Preface	v
Contributors	x
1 The Pathogenesis of Disease Due to Nontypeable <i>Haemophilus influenzae</i> Gail G. Hardy, Simone M. Tudor, and Joseph W. St. Geme, III	1
2 The Pathogenesis of Disease Due to Type b <i>Haemophilus influenzae</i> Ruth Aubrey and Christoph Tang	29
3 General Methods for Culturing <i>Haemophilus influenzae</i> Grant Poje and Rosemary J. Redfield	51
4 Transformation of <i>Haemophilus influenzae</i> Grant Poje and Rosemary J. Redfield	57
5 Diagnosis of Infection Alex van Belkum and Loek van Alphen	71
6 Characterization of Plasmids Ioanna D. Dimopoulou, Mohd-Zain Zaini, and Derrick W. Crook	93
7 Protein Characterization by Two-Dimensional Gel Electrophoresis Phillip Cash and J. Simon Kroll	101
8 Monitoring Gene Expression Using DNA Arrays Tahir R. Ali, Ming-Shi Li, and Paul R. Langford	119
9 Gene Expression Technology Xavier de Bolle and Christopher D. Bayliss	135
10 The Genome Sequence of <i>Haemophilus influenzae</i> Derek W. Hood	147
11 Structural Profiling of Short-Chain Lipopolysaccharides from <i>Haemophilus influenzae</i> Elke K. H. Schweda and James C. Richards	161
12 Mutagenesis of <i>H. influenzae</i> Mark A. Herbert	185

13	Transposon Tn10 <i>Stefan Schlör, Gabriele Kemmer, and Joachim Reidl</i>	211
14	In Vivo Expression of Bacterial Genes During Human Infections <i>Martin Handfield, Trevor Seifert, and Jeffrey D. Hillman</i>	225
15	ELISA <i>Joyce S. Plested, Philip A. Coull, and Margaret Anne J. Gidney</i>	243
16	Opsonophagocytosis Assay Using Flow-Cytometry <i>Joyce S. Plested and Philip A. Coull</i>	263
17	In Vitro Models of Infection I—Human Respiratory Tissue Organ Culture <i>Andrew M. Middleton, Paula Keig, and Robert Wilson</i>	277
18	In Vitro Models of Infection II—Human Umbilical Vein Endothelial Cells (HUVECs) System <i>Mumtaz Virji and Darryl J. Hill</i>	297
19	Animal Models	315
	Index	322
