emphasis on Model/Variable Creation and Discovery	36
3.3.2 Emphasis on Rare Events	37
3.3.3 Emphasis on Human and Computer Interaction	37
3.3.4 Relevance of Prediction/Forecasting and Chance Discovery ..	38
3.4 Importance of Structural Information for Rare Events	38
3.4.1 Small Worlds	38
3.4.2 Structural Importance	40
3.5 Conclusion	41
References	42
4. Self-organizing Complex Systems	
Henrik Jeldtoft Jensen	44
4.1 Introduction	44
4.2 What Is a Self-Organizing Complex System?	45
4.2.1 What Is a Critical System?	45
4.2.2 Scale-Free Systems	46
4.2.3 Self-organizing Critical Systems	48
4.3 Details of Two Models	49
4.3.1 The Bak–Tang–Wiesenfeld Sandpile Model	49
4.3.2 The Tangled Nature Model	51
4.4 What Does a Chance Look Like When There Is No Scale?	56
4.5 Predictability in Complex Systems	58
4.6 Chance Discovery as an Understanding of the Common Good	59
4.7 Some Concluding Remarks	60
References	61
5. Anatomy of Rare Events in a Complex Adaptive System	
Paul Jefferies, David Lamper, and Neil F. Johnson	62
5.1 Can We Deal with Large Changes	62
5.2 A Complex Adaptive System of Competing Agents	63
5.3 Large Changes as Crashes in a Bruijn Graph	64

5.4	Conclusions	69
	References	69
Part II		
	Key 1 – Communications for Chance Discovery	71
6. Human-to-Human Communication for Chance Discovery in Business		
	Hiroko Shoji	72
6.1	Face-to-Face Communication for Chance Discovery in Retail Business	72
6.1.1	Importance of Sales Communication in a Society with Oversupply of Merchandise	72
6.1.2	Purchasing Types and Communication Patterns	74
6.1.3	Creative Communication for Chance Discovery	75
6.2	Email-Based Communication for Chance Discovery in an R&D Project	77
6.2.1	Importance of Communication in Multi-participant Projects	77
6.2.2	Communication Support for Chance Discovery with Mailing List	78
6.2.3	Applications to Actual Design and Development Projects ...	79
6.3	Conclusion	82
	References	83
7. Topic Diffusion in a Community		
	Naohiro Matsumura	84
7.1	Introduction	84
7.2	Background	85
7.3	Topic Diffusion in a Community	85
7.3.1	My Idea of Diffusing Influence	85
7.3.2	Measuring the Influence of Comments	87
7.3.3	Measuring the Influence of Participants	88
7.3.4	Measuring the Influence of Terms	88
7.4	Influence Diffusion Model (IDM)	88
7.4.1	IDM for Comments	89
7.4.2	IDM for Participants	89
7.4.3	IDM for Terms	89
7.5	Case Study	90
7.5.1	Discovery of Influential Comments	90
7.5.2	Discovery of Opinion Leaders	92
7.5.3	Discovery of Interesting Terms	94
7.6	Experimental Evaluations	94
7.7	Conclusion	96
	References	96

8. Dimensional Representations of Knowledge in an Online Community

Robert McArthur and Peter Bruza	98
8.1 Introduction	98
8.2 The Semantic Context Within Utterances	101
8.3 Representation of Utterance	103
8.3.1 Vector Creation	104
8.4 Closing Remarks	112
References	112

9. Discovery of Tacit Knowledge and Topical Ebbs and Flows Within the Utterances of an Online Community

Robert McArthur and Peter Bruza	115
9.1 Introduction	115
9.1.1 Minkowski Function	115
9.1.2 LSA	116
9.1.3 Information Flow	116
9.2 Illustration I: Discovering Tacit Knowledge	117
9.2.1 Data Set	117
9.2.2 Representation of Data	118
9.2.3 Methods Applied	119
9.2.4 General Remarks	120
9.3 Illustration II: The Ebb and Flow of ‘Meanings’	122
9.3.1 Data Set	124
9.3.2 Method	125
9.3.3 Representation	126
9.3.4 Discussion	126
9.4 Conclusions and Further Research	129
References	131

10. Agent Communications for Chance Discovery

Peter McBurney and Simon Parsons	133
10.1 Introduction	133
10.2 CDM Requirements	134
10.3 Generic Agent Communications Languages	137
10.3.1 FIPA ACL	137
10.3.2 Assessment of FIPA ACL	140
10.4 Dialogue Game Protocols	142
10.4.1 Formal Dialogue Games	143
10.4.2 Assessment of Dialogue Games	145
10.5 Conclusions	146
References	146

11. Logics of Argumentation for Chance Discovery	
Simon Parsons and Peter McBurney	150
11.1 Introduction	150
11.2 Philosophical Background	152
11.3 Argumentation and Dialogue	153
11.3.1 Languages and Argumentation	153
11.3.2 Inter-agent Argumentation	154
11.3.3 Argumentation at All Levels	155
11.3.4 Dialogue Games	156
11.4 A System for Argumentation-Based Communication	157
11.4.1 A System for Internal Argumentation	157
11.4.2 Arguments Between Agents	159
11.4.3 Rationality and Protocol	161
11.5 Argument Aggregation	164
11.6 Summary	164
References	165
Part III	
Key 2 – Perceptions for Context Shifting	169
12. Awareness and Imagination of Hidden Factors and Rare Events	
Yasufumi Takama	170
12.1 Introduction	170
12.2 Interaction with Environment for Chance Discovery	171
12.3 Web as Information Environment for Chance Discovery	172
12.4 Visualizing Topic Distribution on Web	173
12.5 Plastic Clustering Method Based on Immune Network Model	174
12.5.1 Plastic Clustering Method	174
12.5.2 Introduction of Memory Cell for Context Preservation	176
12.6 Experimental Results	177
12.6.1 Topic Stream Extraction from Short Sequence	178
12.6.2 Topic Stream Extraction from Long Sequence	179
12.7 Conclusion	181
References	182
13. Effects of Scenic Information	
Yasufumi Takama and Yukio Ohsawa	184
13.1 Introduction: Scenic Information for Chance Discovery	184
13.2 Situation in Answering Questionnaires	184
13.3 Making Diagram for Idea Generation	185
13.4 Scenic Information on the Web	186
13.5 Problem of Losing Scenic Information	186
13.6 Media Technologies for Scenic Information	187

13.6.1	Integration of Real and Information Environments.....	187
13.6.2	Simulation and Visualization	187
	References	188
14.	The Storification of Chances	
	Helmut Prendinger and Mitsuru Ishizuka	189
14.1	Introduction	189
14.2	Motivating Example	191
14.3	Observation vs. Immersion	193
14.3.1	Inhabited Market Place	193
14.3.2	Mission Rehearsal Exercise.....	194
14.4	Life-Like Characters	195
14.5	Approaches to Interactive Story Systems	197
14.5.1	Story-Morphing	197
14.5.2	Plot Control in Interactive Stories.....	198
14.5.3	Interactive Drama with User-Controlled Character	198
14.5.4	Interactive Drama with Human Player	199
14.5.5	Story Telling with Anytime User Intervention	200
14.5.6	Story Nets	201
14.5.7	Digital Director for Interactive Story Telling	201
14.6	Interactive Story Telling as a Business Training Environment	202
14.7	Summary and Conclusion	205
	References	206
15.	The Prepared Mind: the Role of Representational Change in Chance Discovery	
	Eric Dietrich, Arthur B. Markman, C. Hunt Stilwell, and Michael Winkley	208
15.1	Introduction	208
15.2	Analogical Reminding and Structure Mapping Theory: Background	209
15.3	Why Representational Change Is Needed to Understand Chance Discovery	211
15.4	Packing: an Overview	216
15.5	STRANG: a Computational Model of Packing During Analogy Making	217
15.5.1	Background on the Operation of STRANG.....	217
15.5.2	Packing Irrelevant Attribute Information	220
15.5.3	Packing and Predicate Change	224
15.6	Chance Discoveries and the Prepared Mind	227
15.7	Conclusion	229
	References	229

16. Abduction and Analogy in Chance Discovery	
Akinori Abe	231
16.1 Introduction	231
16.2 Definition of ‘Chance’	232
16.3 Abduction and Analogy as Discovery	233
16.3.1 Reversed Deduction as Discovery	233
16.3.2 Analogy as Discovery	234
16.4 Computational Abduction	237
16.4.1 Hypothetical Reasoning (Theorist)	237
16.4.2 Clause Management System (CMS)	240
16.5 Abductive Analogical Reasoning (AAR)	241
16.6 Abductive Analogical Reasoning as Chance Discovery	244
16.6.1 Type 1: When Some of the Hypotheses Are Unknown	244
16.6.2 Type 2: When Some of the Rules Are Unknown	245
16.7 The Role of Abduction and Analogy in Chance Discovery	246
16.8 Conclusions	247
References	247
Part IV	
Key 3 – Computer-Aided Chance Discoveries	249
17. Active Mining with Visual Human Interface	
Wataru Sunayama	250
17.1 Introduction	250
17.2 Features of Two-Dimensional Interfaces	251
17.2.1 Order by Directions	252
17.2.2 Order by Arrangements	252
17.2.3 Potential Relationships Among Objects	252
17.2.4 Cleared Relationships Among Objects	252
17.3 Information for Selection	253
17.3.1 Necessity of Information	253
17.3.2 Adaption of Information	253
17.3.3 Effectiveness of Information	254
17.3.4 Originality of Information	254
17.3.5 Quality of Information	254
17.3.6 Selection Criteria for Chance Discovery	254
17.4 Information-Visualization Systems for Chance Discovery	256
17.4.1 Interface 1: Display of Web Structures	256
17.4.2 Interface 2: Two-Dimensional Interface for Supplying Keywords	256
17.4.3 Interface 3: Indication of Relational Topics and Examples	258
17.4.4 Interface 4: Time Series of the Hit Numbers	260
17.5 Conclusions	261
References	261

18. <i>KeyGraph</i>: Visualized Structure Among Event Clusters	
Yukio Ohsawa	262
18.1 <i>KeyGraph</i> for Abstracting Causalities in a Sequence	262
18.2 The Extensible Semantics of <i>KeyGraph</i>	263
18.3 <i>KeyGraph</i> Applied to a Document	265
18.4 <i>KeyGraph</i> Applied to POS Data	267
18.5 Application to Web Links for Discovering Emerging Topics	271
18.6 Conclusions	275
References	275
19. Discovering Deep Building Blocks for Competent Genetic Algorithms	
Using Chance Discovery via <i>KeyGraphs</i>	
David E. Goldberg, Kumara Sastry, and Yukio Ohsawa	276
19.1 Introduction	276
19.2 GAs: Innovation, Competence, and Deep Building Blocks	277
19.2.1 The One-Minute Genetic Algorithmist	277
19.2.2 An Innovation Intuition for GAs	279
19.2.3 Competent Genetic Algorithms	280
19.2.4 The Problem of Deep Building Blocks	282
19.3 The <i>KeyGraph</i> Procedure: Overview and Intuition	283
19.3.1 An Innovation Intuition for the <i>KeyGraph</i> Procedure	283
19.3.2 The <i>KeyGraph</i> Procedure: an Overview	284
19.4 Can <i>KeyGraphs</i> Discover Deep Building Blocks?	285
19.4.1 Design of Pilot Experiments	286
19.4.2 Competent GAs Fail to Identify Deep Building Blocks	289
19.4.3 <i>KeyGraph</i> and Identification of Low-Order Building Blocks	291
19.4.4 <i>KeyGraph</i> and Identification of Deep Building Blocks: a Naïve Approach	292
19.4.5 Two Approaches for Identifying Deep Building Blocks	294
19.5 Future Work	296
19.6 Conclusions	297
References	299
Part V	
Keys Combined to Applications	303
20. Enhancing Daily Conversations	
Yasuyuki Sumi and Kenji Mase	304
20.1 Introduction	304
20.2 AIDE: Augmented Informative Discussion Environment	305
20.2.1 System Overview of AIDE	305
20.2.2 Mutual Understanding in Conversation	308

20.2.3 Experiments and Evaluation	309
20.3 AgentSalon.....	313
20.3.1 System Overview of AgentSalon	315
20.3.2 Generation of Conversation by Agents	317
20.3.3 Implementation and Example	318
20.4 Conclusion	323
References	323
21. Chance Discoveries from the WWW	
Naohiro Matsumura and Yukio Ohsawa	325
21.1 Introduction	325
21.2 Human Society on the WWW Structure	326
21.3 Direct Relation and Co-citation	327
21.4 Discovering Emerging Topics from the WWW	332
21.5 Experimental Examples and Discussion	333
21.6 Conclusions	337
References	337
22. Detection of Earthquake Risks with <i>KeyGraph</i>	
Yukio Ohsawa	339
22.1 The Human Society as a Complex System	339
22.2 <i>KeyGraph</i> Applied to Finding Risky Active Faults	340
22.3 The Seismological Semantics of <i>KeyGraph</i>	341
22.3.1 The Seismological Semantics of (KG1)	341
22.3.2 The Seismological Semantics of (KG2)	342
22.4 Experimental Support of the Semantics of <i>KeyGraph</i>	344
22.4.1 Risky Faults and Fundamental Faults	344
22.4.2 Results of Japanese Risky Faults	344
22.5 Conclusion	349
References	349
23. Application to Questionnaire Analysis	
Yumiko Nara and Yukio Ohsawa	351
23.1 The Human Society as a Complex System	351
23.2 A Chance Discovery for Understanding Chance Discovery as an Application of the Double Helix	352
23.3 A Double-Helix Process to See the Behaviors of People on the Web	352
23.4 The Final Revision of the Process Model	360
23.5 Discussion	361
23.6 Conclusion	364
References	365

24. Chance Discovery for Consumers

Makoto Mizuno	367
24.1 Introduction	367
24.2 Background	368
24.2.1 Empowerment of Consumers	368
24.2.2 Education of Consumers	368
24.2.3 Likelihood vs. Chance Discovery	369
24.3 Proposed Approach	370
24.3.1 Basic Logic of <i>KeyGraph</i>	370
24.3.2 Application of <i>KeyGraph</i> to Expert Knowledge	371
24.3.3 Clustering Wines and Foods	373
24.3.4 Visualizing Clusters	373
24.4 User Evaluation	376
24.4.1 Constructing a Benchmark	377
24.4.2 Experiment Design	378
24.4.3 Results of the Experiment	378
24.5 Discussion	379
References	381

25. Application to Understanding Consumers' Latent Desires

Hisashi Fukuda	383
25.1 Latent Desires as Fountains of Chances	383
25.2 A Method of Chance Discovery: Communications with Data-Based Stimulation	385
25.3 Application to Discovering Rare but Significant Consumption of Food on Weekdays or Sunday	387
25.4 Application to Discovering Rare but Significant Consumption of Food under Various Weather Conditions	390
25.5 Conclusion	395
References	395
