## VOLUME ONE

Preface

## PART ONE : KEYNOTE LECTURES

- **Recent developments in composite structures**
  U. Kuhlmann
  
- **Recent developments and open problems in fastening technique**
  R. Eligehausen, W. Fuchs

## PART TWO : CODE AND PRACTICE

- **The human factor in fastening technology - a force to be reckoned with**
  W. Fuchs

- **Requirements of technical approvals versus practice (bonded anchors and post-installed rebars)**

- **The "Certified Fastening Technician" as an example of advanced training for users**
  G. Bauer, J. Küenzlen

- **European technical approval (ETA) for anchorages**
  G. Feistel

- **Practical fastening design – a decade of the ETAG Annex C**
  J. Varga

- **History of anchoring steel to concrete in North America, 1900-1977**
  P. Carrato, N. Carrato

- **Historical perspective of anchorage to concrete standards and codes in the USA**
  R.E. Wollmershauser
Qualification and design provisions for bonded anchors in the U.S.
J.F. Silva

International building code compliant anchor approvals
C. Fogstad, N. Randl

Anchor embedment requirements for signal/ sign structures
K.M. Halcovage, R.A. Cook, M.H. Ansley

Investigation of effects of steel reinforcement ratios on testing and qualification of post-installed mechanical anchors in concrete
J. Olsen, M. Ziegler

Testing conditions for prequalification of anchors for seismic applications
M.S. Hoehler

Fastenings under tension load in lightweight and normal weight concrete
A. Wildermuth, W. Fuchs, R. Eligehausen

European approval for fischer FZP undercut anchor in natural stone panels
D. Lehmann, R. Unterweger

PART THREE : CAST-IN ANCHORS

Tension tests on cast-in-place wire-formed inserts
E. Baran, A.E. Schultz, C.E. French

Strut-and-tie model for anchorage of multiple headed bars
S. Chun, S. Hong, B. Oh, D. Lee

Structural performance of deep anchor bolts in damaged foundations
S. Bae, O. Bayrak, J.O. Jirsa, R.E. Klingner

Calculation of anchor channels under dynamic load on basis of the calculation for dowel fixings
M. Heudorfer, F.W. Neikes
### Impact performance of retrofit highway barriers with mechanical anchors

### Model to analyse fastenings with shear lugs
H. Michler

---

### PART FOUR : EXPANSION ANCHORS

#### Behaviour of expansion anchors to concrete
M. Karmazínová, J. Melcher

#### Comparison of load carrying capacities of selected types of post-installed anchors to concrete
M. Bajer, M. Karmazínová, J. Barnat

#### Expansion anchors in high performance concrete
S. Cattaneo, G. Muciaccia, G. Rosati

#### Experimental study of metal expansion anchor combined with resin
K. Imai, M. Iinuma, K. Yamamoto, Y. Hosokawa

#### Study on the structural performance of post-installed anchors embedded in super-high strength concrete (150MPa)
K. Nakano, T. Sugiyama, Y. Matsuzaki

#### Behaviour of expansion and bonded anchors subjected to elevated temperatures
É. Lublóy, G. L. Balázs

---

### PART FIVE : BONDED ANCHORS

#### Load bearing behaviour of bonded expansion anchors
T. Pregartner, J. Asmus

#### Influence of embedment depth and edges on tensile resistance of post-installed bonded anchor
T. Sugiyama, Y. Matsuzaki, K. Nakano
Design of bonded fasteners for splitting failure mode
T. Hüer, R. Eligehausen

Pullout performance of retrofit adhesive anchors in low strength concrete
T. Gurbuz, Y. Kaya, A. Ilki, N. Kumbasar

Bonded anchors under tensile load in high performance concrete
S. Cattaneo, G. Muciaccia

PART SIX: POST-INSTALLED REBARS

Post-installed rebars and tension rebar anchor – installation training, certification and design
M. Reuter, E. Schöffendt

Behaviour and design of post-installed rebars under cyclic loading
I. Simons, R. Eligehausen

Investigations to load-bearing capacity of bonded anchors and post-installed rebar connections
F. Zhu, L. Li

Chemical bonding of concrete and steel reinforcement using a vitreous enamel coupling layer

PART SEVEN: SPECIAL ANCHORS

Load bearing behavior of climbing cones with large load bearing area
J. Asmus, J. Schneider, R. Eligehausen, M. Gartner

Behaviour of fasteners with an embedment depth of smaller than 25 mm
J. Hofmann, A. Kaupp
Load-bearing behaviour of screw anchors in cracked and non-cracked concrete  
J. Küenzlen  

Behavior of plastic anchors in uncracked and cracked concrete under tension loading  
T. Pregartner  

PART EIGHT : DESIGN  

Design of connections between steel and concrete to eurocodes  
J.W.B. Stark  

Performance evaluation of single and group embedded chemical fastenings in concrete under tension load based on experimental measurements  
O. Esmaili, S. Epackachi, M. Ghalibafian, R. Mirghaderi, A.A.T. Behbahani  

Design method for splitting failure mode of fastenings  
J. Asmus  

Performance evaluation of single and group embedded chemical fastenings in concrete under shear load based on experimental measurements  
S. Epackachi, O. Esmaili, M. Ghalibafian, R. Mirghaderi, A.A.T. Behbahani  

Re-evaluation of pryout breakout capacity design provisions for headed studs and post-installed anchors loaded in shear  
N.S. Anderson, D.F. Meinheit  

Behaviour and design of anchorages in concrete close to the edge  
R. Mihala, K. Bergmeister, A. Unterweger  

Design of anchors close to an edge under shear loads  
R. Mallée, P. Pusill-Wachsmuth
Side edge concrete breakout capacity of headed studs loaded in shear
N.S. Anderson, D.F. Meinheit

Design of shear load connectors with supplementary reinforcement
J. Asmus, J. Schneider, R. Eligehausen, U. Oelhafen

Influence of anchor reinforcement on behaviour of anchorages under shear load
K. Schmid, R. Eligehausen

Behaviour of anchors in a corner of a column under tension and shear loads
R. Mallée

Permutations of the combined tension and shear (N-V) interaction for headed studs
A.K. Tureyen, N.S. Anderson, D.F. Meinheit

Calculation of anchor loads in multiple-anchor fastenings subjected to combined bending moments and tension load
L. Li, H. Quan

Influence of a torque moment or an eccentric shear load on the behaviour of double or triple fastenings parallel to the edge
J. Hofmann

Quadruple fastenings under torsion loading
P. Grosser, W. Fuchs, R. Eligehausen

Experimental evaluation of the influence of reinforcement on the tensile resistance of headed steel anchors embedded in concrete
J.M. Raposo, L.C. Neves, L.S. da Silva

PART NINE : SEISMIC

Seismic design provisions for anchors in the U.S.
J.F. Silva, M.S. Hoehler
A new seismic test for metal anchors
T. Guillet, E. David

Experimental and numerical investigation of the seismic behaviour of concrete anchors
A. Rieder, K. Bergmeister

Behavior of fastenings under realistic earthquake excitations
T. Sippel, A. Rieder

Seismic performance and modelling of post-tensioned precast concrete beam to column connections with supplementary energy dissipation
H.A. Spieth, A. Carr, S. Pampanin, J. Mander

VOLUME TWO

Full-scale shake table test of pipes anchored in a 7-story RC building
M.S. Hoehler, J.F. Silva, L. Floriani, U. Bourgund, H. Gassner, J.I. Restrepo, M. Panagiotou

Shear transfer mechanism to bonded anchors for exterior seismic retrofitting
Y. Hattori, Y. Yamamoto

Seismic strengthening of school building damaged by 2004, Niigata-Chuetsu earthquake
T. Akiyama, Y. Yamamoto, K. Ariki, Y. Kado

PART TEN : EXPERIMENTAL STUDIES

Monitoring the steel-concrete interaction using acoustic emission techniques
C. Grosse, H.-W. Reinhardt

High sophisticated full field interferometry (ESPI) on concentrate loaded concrete
A. Unterweger, K. Bergmeister, R. Mihala
The experimental investigation of connection between steel and reinforced concrete shear wall
M. Husem, S. Pul, E. Yozgat, S.E. Gorkem

Load bearing behaviour of a heavy load undercut grouted anchor
T. Pregartner, R. Eligehausen, W. Fuchs

A test and design concept for the fischer FZP-G undercut point fitting for glass panels
R. Unterweger, J. Beyer, J.-D. Wörner, R. Hilber, K. Bergmeister

PART ELEVEN : NUMERIC

Analyzing behaviour of bonded anchors by experimental and numerical approach
M. Bajer, J. Kala, J. Barnat

A numerical simulation of bond for pull-out tests- the direct problem
S. Khalfallah, M. Ouchenane

Numerical study on size effect and design recommendation for large chemical anchor
P. Liao, Y. Li, J. Kunz, B. Winkler

Determination of point thermal transmittance of anchors by means of theory, numerical simulation and practical operation
F. Burkhardt, H.A. Spieth

Numerical analysis of spalling of concrete cover at high temperature
J. Ožbolt, G. Periškić, H.-W. Reinhardt, R. Eligehausen

PART TWELVE : APPLICATION

Horizontal stiffening systems for buildings via column restraints and frames
K.-P. Geh, M. Kintscher
Horizontal stiffening systems of building by means of shear walls connected by wire rope loop systems
M. Kintscher

GFRP-Rebars for permanent applications design procedure
H. Braasch, A. Weber

Connections between iron and masonry, in the old buildings of izmir, turkey
Y.K. Aktuglu

Fastenings for handrails and balustrades in narrow edge surfaces of slabs by use of special anchor channels
D. Lotze, J. Meszaros, C. Lutz

Anchoring of window frames subjected to wind loads in typhoon regions
J. Buhler

Fastener for subsequent sealing of basements with a waterproof TRC construction
P. Schillinger, R. Mott, M. Hinzen, W. Brameshuber

Expansion and bonded anchors in expanded clay aggregate concrete
R. Nemes

Durability and ultimate strength of external tendon anchorage for prestressed concrete girders
L. Huang, K. Komine, H. Hikosaka

Shear connectors for innovative slab track construction
J. Kunz

PART THIRTEEN : PUNCHING

Punching shear reinforcement for semi-precast slabs
J. Furche

Punching tests on corner slab column connections with shear reinforcement
A. Negele, R. Eligehausen
Effectiveness of shear bolts in retrofitting slab-columns connections against punching
M.A. Polak

Continuous shear connectors in high performance concrete
O. Hechler, M. Feldmann, S. Rauscher, J. Hegger

Experimental investigations on punching behaviour of edge column-slab connections
J. Hegger, M. Ricker, F. Häusler

Earthquake response of composite steel and concrete base column connections
L. Di Sarno, M. Pecce

PART FOURTEEN : CONNECTIONS

Component method for anchor plates
U. Kuhlmann, M. Rybinski

Stiffness requirements for baseplates
S. Fichtner, R. Eligehausen

The structural assessment of rigid connections between reinforced concrete and steel members within framed buildings
K. Micallef

Improvement of load bearing capacity in design of anchor plates with headed studs in concrete columns
S. Fromknecht, C. Odenbreit

PART FIFTEEN : HYBRID STRUCTURES

Experiments and FE-model for a connection between steel frames and precast concrete infill panels
P.A. Teeuwen, C.S. Kleinman, H.H. Snijder, H. Hofmeyer

Static and fatigue behaviour of grouted connections for hybrid structures
L. Lohaus, S. Anders
The inelastic behaviors of connections of steel column and reinforced concrete base
E. Yozgat, M. Husem, S. Pul, S. E. Gorkem

PART SIXTEEN: CONCRETE - STEEL - BOND

Production of reinforcement mesh - welding technique, code requirements, quality assurance aspects
M. Müller, M. Greitmann

Proposal of a new experimental procedure to determinate the anchorage length of high strength steel wires
M.A. Vicente, D.C. González

Lightweight and ordinary concrete-steel bond strength
S. Pul, M. Husem, S. E. Gorkem, E. Yozgat

The influence of HSC concrete and steel interaction on the RC members ductility
T. Waśniewski, Ł. Sowa, M.E. Kamińska

Effect of embedment length on bond stress-slip response in high strength concrete
G. A. Rao, K. Pandurangan, R. Eligehausen

Concrete-steel bond characterization of RC structural elements built with smooth plain reinforcement bars
C. Fernandes, H. Varum, A. Costa

Connecting system between micro pile and precast concrete member with grout-filled sleeve
Y. Inatomi, T. Yamane, I. Yoshitake, F. Miura

Numerical modelling of the effect of corrosion on the behaviour of RC-beams reinforced with plain bar reinforcement
T. Pregartner, J. Cairns
PART SEVENTEEN : COMPOSITE STRUCTURES

Behavior of connections between open sandwich slab to double steel skin wall composite walls
W. Kim, S. Hong, W. Kim

Failure mechanism analyze of bonded steel-concrete composite beams by finite element
A. Li, G. Zhao

Connections by adherence for steel-concrete composite beams
J.-P. Lebet, M. Thomann

Shear behaviour of grouped stud connectors in precast slab:
Effects of filling material and recess arrangement
A. Lachal, J.-M. Aribert, L. Demilecamps

PART EIGHTEEN : COMPOSITE BEAMS AND FLOORS

Innovative slab systems with slim-floor profiles
U. Kuhlmann, G. Hauf

The effect of shear rails in concrete chords of composite girders at web openings
W. Ramm, C. Kohlmeyer, J. Schnell, C. Balzer

Shear resistance of steel studs in composite steel beams with precast concrete hollow core floor slabs under biaxial loads
K.S. Elliott, K. A. Rashid

Correlation between stiffness of composite connections and adjacent composite beams
C. Hahn, C. Odenbreit

Experimental analyze of bonded steel concrete composite beams
A. Li, L. Bouazaoui, G. Perrenot, Y. Delmas
PART NINETEEN : CONNECTORS IN HIGH PERFORMANCE CONCRETE

Innovative shear connection for composite beams with UHPC  
J. Hegger, S. Rauscher  

Property of shear connectors for steel and light-weight concrete composite girder  
M. Tsujikado, Y. Fujiwara, T. Hosaka, H. Hiragi

PART TWENTY : TEST METHODS

Experimental study on new connection of mixed structure  
Y. Tanaka, Y. Takahashi, T. Ueda

Novel shear connectors experimental investigations and numerical comparisons  
J. Fink, T. Petraschek

The experimental investigation of the effects of different types and combinations of shear connectors in steel-concrete composite beams  
S.E. Görkem, M. Husem, S. Pul, E. Yozgat

PART TWENTY-ONE : FATIGUE

Fatigue resistance of aperture plate shear connectors  
M. Gündel, B. Hauke

Fatigue behaviour of horizontally lying shear studs  
U. Kuhlmann, J. Raichle

Static and fatigue behaviors of shear studs damaged by fire  
Y. Imagawa, O. Ohyama, A. Kurita

PART TWENTY-TWO : CONNECTORS

New methods of connection for composite girders with corrugated steel webs  
B. Novák, J. Röhm, M. Weissbach
