

[From Brownian Motion to Schrödinger's Equation](#)

Bearbeitet von
Kai L Chung, Zhongxin Zhao

überarbeitet 2001. Buch. xii, 292 S. Hardcover

ISBN 978 3 540 57030 1

Format (B x L): 15,5 x 23,5 cm

Gewicht: 643 g

[Weitere Fachgebiete > Mathematik > Mathematische Analysis > Funktionalanalysis](#)

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Table of Contents

1. Preparatory Material	1
1.1 Basic Notation	1
1.2 Markov Process and Strong Markov Property	3
1.3 Construction of Brownian Motion	9
1.4 Harmonic Function and Poisson Kernel	13
1.5 Exit Time and Place	19
1.6 Dirichlet Boundary Value Problem	23
Appendix to Chapter 1	27
Notes on Chapter 1	28
2. Killed Brownian Motion	31
2.1 Feller Properties	31
2.2 Transition Density	33
2.3 Green Potential and Function	37
2.4 Compactness and Spectrum	46
2.5 Laplacian as Generator	48
Notes on Chapter 2	59
3. Schrödinger Operator	61
3.1 The Schrödinger Equation and Class J	61
3.2 Semigroup with Multiplicative Functional	71
3.3 Potential Operator and its Inverse	81
3.4 Schrödinger Infinitesimal Generator	88
Notes on Chapter 3	101
4. Stopped Feynman–Kac Functional	103
4.1 Harnack Inequality and Gauge Theorem	103
4.2 Properties of $G_D q$	107
4.3 Fundamental Properties of the Gauge	112
4.4 Dirichlet Boundary Value Problem for the Schrödinger Equation	114
4.5 Representation Theorem	117
4.6 Equivalence Theorem for Gaugeability	124
Notes on Chapter 4	128

5. Conditional Brownian Motion and Conditional Gauge	131
5.1 Conditional Brownian Motion	131
5.2 Life in a Lipschitz Domain	135
5.3 Conditional Gauge for a Small Ball	144
5.4 General Gauge Theorem	149
5.5 Continuity of Weak Solutions	152
5.6 New Approach to the Gauge Theorem	155
Notes on Chapter 5	157
6. Green Functions	159
6.1 Basic Properties of the q -Green Function	159
6.2 Inequalities for Green Functions in a Lipschitz Domain in $\mathbb{R}^d$ ($d \geq 3$)	163
6.3 Inequalities for Green Functions in a Jordan Domain in $\mathbb{R}^2$	175
Notes on Chapter 6	190
7. Conditional Gauge and q-Green Function	191
7.1 Conditional Gauge Theorem	191
7.2 Approximation and Continuity of the Conditional Gauge	197
7.3 Extended Conditional Gauge Theorem	200
7.4 Representation of the Conditional Gauge	207
Notes on Chapter 7	213
8. Various Related Developments	215
8.1 Variation of Gauge	215
8.2 Variation of the Principal Eigenvalue	220
8.3 Principal Eigenfunction and Sharp Variation	224
8.4 Boundary Harnack Principle and Application	230
8.5 Schrödinger Equation in the Classical Setting	234
8.6 Dirichlet Problem and Truncated Gauge	236
Notes on Chapter 8	239
9. The Case of One Dimension	241
9.1 Fundamental Expectations	241
9.2 Gauge for a Finite or Infinite Interval	248
9.3 Special Cases and Examples	262
9.4 Local Time and Density	270
9.5 Derivatives and Neumann's Problem	274
Notes on Chapter 9	278
References	281
Index	285
