

EEG - fMRI

Physiological Basis, Technique, and Applications

Bearbeitet von
Christoph Mulert, Louis Lemieux

1. Auflage 2009. Buch. xxiii, 539 S. Hardcover
ISBN 978 3 540 87918 3
Format (B x L): 15,5 x 23,5 cm
Gewicht: 1001 g

[Weitere Fachgebiete > Medizin > Sonstige Medizinische Fachgebiete > Psychiatrie,
Sozialpsychiatrie, Suchttherapie](#)

The logo for beck-shop.de features the text 'beck-shop.de' in a bold, red, sans-serif font. Above the 'i' in 'shop' are three red dots of increasing size. Below the main text, the words 'DIE FACHBUCHHANDLUNG' are written in a smaller, red, all-caps, sans-serif font.

beck-shop.de
DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

Part I Background	1
1 Principles of Multimodal Functional Imaging and Data Integration	3
Arno Villringer, Christoph Mulert, and Louis Lemieux	
1 Introduction.....	3
2 Modes of Data Integration	4
3 Multimodal Data Acquisition Strategies: Degree of Synchrony	7
4 Multimodal Data Integration Strategies.....	8
4.1 Spatial Coregistration.....	8
4.2 Asymmetric Integration.....	9
4.3 Symmetrical Data Fusion.....	10
5 Summary	12
2 EEG: Origin and Measurement	19
Fernando Lopes da Silva	
1 Introduction to the Electrophysiology of the Brain	19
2 Origin of EEG and MEG I: Cellular Sources	20
3 Main Types of Rhythmical EEG/MEG Activities: Phenomenology and Functional Significance.....	22
3.1 Sleep EEG Phenomena.....	22
3.2 Alpha Rhythms of Neocortex and Thalamus	24
3.3 Beta/Gamma Activity of the Neocortex.....	26
3.4 DC	30
4 Origin of the EEG/MEG II: Generators, Volume Conduction and Source Estimation.....	30
5 Localisation Methods Applied to Spontaneous Oscillatory Activities.....	33
5.1 EEG-Related fMRI.....	34
6 Conclusions.....	34

3 The Basics of Functional Magnetic Resonance Imaging.....	39
Ralf Deichmann, Ulrike Nöth, and Nikolaus Weiskopf	
1 The Basics of MR Imaging	39
1.1 Spins in an External Magnetic Field	39
1.2 The Magnetic Resonance Effect.....	40
1.3 Spatial Encoding in MR Imaging.....	40
1.4 Relaxation Times T1 and T2	43
1.5 Gradient Echoes and the Relaxation Time T2*.....	44
1.6 k-Space.....	46
1.7 Echo Planar Imaging (EPI)	47
1.8 Spin Echoes	48
1.9 The Specific Absorption Rate (SAR).....	49
2 The Cerebral Blood Flow (CBF)	50
2.1 Definition, Order of Magnitude, Measurement.....	50
2.2 Arterial Spin Labelling Measurements	52
2.3 Labelling Methods.....	53
2.4 Quantification Problems in ASL	53
3 The Cerebral Blood Volume (CBV).....	54
3.1 Definition, Order of Magnitude, Measurement.....	54
3.2 Contrast Agent-Based Methods	54
3.3 Contrast Agent-Free Method:	
Vascular Space Occupancy Measurement.....	56
4 The BOLD Effect and Functional MRI	57
4 Locally Measured Neuronal Correlates of Functional MRI Signals	63
Amir Shmuel	
1 Blood Oxygenation Level Dependent Functional MRI Signals	63
2 Synaptic Activity and Local Field Potentials;	
Spiking and Multiunit Activity	64
3 Neurophysiological Activity and fMRI Signals: Time and Space.....	65
4 Neurophysiological Activity and fMRI Signals:	
Amplitude and Reliability	66
5 The Driving Force of the Haemodynamic Response:	
Synaptic or Spiking Activity?	68
6 Neuronal Correlates of Negative Bold Responses.....	73
7 Neuronal Correlates of Spontaneous Fluctuations in fMRI Signals.....	74
8 Neurovascular Coupling	75
9 Summary	78
5 What Can fMRI Add to the ERP Story?.....	83
Christoph Mulert	
1 Introduction.....	83
2 ERP Generator Localisation	85
3 The Inverse Problem of EEG.....	85

4	Does fMRI Help to Solve the Inverse Problem?	88
5	Further Aspects	90
5.1	Serial Processing vs. Parallel and Reciprocal Network Activity	90
5.2	Subcortical Processing	90
6	Conclusions	91
6	The Added Value of EEG–fMRI in Imaging Neuroscience	97
	Rainer Goebel and Fabrizio Esposito	
1	Introduction	97
2	The EEG–fMRI Integrated Source Space	98
3	Integration Strategies for EEG–fMRI Studies	102
4	Illustration of the Integration of fMRI and EEG in the Temporal Domain ...	103
5	Illustration of the Integration of fMRI and EEG in the Spatial Domain	104
6	Discussion	108
Part II	Technical and Methodological Aspects	
	of Combined EEG–fMRI Experiments	113
7	EEG Instrumentation and Safety	115
	Philip J. Allen	
	Abbreviations	115
1	Introduction	115
2	EEG Instrumentation	116
2.1	Electrodes	116
2.2	EEG Recording System	118
2.3	RF Emissions	122
2.4	Miscellaneous Factors	123
2.5	Summary	124
3	Safety	124
3.1	Safety Limits	124
3.2	Static Field	125
3.3	Gradient Fields	125
3.4	Eddy Currents	126
3.5	RF Fields	126
3.6	Implanted Electrodes	129
3.7	Summary	130
8	EEG Quality: Origin and Reduction	
	of the EEG Cardiac-Related Artefact	135
	Stefan Debener, Cornelia Kranczioch, and Ingmar Gutberlet	
1	Introduction	135
2	Characteristics of the Pulse Artefact	136
3	Origin of the Pulse Artefact, Simulations and Modelling	139
4	Reducing the Pulse Artefact Using	
	Waveform Removal Approaches	142

5	Removing the Pulse Artefact Using Spatial Pattern Removal Approaches.....	145
6	Evaluation of Pulse Artefact Removal Approaches.....	148
7	Conclusions.....	148
9	EEG Quality: The Image Acquisition Artefact	153
	Petra Ritter, Robert Becker, Frank Freyer, and Arno Villringer	
	Abbreviations	153
1	Origin of the Image Acquisition Artefact	153
2	Characteristics of the Image Acquisition Artefact.....	154
3	Avoiding Image Acquisition Artefacts: Interleaved EEG–fMRI Protocols.....	156
4	Reduction of Image Acquisition Artefacts	158
4.1	Reduction at the Source.....	158
4.2	Synchronisation of EEG and fMRI Data Acquisitions	159
5	Correction of the Image Acquisition Artefact Using EEG Post-Processing.....	161
5.1	Artefact Template Subtraction.....	161
5.2	Computing and Correcting Timing Errors	163
5.3	Temporal Principal Component Analysis.....	163
5.4	Independent Component Analysis	165
5.5	Filtering in the Frequency Domain	166
6	Evaluation of Correction Methods.....	166
10	Image Quality Issues	173
	David Carmichael	
1	fMRI Pulse Sequences	173
2	GE-EPI.....	174
2.1	Image Blurring	174
2.2	Geometric Distortion.....	177
2.3	Signal Dropout	179
2.4	Image Ghosting	182
2.5	RF Interference.....	182
3	Other Sources of Image Artefact in fMRI	183
3.1	Bulk Head Motion.....	183
3.2	Physiological Noise.....	184
4	The Impact of EEG Recording on MR Image Quality	184
4.1	Main Static Magnetic Field (B_0) Effects	185
4.2	Transverse Rotational Magnetic Field (B_1) Effects.....	186
4.3	Impact on SNR	189
5	fMRI Quality Assurance (QA).....	190
5.1	Quantification of SNR and Temporal SNR	190
5.2	The Weisskoff Test.....	192
5.3	Coherent Noise Testing	193
6	Summary and Conclusions	194

11 Specific Issues Related to EEG–fMRI at $B_0 > 3$ T	201
Giorgio Bonmassar and Karen J. Mullinger	
1 Introduction	201
2 Safety Considerations	201
2.1 Physical Principles and Relevant Safety Guidelines	201
2.2 Safety Studies at High Fields	202
3 EEG Recording and Quality	206
3.1 Pulse-Related Artifact	208
3.2 Other Noise Sources at High Field	208
4 Image Quality	209
5 Example of an Application of EEG–fMRI at 7 T: Auditory Steady State Response (ASSR)	210
6 Conclusions	211
Appendix 1: The Multidimensional Kalman Adaptive Filtering Method	212
Appendix 2: The Open Hardware and Software Project. The High-Field One System for Real-Time EEG–fMRI	214
Main Design Features	215
12 Experimental Design and Data Analysis Strategies	221
Christian-G. Bénar, Andrew P. Bagshaw, and Louis Lemieux	
1 Introduction	221
2 Data Acquisition and Experimental Design	222
2.1 Interleaved EEG and fMRI Acquisitions: Triggered and Sparse Scanning	223
2.2 Simultaneous EEG and fMRI Acquisitions: Continuous Scanning	225
2.3 Experimental Protocol	225
3 Analysis of Simultaneously Acquired EEG–fMRI Data	227
3.1 Model-Based Analysis of fMRI Time-Series Data	228
3.2 EEG-Derived GLM: Use of Event Onsets and Illustration in Epilepsy	232
3.3 EEG-Derived GLM: Parametric Design and Single Trial	235
3.4 EEG-Derived GLM: EEG Spectrum	236
3.5 Multivariate Analysis	239
4 EEG and fMRI Localisation: Modes of Integration	239
4.1 Comparison of Independently Derived Results	240
4.2 fMRI as a Spatial Constraint for EEG Source Reconstruction	240
4.3 Towards Symmetrical Models of EEG and fMRI Fusion	242
5 Unresolved Problems and Caveats	242
5.1 Relationship Between Neuronal Activity, EEG and fMRI Signals	243
5.2 Specific Issues Related to Spontaneous Brain Activity	244
5.3 The Impact of Data Acquisition and Processing Artefacts on fMRI Data Analysis	245
6 Summary and Outlook	247

Part III Applications of EEG–fMRI	259
Resting State	261
13 Brain Rhythms	263
Helmut Laufs	
1 Considerations for the Study of Rest	263
1.1 Why Study the Resting State?	263
2 A Multimodal Approach to the Resting State	264
2.1 From Unimodal to Multimodal Studies of Rest	265
2.2 Endogenous Brain Oscillations in Healthy Subjects	266
2.3 Similar Electrical Oscillations, Different fMRI Networks	267
2.4 Similar fMRI Networks, Different Electrical Oscillations	269
2.5 Brain Oscillations and Networks During Sleep	270
2.6 Endogenous Brain Oscillations in Patients with Epilepsy	271
3 Linking Neuronal Oscillations to Haemodynamic Changes	271
4 Conclusion	272
14 Sleep	279
Michael Czisch and Renate Wehrle	
Abbreviations	279
1 fMRI in Sleep Research	279
1.1 Sleep	279
1.2 Imaging Sleep	282
1.3 EEG and fMRI in Sleep Research	283
2 fMRI During Sleep: Technical Challenges	285
2.1 General Issues with Sleep fMRI	286
2.2 More Specific Issues with Sleep fMRI	288
2.3 Possible Solutions	290
3 fMRI in Sleep: Results	291
3.1 Spontaneous Sleep	291
3.2 Sensory Processing During Sleep	296
3.3 Animal Data	300
4 Summary and Outlook	301
Epilepsy	307
15 EEG–fMRI in Adults with Focal Epilepsy	309
Matthew C. Walker, Umair J. Chaudhary, and Louis Lemieux	
1 Introduction	309
2 Interictal EEG–fMRI	310
2.1 What Is an Interictal Spike?	310
2.2 Interictal Epileptiform Activity in Presurgical Assessment	311
2.3 Methodology	313

2.4	Relevance of the Observed BOLD Changes	316
2.5	Clinical Utility	318
2.6	The Influence of Lesions	320
3	Ictal EEG–fMRI	321
3.1	Limitations of Ictal EEG–fMRI	322
3.2	Detection of Ictal Activity	324
3.3	General Linear Model Building	325
3.4	Application of Ictal EEG–fMRI	325
4	Conclusions	326
16	EEG–fMRI in Idiopathic Generalised Epilepsy (Adults)	333
	Patrick Carney and Graeme Jackson	
1	Idiopathic Generalised Epilepsy	333
1.1	Definition and Classification	333
1.2	The EEG in Idiopathic Generalised Epilepsy	334
2	Mechanisms of Generalised Spike and Wave in Idiopathic Generalised Epilepsy	334
3	EEG–fMRI in Human IGE	335
3.1	Early EEG–fMRI Studies	335
3.2	Overview of EEG–fMRI Data	336
4	Structures and Networks: Future Directions for EEG–fMRI in IGE	344
5	Conclusion	345
17	EEG–fMRI in Children with Epilepsy	349
	Michael Siniatchkin and Francois Dubeau	
	Abbreviations	349
1	EEG–fMRI in Children with Epilepsy	349
2	Methodological Issues Specific to Paediatric EEG–fMRI Studies	350
2.1	Patient Selection and Scanning	350
2.2	Modelling IED-Related BOLD Changes in Children: Variability and Developmental Changes	350
3	Results of EEG–fMRI Studies in Paediatric Epilepsy	351
3.1	Idiopathic Focal Epilepsies	351
3.2	Symptomatic and Cryptogenic Focal Epilepsies	353
3.3	Epileptic Encephalopathies	357
3.4	Idiopathic Generalised Epilepsies	358
	Activation Studies	363
18	Combining EEG and fMRI in Pain Research	365
	G.D. Iannetti and A. Mouraux	
1	Introduction	365
2	Combining EEG and fMRI in Pain Research: General Issues	367
3	Combining EEG and fMRI in Pain Research: Practical Issues	370

3.1	Selectivity of the Nociceptive Input in EEG–fMRI Studies	370
3.2	Delivery of Nociceptive Stimuli in the EEG–fMRI Environment	371
3.3	Experimental Design	372
4	Studies Combining EEG and fMRI in Pain Research	373
5	Future Directions: EEG-Driven Analysis of fMRI BOLD Responses to Nociceptive Stimulation	375
5.1	Single-Trial Estimation of the Magnitude of Stimulus-Evoked EEG Responses	376
5.2	Correlation Between EEG and fMRI Responses at Single-Trial Level	377
19	Simultaneous EEG and fMRI of the Human	
	Auditory System	385
	Christoph S. Herrmann, Andre Brechmann, and Henning Scheich	
1	Introduction.....	385
2	Specifics of Auditory Recordings	386
2.1	Interference of the Static Magnetic Field	386
2.2	Interference of Transient Magnetic Fields	387
2.3	BOLD Response to Scanner Noise	387
2.4	Sparse Sampling.....	388
2.5	Silent fMRI Acquisition	389
2.6	Adjusting Auditory Stimulus Frequencies	389
3	Simultaneous EEG and fMRI in Auditory Experiments.....	391
4	Low-Noise fMRI Sequences for Simultaneous Experiments	392
5	Conclusions.....	395
20	Visual System	401
	Robert Becker, Petra Ritter, and Arno Villringer	
1	Simultaneous EEG–fMRI of the Visual System: Signal Quality	401
2	fMRI-Informed EEG of the Visual System	402
2.1	Localising Visual Evoked Potentials.....	403
2.2	Visual Attention and Other Cognitive Processes	404
3	EEG-Informed fMRI of the Visual System	406
3.1	Spontaneous EEG Oscillations.....	407
3.2	Task-Related EEG Activity	409
4	Uninformed EEG–fMRI and Other Approaches	410
4.1	Event-Related Oscillations.....	410
4.2	Visual Attention and Other Cognitive Processes	410
5	Investigating Neurovascular Coupling in the Visual System by EEG–fMRI	411
6	Outlook	413

21 Cognition	419
Susanne Karch and Christoph Mulert	
1 Advantages and Disadvantages of Simultaneous EEG–fMRI Recordings of Cognitive Functions.....	419
2 Cognitive Functions	420
2.1 Attention.....	420
2.2 Executive Functions	428
2.3 Memory	438
3 Limitations and Outlook	439
Special Topics	451
22 Neuronal Models for EEG–fMRI Integration	453
James M. Kilner and Karl J. Friston	
1 EEG and fMRI Integration.....	453
2 Neuronal Model of EEG–fMRI Integration.....	454
2.1 Dimensional Analysis	454
2.2 Modelling Activations.....	456
2.3 Effect of Neuronal Activation on BOLD	457
2.4 Effect of Neuronal Activation on EEG	457
3 Empirical Evidence for the Model.....	459
4 Summary	462
23 BOLD Response and EEG Gamma Oscillations	465
Gregor Leicht, Christoph S. Herrmann, and Christoph Mulert	
1 Introduction.....	465
2 Methodical Issues.....	466
3 Gamma Activity and BOLD Response.....	468
3.1 Co-variation of High-Frequency Oscillations and the BOLD Signal	468
3.2 Gamma Activity and BOLD Response: Variation Across Subjects.....	472
3.3 Gamma Activity and BOLD Response: Further Reports.....	474
3.4 Outlook: Single-Trial Coupling of Gamma Activity and BOLD Response	477
4 Conclusions.....	477
24 EEG–fMRI in Animal Models	485
Damien J. Ellens and Hal Blumenfeld	
1 Introduction.....	485

2	Advantages of EEG–fMRI in Animal Models.....	487
3	Limitations and Technical Challenges of EEG–fMRI in Animal Models	488
4	Anaesthesia	488
5	Movement: Curarisation and Habituation.....	490
6	Physiology.....	490
7	MR-Compatible Electrodes	491
8	EEG Artefacts and Artefact Removal.....	492
9	Data Analysis.....	492
10	Applications of Simultaneous EEG–fMRI in Animals.....	498
11	Epilepsy.....	499
12	Absence Seizure Models.....	499
13	Generalised Tonic-Clonic Seizure Models	500
14	Partial Seizure Models	500
15	Sleep.....	501
16	Sensorimotor Stimulation Models	502
17	The Electrophysiological Substrates of the BOLD Effect: Simultaneous Microelectrode EEG Recordings and fMRI.....	502
18	Future Directions	503
19	Conclusions.....	504
25	EEG–fMRI Information Fusion: Biophysics and Data Analysis.....	511
	Jean Daunizeau, Helmut Laufs, and Karl J. Friston	
1	Introduction.....	511
2	EEG–fMRI Information Fusion: Limitations	512
2.1	Neurovascular Coupling and Decoupling	512
2.2	Experimental Limitations.....	513
3	EEG–fMRI Information Fusion: Solutions.....	514
3.1	Information Fusion: Definition.....	514
3.2	Asymmetrical vs. Symmetrical Approaches	515
3.3	EEG to fMRI Approaches	516
3.4	fMRI to EEG Approaches	517
3.5	Towards Symmetrical EEG–fMRI Approaches	518
4	Conclusion	522
	Outlook	527
	Index	529
