<i>PREFACE</i>	<i>page</i> xiii
1 BASICS	1
1.1 RINGS	1
1.1.1 The definition	2
1.1.2 Nonunital rings	3
1.1.3 Subrings	4
1.1.4 Ideals	4
1.1.5 Generators	5
1.1.6 Homomorphisms	5
1.1.8 Residue rings	7
1.1.10 The characteristic	8
1.1.11 Units	8
1.1.12 Constructing the field of fractions	9
1.1.13 Noncommutative polynomials	10
Exercises	11
1.2 MODULES	14
1.2.1 The definition	15
1.2.2 Some first examples	16
1.2.3 Bimodules	17
1.2.4 Homomorphisms of modules	17
1.2.5 The composition of homomorphisms	18
1.2.6 The opposite of a ring	19
1.2.7 Balanced bimodules	20
1.2.8 Submodules and generators	21
1.2.9 Kernel and image	22
1.2.10 Quotient modules	22
1.2.12 Images and inverse images	23
1.2.14 Change of rings	24
	vii

viii	<i>Contents</i>
1.2.16 Irreducible modules	24
1.2.18 Maximal elements in ordered sets	25
1.2.23 Torsion-free modules and spaces over the field of fractions	27
Exercises	28
2 DIRECT SUMS AND SHORT EXACT SEQUENCES	36
2.1 DIRECT SUMS AND FREE MODULES	37
2.1.1 Internal direct sums	37
2.1.2 Examples: vector spaces	38
2.1.3 Examples: abelian groups	39
2.1.4 The uniqueness of summands	40
2.1.5 External direct sums	40
2.1.6 Standard inclusions and projections	41
2.1.8 Notation	42
2.1.9 Idempotents	42
2.1.11 Infinite direct sums	43
2.1.13 Remarks	44
2.1.14 Ordered index sets	45
2.1.15 The module L^A	46
2.1.16 The module $\text{Fr}_R(X)$	47
2.1.17 Left-handed notation	47
2.1.18 Free generating sets	48
2.1.19 Free modules	48
2.1.21 Extending maps	49
Exercises	51
2.2 MATRICES, BASES, HOMOMORPHISMS OF FREE MODULES	54
2.2.1 Bases	55
2.2.2 Standard bases	56
2.2.3 Coordinates	56
2.2.5 Matrices for homomorphisms	58
2.2.7 Change of basis	59
2.2.9 Matrices of endomorphisms	60
2.2.10 Normal forms of matrices	61
2.2.12 Scalar matrices and endomorphisms	62
2.2.13 Infinite bases	64
2.2.14 Free left modules	65
Exercises	66
2.3 INVARIANT BASIS NUMBER	69
2.3.1 Some non-IBN rings	70
2.3.3 Two non-square invertible matrices	70
2.3.4 The type	71

<i>Contents</i>	ix
Exercises	72
2.4 SHORT EXACT SEQUENCES	75
2.4.1 The definition	75
2.4.2 Four-term sequences	76
2.4.3 Short exact sequences	76
2.4.4 Direct sums and splittings	77
2.4.6 Dual numbers	79
2.4.7 The group Ext	80
2.4.8 Pull-backs and push-outs	80
2.4.10 Base change for short exact sequences	82
2.4.11 The direct sum of short exact sequences	83
Exercises	84
2.5 PROJECTIVE MODULES	89
2.5.1 The definition and basic properties	89
2.5.9 Idempotents and projective modules	93
2.5.12 A cautionary example	94
2.5.13 Injective modules	94
Exercises	95
2.6 DIRECT PRODUCTS OF RINGS	97
2.6.1 The definition	98
2.6.2 Central idempotents	99
2.6.4 Remarks	100
2.6.5 An illustration	101
2.6.6 Modules	101
2.6.7 Homomorphisms	102
2.6.10 Historical note	104
Exercises	105
3 NOETHERIAN RINGS AND POLYNOMIAL RINGS	108
3.1 NOETHERIAN RINGS	108
3.1.1 The Noetherian condition	109
3.1.5 The ascending chain condition and the maximum condition	110
3.1.11 Module-finite extensions	112
Exercises	114
3.2 SKEW POLYNOMIAL RINGS	115
3.2.1 The definition	116
3.2.2 Some endomorphisms	118
3.2.6 The division algorithm	120
3.2.7 Euclidean domains	120
3.2.11 Euclid's algorithm	122
3.2.12 An example	123

x		<i>Contents</i>
	3.2.13 Inner order and the centre	124
	3.2.15 Ideals	125
	3.2.19 Total division	126
	3.2.22 Unique factorization	127
	3.2.23 Further developments	128
	Exercises	129
3.3	MODULES OVER SKEW POLYNOMIAL RINGS	132
	3.3.1 Elementary operations	133
	3.3.3 Rank and invariant factors	134
	3.3.4 The structure of modules	135
	3.3.7 Rank and invariant factors for modules	137
	3.3.8 Non-cancellation	138
	3.3.12 Serre's Conjecture	140
	3.3.13 Background and developments	140
	Exercises	140
4	ARTINIAN RINGS AND MODULES	145
4.1	ARTINIAN MODULES	145
	4.1.1 The definition	146
	4.1.2 Examples	146
	4.1.3 Fundamental properties	147
	4.1.8 Composition series	148
	4.1.11 Multiplicity	151
	4.1.13 Reducibility	152
	4.1.15 Complete reducibility	154
	4.1.22 Fully invariant submodules	157
	4.1.24 The socle series	158
	Exercises	159
4.2	ARTINIAN SEMISIMPLE RINGS	161
	4.2.1 Definitions and the statement of the Wedderburn–Artin Theorem	162
	4.2.4 Division rings	163
	4.2.5 Matrix rings	163
	4.2.6 Products of matrix rings	164
	4.2.11 Finishing the proof of the Wedderburn–Artin Theorem	166
	4.2.16 Recapitulation of the argument	169
	Exercises	170
4.3	ARTINIAN RINGS	173
	4.3.1 The Jacobson radical	173
	4.3.2 Examples	174
	4.3.3 Basic properties	174

<i>Contents</i>	xi
4.3.11 Alternative descriptions of the Jacobson radical	176
4.3.19 Nilpotent ideals and a characterization of Artinian rings	179
4.3.22 Semilocal rings	180
4.3.24 Local rings	181
4.3.27 Further reading	182
Exercises	182
5 DEDEKIND DOMAINS	186
5.1 DEDEKIND DOMAINS AND INVERTIBLE IDEALS	187
5.1.1 Prime ideals	187
5.1.4 Coprime ideals	188
5.1.7 Fractional ideals	189
5.1.10 Dedekind domains – the definition	190
5.1.11 The class group	191
5.1.13 An exact sequence	192
5.1.15 Ideal theory in a Dedekind domain	193
5.1.25 Principal ideal domains	196
5.1.28 Primes versus irreducibles	197
Exercises	197
5.2 ALGEBRAIC INTEGERS	200
5.2.1 Integers	200
5.2.6 Quadratic fields	203
5.2.9 Separability and integral closure	205
Exercises	208
5.3 QUADRATIC FIELDS	210
5.3.1 Factorization in general	210
5.3.2 Factorization in the quadratic case	211
5.3.3 Explicit factorizations	213
5.3.4 A summary	214
5.3.5 The norm	215
5.3.9 The Euclidean property	216
5.3.10 The class group again	217
5.3.13 The class number	218
5.3.15 Computations of class groups	218
5.3.21 Function fields	221
Exercises	222
6 MODULES OVER DEDEKIND DOMAINS	224
6.1 PROJECTIVE MODULES OVER DEDEKIND DOMAINS	225
6.1.7 The standard form	228
6.1.11 The noncommutative case	229
Exercises	229

xii	<i>Contents</i>
6.2 VALUATION RINGS	230
6.2.1 Valuations	231
6.2.4 Localization	232
6.2.9 Uniformizing parameters	234
6.2.10 The localization as a Euclidean domain	234
6.2.13 Rank and invariant factors	235
Exercises	235
6.3 TORSION MODULES OVER DEDEKIND DOMAINS	237
6.3.1 Torsion modules	238
6.3.6 The rank	239
6.3.7 Primary modules	239
6.3.10 Elementary divisors	241
6.3.13 Primary decomposition	243
6.3.17 Elementary divisors again	244
6.3.18 Homomorphisms	245
6.3.21 Alternative decompositions	246
6.3.22 Homomorphisms again	247
Exercises	249
