

Contents

1	Basic Models	1
1.1	Introduction	1
1.2	Biological Principles	3
1.3	Formulation of the Mathematical Model	4
1.4	Properties of Solutions	5
1.5	Equilibrium Solutions	7
1.6	Stability Analysis	8
1.7	General Uptake Function	18
1.8	Discussion	24
1.9	Notes and Remarks	24
1.10	Exercises	25
2	Chemostat Versus the Lake	27
2.1	Introduction	27
2.2	Models Involving Time Delays	28
2.3	Time Delay Models in Growth Response	31
2.3.1	Global Stability	35
2.3.2	A Modified Model	39
2.4	Material Recycling with and without Time Delays	41
2.4.1	Finite Delays in Material Recycling	42
2.4.2	Distributed Delays	46
2.5	A More Realistic Model	64
2.5.1	Qualitative Properties of Solutions	65
2.5.2	Local Stability	72
2.5.3	Global Asymptotic Stability Results	80
2.6	Discussion	89
2.7	Notes and Remarks	90
2.8	Exercises	91
3	Instability Tendencies	93
3.1	Introduction	93
3.2	Instability Tendencies	94
3.3	Instability Characteristics of Model	100

3.4	Equilibria and Instability.....	106
3.5	Biocontrol Mechanisms.....	112
3.6	Discussion.....	114
3.7	Notes and Remarks.....	114
3.8	Exercises.....	115
4	Self-Regulation.....	117
4.1	Introduction.....	117
4.2	Qualitative Properties of Solutions.....	119
4.3	Persistence of Solutions.....	125
4.4	Global Asymptotic Stability Results.....	128
4.5	Oscillations and the Self-regulation.....	143
4.5.1	Properties of Solutions.....	144
4.5.2	Existence of Periodic Solutions.....	146
4.6	A Model with Discrete Delay in Growth Response.....	156
4.6.1	Stability Results.....	156
4.7	Discussion.....	170
4.8	Notes and Remarks.....	170
4.9	Exercises.....	172
5	Wall Growth.....	175
5.1	Introduction.....	175
5.2	Basic Properties of Solutions.....	176
5.3	Global Dynamics.....	180
5.4	Discussion.....	186
5.5	Notes and Remarks.....	187
5.6	Exercises.....	187
6	Zones of No Activation.....	189
6.1	Introduction.....	189
6.2	Global Stability for the System.....	190
6.3	Global Stability with Self-regulation and Zones.....	195
6.4	Discussion.....	203
6.5	Notes and Remarks.....	204
6.6	Exercises.....	205
7	Influence of the Control Mechanisms.....	207
7.1	Introduction.....	207
7.2	Stability Under Self-Regulatory Control Mechanism.....	207
7.3	Stability Under Wall Growth Mechanism.....	212
7.4	Stability Under Zones of No Activation.....	221
7.5	Discussion.....	224
7.6	Notes and Remarks.....	225
7.7	Exercises.....	226

8	Parameter Estimation Using Dynamic Optimization	227
8.1	Introduction.....	227
8.2	Dynamic Optimization.....	228
8.3	Application to Basic Chemostat Model.....	231
8.4	Method of Differential Transforms.....	236
8.4.1	Estimation of Washout Rate D	240
8.5	Discussion.....	247
8.6	Notes and Comments.....	247
8.7	Exercises.....	247
A	Derivatives and Definitions	249
B	Results on Boundedness and Convergence	251
C	Uniqueness and Stability	255
	References	263
	Author Index	269
	Subject Index	271
