

Contents

Preface	v
Contributors	xiii
1. Isolation of <i>Mycobacterium</i> Species Genomic DNA	1
John T. Belisle, Spencer B. Mahaffey and Preston J. Hill	
2. Isolation of Mycobacterial RNA	13
Tige R. Rustad, David M. Roberts, Reiling P. Liao and David R. Sherman	
3. Lipoglycans of <i>Mycobacterium tuberculosis</i>: Isolation, Purification, and Characterization	23
Libin Shi, Jordi B. Torrelles and Delphi Chatterjee	
4. Analyzing Lipid Metabolism: Activation and β-Oxidation of Fatty Acids	47
Paul Robert Wheeler	
5. Analysis of Lipid Biosynthesis and Location	61
Paul Robert Wheeler	
6. Whole Genome Analysis Using Microarrays	83
S.J. Waddell, J. Hinds and P.D. Butcher	
7. Use of DNA Microarrays to Study Global Patterns of Gene Expression	95
Roberta Provvedi, Giorgio Palù and Riccardo Manganelli	

8. Two-Dimensional Gel Electrophoresis–Based Proteomics of Mycobacteria	111
Jens Mattow, Frank Siejak, Kristine Hagens, Julia Kreuzeder, Stefan H.E. Kaufmann and Ulrich E. Schaible	
9. Transport Assays and Permeability in Pathogenic Mycobacteria	143
Marie-Antoinette Lanéelle and Mamadou Daffé	
10. Continuous Culture of Mycobacteria	153
Joanna Bacon and Kim A. Hatch	
11. Measuring Minimum Inhibitory Concentrations in Mycobacteria	173
Frederick A. Sirgel, Ian J.F. Wiid and Paul D. van Helden	
12. Rapid Screening of Inhibitors of <i>Mycobacterium tuberculosis</i> Growth Using Tetrazolium Salts	187
Anita G. Amin, Shiva K. Angala, Delphi Chatterjee and Dean C. Crick	
13. Electroporation of Mycobacteria	203
Renan Goude and Tanya Parish	
14. Ins and Outs of Mycobacterial Plasmids	217
Farahnaz Movahedzadeh and Wilbert Bitter	
15. The Use of Temperature-Sensitive Plasmids in Mycobacteria	229
Damien Portevin, Wladimir Malaga and Christophe Guilhot	
16. Heterologous Expression of Genes in Mycobacteria	243
James A. Triccas and Anthony A. Ryan	
17. Inducible Expression Systems for Mycobacteria	255
Christopher M. Sassetti	
18. Assaying Promoter Activity Using LacZ and GFP as Reporters	265
Paul Carroll and Jade James	
19. Construction of Unmarked Deletion Mutants in Mycobacteria	279
Houhui Song, Frank Wolschendorf and Michael Niederweis	
20. Construction of Targeted Mycobacterial Mutants by Homologous Recombination	297
Sharon L. Kendall and Rosangela Frita	

21. Phage Transposon Mutagenesis	311
M. Sloan Siegrist and Eric J. Rubin	
22. Gene Essentiality Testing in <i>Mycobacterium smegmatis</i> Using Specialized Transduction	325
Apoorva Bhatt and William R. Jacobs Jr.	
23. Gene Switching and Essentiality Testing	337
Amanda Claire Brown	
24. Insertion Element IS6110-Based Restriction Fragment Length Polymorphism Genotyping of <i>Mycobacterium tuberculosis</i>	353
Robin M. Warren, Paul D. van Helden and Nicolaas C. Gey van Pittius	
25. Typing <i>Mycobacterium tuberculosis</i> Using Variable Number Tandem Repeat Analysis	371
T.J. Brown, V.N. Nikolayevskyy and F.A. Drobniewski	
26. Molecular Detection of Drug-Resistant <i>Mycobacterium tuberculosis</i> with a Scanning-Frame Oligonucleotide Microarray	395
Dmitriy V. Volokhov, Vladimir E. Chizhikov, Steven Denkin and Ying Zhang	
27. MycoDB: An Online Database for Comparative Genomics of the Mycobacteria and Related Organisms	419
Roy R. Chaudhuri	
28. Environmental Amoebae and Mycobacterial Pathogenesis	433
Melanie Harrieff and Luiz E. Bermudez	
Index	443
