

Thermo-Dynamics of Plates and Shells

Bearbeitet von
Jan Awrejcewicz, Vadim Anatolevich Krys'ko, Anton V Krys'ko

1. Auflage 2006. Buch. xii, 777 S. Hardcover

ISBN 978 3 540 34261 8

Format (B x L): 15,5 x 23,5 cm

Gewicht: 1346 g

[Weitere Fachgebiete > Physik, Astronomie > Mechanik > Klassische Mechanik](#)

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Table of Contents

Preface	V
1 Three-Dimensional Problems of Theory of Plates in Temperature Field	1
1.1 Introduction	2
1.2 Coupled 3D Thermoelasticity Problem for a Cubicoid	11
1.2.1 Variational equations	11
1.2.2 Differential equations	13
1.2.3 Difference approximation	21
1.2.4 Difference approximation Error	26
1.2.5 Difference approximation Stability	29
1.3 Methods of Solving Difference Equations	39
1.3.1 Dimensionless Equations	39
1.3.2 Systems of Elliptic Difference Equations	41
1.3.3 Systems of Parabolic and Hyperbolic Difference Equations ..	47
1.3.4 Algorithm	48
1.3.5 Reliability	54
1.3.6 Numerical Experiments	57
1.4 Linear Problems in the Theory of Plates in 3D Space	59
1.4.1 Static Problems	59
1.4.2 Dynamic problems	79
1.4.3 Non-stationary temperature field	82
1.4.4 Comparison of Solutions – non-isothermal Processes in Static Problems	87
1.4.5 Inner heat sources	109
1.4.6 Deformation and Temperature	114
1.5 3D Physically Non-Linear Problems	129
1.5.1 Differential equations and difference approximation	130
1.5.2 Algorithm	133
1.5.3 Estimation of Convergence	134
1.5.4 Temperature and Deformation Coupling	136
2 Stability of Rectangular Shells within Temperature Field	149
2.1 Introduction	150
2.2 Flexible Anisotropic Shallow Shells in Temperature Fields	152

2.2.1	Problem formulation and assumptions	152
2.2.2	Fundamental relations	153
2.2.3	Variational and differential equations	159
2.2.4	Boundary and compatibility conditions	167
2.2.5	Compatibility conditions for shallow shells equations	177
2.2.6	Temperature field	183
2.3	Solution of 3D Stationary Heat Transfer Equation	186
2.3.1	The method	186
2.3.2	Construction of difference schemes	194
2.3.3	A priori convergence estimation	206
2.3.4	Algorithm of computation and compatibility conditions	209
2.3.5	Problems	215
2.4	Algorithm for Difference Equations	227
2.4.1	Construction of difference equations	227
2.4.2	Stability problems	232
2.4.3	Reliability of obtained results	234
2.4.4	Transversal load	236
2.4.5	Different boundary conditions	238
2.5	Computations of Plates and Shells in a Temperature Field	252
2.5.1	Stress-strain state	252
2.5.2	Stress-strain state and shells stability	264
3	Dynamical Behaviour and Stability of Closed Cylindrical Shells	267
3.1	Introduction	267
3.2	Thermoelastic Thin Thermosensitive Cylindrical Shells	276
3.2.1	General Introduction	276
3.2.2	Variational Formulation	278
3.2.3	Hybrid-Type Variational Equations	283
3.2.4	Solution Existence	297
3.2.5	Classification	304
3.3	Computational Algorithms	310
3.3.1	Finite Difference Equations	310
3.3.2	Solution to Biharmonic Equation	315
3.3.3	Reliability of the Obtained Results	320
3.3.4	Modified Relaxation Method	328
3.4	Dynamical Stability Loss with Ununiform Force Excitation	334
3.4.1	Criteria of Dynamical Stability Loss (A Review)	334
3.4.2	Nonuniform Impulse External Pressure	342
3.5	Dynamical Stability Loss and Non-uniform Thermal Load	366
3.5.1	Thermal Field Computation	366
3.5.2	Influence of Time, Shell Geometry and Load	373
3.5.3	Combined Static and Thermal Loads	382

4	Dynamical Behaviour and Stability of Rectangular Shells with Thermal Load	395
4.1	Introduction	395
4.2	Algorithm	402
4.2.1	Differential Equations, Boundary and Initial Thermoelastic Conditions	402
4.2.2	Finite Difference Equations	411
4.2.3	Reliability of the Results	412
4.2.4	Stationary State Method	420
4.3	Stability of Thin Shallow Shells	432
4.3.1	Influence of Heat Stream Intensity	432
4.3.2	Shells with Transversal Load and Heat Flow	436
4.3.3	Influence of Thermal and Mechanical Characteristics	446
4.4	Stability of Thin Conical Shells	458
4.4.1	Boundary Conditions and Surrounding Medium	458
4.4.2	Constant Compressing Load and Heat Flow	464
4.4.3	Harmonic Longitudinal Load and Heat Flow	466
4.5	Stability of Flexurable Conical Shells with Convection	479
4.5.1	Problem Formulation	479
4.5.2	Boundary and Thermal Fields Conditions	480
4.5.3	Critical Temperature Versus Heat Transfer Coefficient	483
5	Dynamical Behaviour and Stability of Flexurable Sectorial Shells	493
5.1	Introduction	493
5.2	Flexurable Conical Sectorial Shells Computations	498
5.2.1	Fundamental Relations, Differential Equations, Boundary and Initial Conditions	499
5.2.2	Thermal Field and Set-Up Method	509
5.2.3	Results	515
5.3	Stability of Sectorial Shells with Finite Deflections	520
5.3.1	Influence of the Sector's Angle	522
5.3.2	Set-Up Method and Determination of Critical Loads	560
5.3.3	Heat Impact	595
5.3.4	Local Surface Load With Infinite Duration	603
5.4	Chaotic Dynamics of Sectorial Shells	614
5.4.1	Statement of the problem and computational algorithm	614
5.4.2	Static problems and reliability of results	617
5.4.3	Convergence of a finite difference method along spatial coordinates for non-stationary problems	618
5.4.4	Investigation of chaotic vibrations of spherical sector-type shells	625
5.4.5	Transitions from harmonic to chaotic vibrations	627
5.4.6	Control of chaotic vibrations of flexible spherical sector-type shells	630

6	Coupled Problems of Thin Shallow Shells in a Temperature Field . . .	633
6.1	Introduction	633
6.2	Fundamental Assumptions and Relations	634
6.3	Differential Equations	636
6.4	Boundary and Initial Conditions	639
6.5	Solution to 3D heat conductivity equation	640
6.6	Algorithm	642
6.7	Stability Rectangular Shells with Coupled Deformation and temperature fields	645
6.8	Additional Method	666
7	Novel Solution Method for a System of Linear Algebraic Equations . .	671
7.1	Introduction	671
7.2	Elimination method for equations	673
7.3	Numerical solution of a three-dimensional equation of elliptic type .	684
7.4	Computation of geometrically non-linear non-homogenous shallow shells	696
8	Mathematical Approaches to Coupled Termomechanical Problems . .	705
8.1	Existence and Uniqueness of Solution of One Coupled Plate Thermomechanics Problem	705
8.1.1	Introduction	705
8.1.2	Basic assumption	707
8.1.3	Main results	708
8.2	On the Solution of a Coupled Thermo-mechanical Problem	713
8.2.1	Introduction and Statement of the Problem	713
8.2.2	Method	715
8.3	On the Solvable Operators Generated by Uniformly Correct Problems	719
8.3.1	Introduction	719
8.3.2	Method	719
	References	723
	Index	767
