|                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------|-----|
| R.M. SANDRI-GOLDIN                                                                                       |     |
| Nuclear Export of Herpes Virus RNA . . . . .                                                             | 1   |
| T. DOBNER and J. KZHYSHKOWSKA                                                                            |     |
| Nuclear Export of Adenovirus RNA . . . . .                                                               | 25  |
| J. HAUBER                                                                                                |     |
| Nuclear Export Mediated by the Rev/Rex Class<br>of Retroviral <i>Trans</i> -activator Proteins . . . . . | 55  |
| M.-L. HAMMARSKJÖLD                                                                                       |     |
| Constitutive Transport Element-Mediated<br>Nuclear Export . . . . .                                      | 77  |
| B. FAHRENKROG, D. STOFFLER, and U. AEBI                                                                  |     |
| Nuclear Pore Complex Architecture<br>and Functional Dynamics . . . . .                                   | 95  |
| R.H. STAUBER                                                                                             |     |
| Methods and Assays to Investigate Nuclear Export. . . . .                                                | 119 |
| Subject Index. . . . .                                                                                   | 129 |
