
Contents

Part I Digital Image Inpainting, Image Dejittering, and Optical Flow Estimation

Image Inpainting Using a TV-Stokes Equation <i>Xue-Cheng Tai, Stanley Osher, Randi Holm</i>	3
Error Analysis for H^1 Based Wavelet Interpolations <i>Tony F. Chan, Hao-Min Zhou, Tie Zhou</i>	23
Image Dejittering Based on Slicing Moments <i>Sung Ha Kang, Jianhong (Jackie) Shen</i>	35
CLG Method for Optical Flow Estimation Based on Gradient Constancy Assumption <i>Adam Rabcewicz</i>	57

Part II Denoising and Total Variation Methods

On Multigrids for Solving a Class of Improved Total Variation Based Staircasing Reduction Models <i>Joseph Savage, Ke Chen</i>	69
A Method for Total Variation-based Reconstruction of Noisy and Blurred Images <i>Qianshun Chang, Weicheng Wang, Jing Xu</i>	95
Minimization of an Edge-Preserving Regularization Functional by Conjugate Gradient Type Methods <i>Jian-Feng Cai, Raymond H. Chan, Benedetta Morini</i>	109
A Newton-type Total Variation Diminishing Flow <i>Wolfgang Ring</i>	123

Chromaticity Denoising using Solution to the Skorokhod Problem
Dariusz Borkowski 149

Improved 3D Reconstruction of Interphase Chromosomes Based on Nonlinear Diffusion Filtering
Jan Hubený, Pavel Matula, Petr Matula, Michal Kozubek 163

Part III Image Segmentation

Some Recent Developments in Variational Image Segmentation
Tony Chan, Mark Moelich, Berta Sandberg 175

Application of Non-Convex BV Regularization for Image Segmentation
Klaus Frick, Otmar Scherzer 211

Region-Based Variational Problems and Normal Alignment – Geometric Interpretation of Descent PDEs
Jan Erik Solem, Niels Chr. Overgaard 229

Fast PCLSM with Newton Updating Algorithm
Xue-Cheng Tai, Chang-Hui Yao 249

Part IV Fast Numerical Methods

Nonlinear Multilevel Schemes for Solving the Total Variation Image Minimization Problem
Tony F. Chan, Ke Chen, Xue-Cheng Tai 265

Fast Implementation of Piecewise Constant Level Set Methods
Oddvar Christiansen, Xue-Cheng Tai 289

The Multigrid Image Transform
Paul M. de Zeeuw 309

Minimally Stochastic Schemes for Singular Diffusion Equations
Bernhard Burgeth, Joachim Weickert, Sibel Tari 325

Part V Image Registration

Total Variation Based Image Registration
Claudia Frohn-Schauf, Stefan Henn, Lars Hömke, Kristian Witsch 343

**Variational Image Registration Allowing
for Discontinuities in the Displacement Field**
Sven Kabus, Astrid Franz, Bernd Fischer 363

Part VI Inverse Problems

**Shape Reconstruction from Two-Phase Incompressible Flow
Data using Level Sets**
Rossmay Villegas, Oliver Dorn, Miguel Moscoso, Manuel Kindelan 381

**Reservoir Description Using a Binary Level Set Approach
with Additional Prior Information About the Reservoir
Model**
*Lars Kristian Nielsen, Xue-Cheng Tai, Sigurd Ivar Aanonsen, Magne
S. Espedal* 403
