

Contents

1	Introduction	1
	<i>Reinhart Poprawe</i>	
2	High-Power Diode Laser Technology and Characteristics	5
	<i>Martin Behringer</i>	
2.1.	Principles of Diode Laser Operation	5
2.2.	Manufacturing Technology	25
2.3.	Chip Characterization Methods and Measurements	33
2.4.	Broad Area Emitters and Arrays	47
2.5.	High-Brightness Emitters and Arrays	55
3	Packaging of Diode Laser Bars	75
	<i>Konstantin Boucke</i>	
3.1.	Introduction	75
3.2.	Mounting of Diode Laser Bars	77
3.3.	Cooling	83
3.4.	Expansion-Matched Packages	104
3.5.	Mounting of Micro-Optics	117
4	Incoherent Beam Superposition and Stacking	121
	<i>Peter Loosen, Alexander Knitsch</i>	
4.1.	Introduction and Survey	121
4.2.	Beam Collimation	128
4.3.	Techniques for Beam Combination	142
4.4.	Stacking Techniques	150
4.5.	Beam Symmetrization and Fiber Coupling	162
4.6.	Beam Quality Limits and Comparison to Coherent Coupling	175
5	Laser Systems Beam Characteristics, Metrology, and Standards	181
	<i>Bert John Neubert, Wolf-Dieter Scharfe</i>	
5.1.	Introduction	181
5.2.	Theoretical Background of Beam Propagation	183
5.3.	Power Density Distribution	186
5.4.	Propagation of the Beam Widths	188
5.5.	Measurement of the Beam Power	196
5.6.	Measurement of the Power Density Distribution and the Beam Propagation Ratio, M^2	196

5.7.	Beam Positional Stability	204
5.8.	Wavefront of a Laser Beam	205
5.9.	Lifetime	206
5.10.	Laser Safety	209
5.11.	Table of International Standards related to Laser Metrology	210
5.12.	Practical Hints for Measurements	211
6	Diode Laser Systems	215
	<i>Friedrich Bachmann</i>	
6.1.	Introduction	215
6.2.	Multi-Purpose Diode Laser Systems	215
6.3.	Modular Diode Laser Systems	245
7	Applications	285
	<i>D. Petring, R. Polzin, M. Becker</i>	
7.1.	Joining Technologies	285
7.2.	Cutting and Laser-Assisted Machining Technologies	387
7.3.	Surface Treatment	425
8	Summary and Outlook	535
	<i>Reinhart Poprawe</i>	
	Index	539
