

Spatial Econometrics

Statistical Foundations and Applications to Regional Convergence

Bearbeitet von
Giuseppe Arbia

1. Auflage 2006. Buch. xviii, 207 S. Hardcover

ISBN 978 3 540 32304 4

Format (B x L): 15,5 x 23,5 cm

Gewicht: 508 g

[Wirtschaft > Volkswirtschaft > Wirtschaftstheorie, Wirtschaftsphilosophie](#)

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung [beck-shop.de](#) ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Table of Contents

1 Motivation 3

1.1 Introduction.....3

1.2 Theoretical Economic Models Calling for Spatial Econometric
Techniques7

1.2.1 Introduction.....7

1.2.2 The β -convergence Approach.....8

1.3 A β -convergence Analysis of European and Italian Regions.....14

1.3.1 Introduction.....14

1.3.2 A β -convergence Analysis of Italian NUTS-3 Provinces
(1951-1999)16

1.3.3 A β -convergence Analysis of European NUTS-2 Regions
(1980-1996)22

2 Random Fields and Spatial Models 29

2.1 Introduction.....29

2.2 The Concept of a Random Field31

2.2.1 The Nature of the Index S 32

2.2.1.1 Generalities32

2.2.1.2 The Topology of a Random Field34

2.2.2 The Dependence Structure of a Random Field37

2.3 Restrictions on Random Fields41

2.3.1 Restrictions on the Spatial Heterogeneity of a Random Field41

2.3.2 Restrictions on The Spatial Dependence of a Random Field.....44

2.4 Some Special Random Fields47

2.4.1 Spatial White Noise47

2.4.2 Markov Random Fields47

2.4.2.1 Generalities47

2.4.2.2 The Hammersley and Clifford Theorem48

2.4.2.3 Ising’s Law50

2.4.2.4	The Strauss Auto-model.....	53
2.4.2.5	The Auto-binomial Field.....	54
2.4.2.6	The Auto-Poisson Model.....	55
2.4.2.7	The Auto-normal (or CAR) Field.....	55
2.4.2.8	The Intrinsic Gaussian Field.....	56
2.4.2.9	The Bivariate Auto-normal Field	57
2.4.2.10	The Multivariate Auto-normal (or MCAR) Field.....	58
2.4.3	Non-Markovian Fields.....	61
2.4.3.1	The Simultaneous Autoregressive Random Field (SAR)	61
2.4.3.2	The Moving Average Random Field.....	63
2.4.3.3	The Autoregressive Moving Average Random Field.....	64
2.4.3.4	The Spatial Error Component Random Field	64
2.4.3.5	The Direct Representation of a Random Field	65
2.5	Limiting Theorems for Random Fields.....	66
2.5.1	Introduction.....	66
2.5.2	Some Limit Theorems for Random Fields.....	67
3	Likelihood Function for Spatial Samples.....	71
3.1	Introduction.....	71
3.2	Some Approximations for the Likelihood of Random Fields	74
3.2.1	The Coding Technique.....	74
3.2.2	The Unilateral Approximation.....	75
3.2.3	The Pseudo-Likelihood <i>à la Besag</i>	77
3.2.4	Computational Aspects.....	78
3.3	Maximum Likelihood Estimation Properties in Spatial Samples.....	79
3.4	Tests Based on Likelihood.....	79
3.5	Tests Based on Residual Sums of Squares.....	82
4	The Linear Regression Model with Spatial Data	83
4.1	Introduction.....	83
4.2	Specification of a Linear Regression Model.....	83
4.2.1	The <i>Conditional</i> Specification	84
4.2.1.1	Hypotheses on the Probability Model (PM)	84

4.2.1.2	Hypotheses on the Statistical Generating Mechanism (GM)	85
4.2.1.3	Hypotheses on the Sampling Model (SM)	86
4.2.2	Standard Textbook Specification	86
4.3	Violation of the Hypotheses on the Sampling Model	88
4.3.1	Introduction	88
4.3.2	A <i>General-Purpose</i> Testing Procedure for Spatial Independence	89
4.3.3	The Respecification of the Linear Regression as a Multivariate CAR Field	91
4.3.3.1	Introduction	91
4.3.3.2	Respecification of the PM, GM and SM Hypotheses	92
4.3.3.3	Likelihood of a Bivariate CAR Spatial Linear Regression Model	94
4.3.3.4	Hypothesis Testing in the Bivariate CAR Spatial Linear Regression Model	96
4.3.3.5	Likelihood of a Multivariate CAR Spatial Linear Regression Model	98
4.3.4	The Respecification of the Linear Regression with SAR Residuals (the <i>Spatial Error Model</i>)	98
4.3.4.1	Introduction	98
4.3.4.2	Derivation of the Likelihood	100
4.3.4.3	Equivalence of the Statistical Model Implied by the Bivariate CAR and the SAR Residual	101
4.3.4.4	Hypothesis Testing in the Spatial Error Model	103
4.3.4.5	Generalized Least Squares Estimators	104
4.3.4.6	Approximate Estimation Techniques	106
4.3.5	The Re-specification of the Linear Regression by Adding a Spatial Lag (the <i>Spatial Lag Model</i>)	108
4.3.5.1	Introduction	108
4.3.5.2	Derivation of the Likelihood	108
4.3.5.3	Estimation	111
4.3.5.4	Hypothesis Testing	113
4.3.6	Anselin's General Spatial Model	114
4.4	Violation of the Hypotheses on the Probability Model	118
4.4.1	Introduction	118

4.4.2	Normality.....	118
4.4.2.1	Generalities	118
4.4.2.2	Testing for Departures from Normality	119
4.4.2.3	Solutions to the Problem of Non-normality	121
4.4.3	Spatial Heteroskedasticity.....	124
4.4.3.1	Introduction.....	124
4.4.3.2	Testing for Spatial Heteroskedasticity.....	126
4.4.3.3	Solution to the Problem of Spatial Heteroskedasticity	129
4.4.4	Spatial Invariance of the Parameters.....	129
4.4.4.1	Testing Parameters' Spatial Invariance	129
4.4.4.2	Estimation in the Presence of Structural Changes.....	132
5	Italian and European β-convergence Models Revisited	133
5.1	Introduction.....	133
5.2	A Spatial Econometric Analysis of the Italian Provinces β -convergence Model.....	133
5.2.1	Violation of the Hypotheses on the Sampling Model	133
5.2.2	Violation of the Hypotheses on the Probability Model.....	136
5.3	A Spatial Econometric Analysis of the European Regions β -convergence Model	139
5.3.1	Violation of the Hypotheses on the Sampling Model	139
5.3.2	Violation of the Hypotheses on the Probability Model.....	141
6	Looking Ahead: A Review of More Advanced Topics in Spatial Econometrics.....	145
6.1	Introduction.....	145
6.2	Alternative Models.....	146
6.2.1	Panel Data Models.....	146
6.2.2	Regional Convergence Models.....	147
6.2.3	Space-Time Models	149
6.2.4	Discrete Variables.....	151
6.2.5	Spatial Externalities	151
6.2.6	Bayesian Models.....	151
6.2.7	Non-parametric Techniques.....	152

6.3 Alternative Tests	154
6.4 Alternative Estimation Methods	157
6.5 Exploratory Tools	160
Appendix: A Review of the Available Software for Spatial Econometric Analysis	161
A.1 Introduction.....	161
A.2 The SpaceStat Programme	162
A.3 GeoDa.....	162
A.4 Toolboxes	163
References.....	165
List of Tables.....	189
List of Figures	191
Name Index.....	193
Subject Index.....	199
