

Incomplete Information: Structure, Inference, Complexity

Bearbeitet von
Stephane P. Demri, Ewa Orlowska

1. Auflage 2002. Buch. xviii, 408 S. Hardcover

ISBN 978 3 540 41904 4

Format (B x L): 15,5 x 23,5 cm

Gewicht: 1730 g

Weitere Fachgebiete > EDV, Informatik > Datenbanken, Informationssicherheit,
Geschäftssoftware > Datenkompression, Dokumentaustauschformate

schnell und portofrei erhältlich bei

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beack-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

1. Mathematical Prerequisites	1
1.1 Set-theoretical Notions	1
1.2 Relations	1
1.3 Strings	3
1.4 Trees and Orders	4
1.5 Algebras	5
1.6 Lattices	7
1.7 Boolean Algebras	10
1.8 Algebras of Relations	11
1.9 Notes	12

Part I. Structures with Incomplete Information

2. Structures of Information	15
2.1 Introduction and Outline of the Chapter	15
2.2 Information Systems	16
2.3 Property Systems	19
2.4 Formal Contexts	23
2.5 Decision Tables and Decision Rules	25
2.6 Hierarchical Information	26
2.7 Fuzzy Information Systems	28
2.8 Notes	35
3. Information Relations Derived from Information Systems	37
3.1 Introduction and Outline of the Chapter	37
3.2 Information Relations	38
3.3 Properties of Information Relations	40
3.4 Representation of Properties of Objects with Indiscernibility Relations	43
3.5 Application of Indiscernibility Relations to the Representation of Data Dependencies	45
3.6 Contraction of Attributes	50
3.7 Applications of Diversity Relations	53

3.8	Applications of Complementarity Relations	56
3.9	Relative Relations	56
3.10	Abstract Information Relations	60
	3.10.1 FS-frames with Indistinguishability Relations	61
	3.10.2 FW-frames with Indistinguishability Relations	62
	3.10.3 FS-frames with Distinguishability Relations	62
	3.10.4 FW-frames with Distinguishability Relations	63
3.11	Fuzzy Information Relations	65
3.12	Notes	67
4.	Information Operators Derived from Information Systems	71
4.1	Introduction and Outline of the Chapter	71
4.2	Approximation Operators	72
4.3	Regions of Certainty	75
4.4	Definability of Sets	76
4.5	Approximate Information Retrieval	78
4.6	Knowledge Operators	79
4.7	A Clone of Information Operators	81
4.8	Generalised Approximation Operators	82
4.9	Information Operators and Properties of Information Relations	83
4.10	Structures with Information Operators	86
4.11	Fuzzy Information Operators	87
4.12	Notes	89
Part II. Introduction to Information Logics		
5.	Towards Information Logics	93
5.1	Introduction and Outline of the Chapter	93
5.2	Classical Logic	94
	5.2.1 Classical Propositional Logic PC	94
	5.2.2 Classical First-order Logic	95
5.3	Modal Logics	96
	5.3.1 Modal Language	96
	5.3.2 Semantics of Modal Languages	98
	5.3.3 Modal Logic	102
5.4	Modal Logics with Relative Accessibility Relations	106
	5.4.1 Parameter Expressions	106
	5.4.2 Rare-logics	111
5.5	Fuzzy Modal Logics	113
5.6	Notes	115

6.	Techniques for Information Logics	117
6.1	Introduction and Outline of the Chapter	117
6.2	Model-theoretic Constructions	117
6.2.1	Disjoint Unions and Isomorphic Copies	118
6.2.2	Restriction	119
6.2.3	Filtration	119
6.2.4	Copying	121
6.3	Hilbert-style Proof Systems	122
6.3.1	General Formulation of Hilbert-style Proof Systems	123
6.3.2	A Hilbert-style Proof System for PC	124
6.3.3	Hilbert-style Proof Systems for Classical Modal Logics	125
6.3.4	Canonical Structure	127
6.4	Basics of Computational Complexity	129
6.5	Notes	135

Part III. Proof Systems for Information Logics

7.	Reasoning About Similarity	139
7.1	Introduction and Outline of the Chapter	139
7.2	NIL: a Logic for Reasoning About Non-deterministic Information	140
7.2.1	Language and Semantics	140
7.2.2	Hilbert-style Proof System	140
7.2.3	Completeness	142
7.2.4	Informational Representability of NIL-models	146
7.3	IL: an Information Logic	148
7.3.1	Language and Semantics	148
7.3.2	A Hilbert-style Proof System	149
7.3.3	Completeness	149
7.4	SIM: a Logic for Reasoning About Relative Similarity	155
7.4.1	Language and Semantics	155
7.4.2	Normal Forms of SIM-formulae	157
7.4.3	A Rasiowa–Sikorski-style Proof System for SIM	157
7.4.4	Extensions	167
7.5	Notes	169
8.	Reasoning About Indiscernibility	171
8.1	Introduction and Outline of the Chapter	171
8.2	DALLA: Data Analysis Logic with Local Agreement	171
8.3	IND: a Logic of Relative Indiscernibility	176
8.3.1	Language and Semantics	176
8.3.2	A Hilbert-style Proof System	178
8.3.3	Completeness	179

8.4	LA-logics	183
8.4.1	Language and Semantics	183
8.4.2	Hilbert-style Proof Systems	185
8.5	A Fuzzy Logic of Graded Modalities	188
8.6	Notes	191
9.	Reasoning About Knowledge	193
9.1	Introduction and Outline of the Chapter	193
9.2	BLKO: a Basic Logic with Knowledge Operators	194
9.2.1	Language and Semantics	194
9.2.2	A Hilbert-style Proof System	194
9.2.3	Relationship with S5	199
9.3	The Logic S5'	200
9.3.1	Language and Semantics	200
9.3.2	A Hilbert-style Proof System	203
9.4	LKO: a Logic with Relative Knowledge Operators	208
9.4.1	Language and Semantics	208
9.4.2	A Transformation from SAT(LKO) into SAT(S5')	209
9.4.3	A Hilbert-style Proof System	211
9.5	Notes	215

Part IV. Computational Aspects of Information Logics

10.	Information Logics Versus Standard Modal Logics	219
10.1	Introduction and Outline of the Chapter	219
10.2	Classes of Rare-logics	220
10.3	Normal Forms of Formulae of Rare-languages	222
10.4	Translation of Rare-logics into Standard Modal Logics	223
10.5	Standard Modal Logics and the Universal Modal Connective	227
10.6	Normal Forms of Formulae of Rare-languages with Nominals	230
10.7	Translation of Rare-logics with Nominals	232
10.8	Reducible Rare-logics	235
10.9	Reducing the Level of Rare-logics	237
10.10	S5 _{L2} : a Rare-logic of Level 2	239
10.11	Notes	241
11.	Decidability of Information Logics	243
11.1	Introduction and Outline of the Chapter	243
11.2	Decidability by Finite Models	244
11.2.1	The Information Logic NIL	244
11.2.2	The Information Logic IL	247
11.2.3	The Logics LKO and S5'	253

11.2.4	LA-logics	255
11.3	Decidability by Translation	262
11.3.1	Logic LIR of Indiscernibility Relations	262
11.3.2	Logics for Reasoning about Similarity	263
11.4	Notes	266
12.	Complexity of Information Logics	267
12.1	Introduction and Outline of the Chapter	267
12.2	IND-satisfiability is in LIN	267
12.3	NP -complete LA-logics	268
12.4	BLKO-satisfiability is NP -complete	269
12.5	NIL-satisfiability is PSPACE -complete	270
12.5.1	Preliminary Results	270
12.5.2	The Algorithm in PSPACE	280
12.6	S5'-satisfiability is EXPTIME -complete	287
12.7	LKO-satisfiability is EXPTIME -complete	289
12.8	Other Complexity Bounds	290
12.8.1	Sharp Characterisations	290
12.8.2	Loose Characterisations	291
12.9	Notes	291
Part V. Representability and Duality		
13.	Informational Representability	297
13.1	Introduction and Outline of the Chapter	297
13.2	Frames with Relative Relations	298
13.3	Derivation of Frames from Information Systems	299
13.3.1	A First-order Theory of Information Systems	299
13.3.2	Σ -specification	301
13.4	Representability of Σ -frames	301
13.5	Nice Set Proof Technique for Full Σ -frames	302
13.6	Nice Set Proof Technique for Plain Σ -frames	304
13.7	Preservation of Informational Representability	305
13.7.1	Permutation of Variables in Specifications	305
13.7.2	Complementing Value Predicates in Specifications	306
13.7.3	Complementing the Matrix in Specifications	307
13.7.4	Interchanging the Quantifiers in Specifications	308
13.7.5	Full Σ -frames are Sufficient	309
13.8	Examples of Informational Representability	309
13.8.1	Indiscernibility Frames	309
13.8.2	Diversity Frames	310
13.8.3	Complementarity Frames	310
13.8.4	Incomplementarity Frames	312
13.8.5	Similarity and Negative Similarity Frames	313

13.8.6	Left and Right Orthogonality Frames	314
13.8.7	Backward and Forward Inclusion Frames	314
13.8.8	Representability of IL-frames	315
13.9	Examples of Non-representability	318
13.9.1	Classes of Σ -frames Closed Under Subframes	319
13.9.2	Non-representability of Local Agreement Frames	319
13.10	Notes	320
14.	Informational Interpretation	
	of Standard Algebraic Structures	321
14.1	Introduction and Outline of the Chapter	321
14.2	A Lattice of Indiscernibility Relations	322
14.3	A Boolean Algebra of Certainty Regions	323
14.4	An Informational Interpretation of Monadic Algebras and Lukasiewicz Algebras	324
14.5	An Informational Interpretation of Stone Algebras	329
14.6	Algebras of Rough Relations	334
14.7	Algebras of Fuzzy Relations	338
14.8	Approximation Spaces and Nelson Algebras	347
14.9	Standard Algebraic Structures with Generalised Approximation Operations	349
14.10	Notes	352
15.	Information Algebras	355
15.1	Introduction and Outline of the Chapter	355
15.2	Modal, Sufficiency, and Mixed Algebras	356
15.3	Boolean Algebras with Relative Operators	359
15.4	Relationship Between Complex Information Algebras and Information Frames	361
15.5	Information Algebras of Indistinguishability and Distinguishability	364
15.5.1	AS-algebras of Indistinguishability	364
15.5.2	AW-algebras of Indistinguishability	365
15.5.3	AS-algebras of Distinguishability	366
15.5.4	AW-algebras of Distinguishability	367
15.6	Canonical Extensions of Information Algebras	368
15.7	Identities of Information Algebras	370
15.8	Closure Under Canonical Extensions	372
15.9	Relationship Between Information Algebras and the Frames Determined by Their Canonical Extensions	374
15.10	Relationship Between Information Logics and Information Algebras	376
15.11	Notes	377
	References	377
