

Handbook of Slope Stabilisation

Bearbeitet von
J. A. R Ortigao, Alberto Sayao

1. Auflage 2004. Buch. xx, 483 S. Hardcover

ISBN 978 3 540 41646 3

Format (B x L): 15,5 x 23,5 cm

Gewicht: 1004 g

Weitere Fachgebiete > Geologie, Geographie, Klima, Umwelt > Geologie und
Nachbarwissenschaften > Geotechnik

schnell und portofrei erhältlich bei

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

1	Introduction	1
	J. A. R. Ortigao and A. S. J. Sayao	
	Text Organisation	2
2	Geological Factors in Slope Stability	5
	M. A. Kanji	
	Introduction	5
	Basic Rock Mass Structure Inherited from Its Genesis	6
	Intrusive Igneous Rocks	6
	Volcanic Rocks	7
	Sedimentary Rocks	9
	Metamorphic Rocks	12
	Weathering Products	13
	Significant Geologic Features	15
	Geology and the Mode of Failure of a Slope	19
	Planar or Two-Dimensional Failure Mode	19
	Wedge or Three-Dimensional Analysis	22
	Final Remarks	24
	References	25
3	Landslide Classification and Risk Management	27
	J. A. R. Ortigao and M. A. Kanji	
	Introduction	27
	Landslide Classification	27
	Fall	27
	Topple	29
	Slides	30

Flow	32
Rate of Movements	34
Additional Classifications	34
Landslide Triggering Mechanisms	35
Creep	35
<i>El Turi Landslide</i>	35
<i>Puriscal Landslide</i>	41
A Slope Tale of Two Cities	43
The Laranjeiras Slide and the GeoRio	46
The Po Shan Slide and the GEO	50
Debris Flow	52
Factors Influencing Debris Flows	52
<i>Morphology</i>	52
<i>Rainfall</i>	54
Susceptibility of Debris Flows	55
Large Debris Flow, Venezuela, 1999	56
Landslide Description	59
Field Inspection	59
Risk Mapping	63
References	66
4 Site Investigation	67
J. A. R. Ortigao, A. S. J. Sayao and M. A. Kanji	
Introduction	67
Preliminary Site Investigation	68
Landslip Investigation	69
Preliminary Surveying	69
Auger Boreholes	69
Trial Pits and Trenches	70
Detailed Investigations	70
Topographic Survey	70
Geophysical Methods	70
<i>Seismic Method</i>	70
<i>Earth Resistivity</i>	71
Direct Methods or Boreholes	72
<i>Soundings</i>	72
<i>Percussion Drilling</i>	72
<i>Rotary Drilling</i>	72
<i>Measurement of Drilling Parameters</i>	74
<i>Measurement of Core Orientation</i>	75

<i>Mixed Method</i>	75
<i>Borehole Logs</i>	75
<i>Block Sampling</i>	77
In Situ Tests	78
Laboratory Testing	78
Characterisation Tests	78
Shear Strength Tests	78
Typical Strength Parameters for Residual Soils	
from Rio de Janeiro	81
Example of Planning Detailed Site Investigation	81
Example of the Soberbo Slide	84
References	87
5 Soil Slope Stability	89
A. S. F. J. Sayao	
Introduction	89
Scope of Stability Analyses	89
Why Landslides Occur?	89
Types of Stability Analyses	90
Factor of Safety Definition	90
Analysis Techniques	92
Deterministic Methods	92
<i>Limit Equilibrium</i>	92
<i>Stability Charts</i>	94
Example	97
Infinite Slope	104
Stress-Strain Analysis	106
Probabilistic Methods	106
Slope Stability Analyses	106
Modes of Failure	106
Input Data	106
Choice of Method of Analysis	107
Software	107
References	108

6 Rock Slope Stability	109
J. A. R. Ortigao	
Introduction	109
Failure Mechanisms	109
Graphic Representation of Joints	109
Shear Strength of Rock Joints	114
Shear Strength of Plane Rock Discontinuities	116
Barton Failure Criterion	118
Estimating JRC	119
JCS Evaluation	119
Correction to JRC and JCS Due to Scale Effects	119
Strength of Filled Joints	123
Effect of Pore pressures	124
Equivalent Mohr-Coulomb Strength Parameters	124
Backanalysis of Failures	124
Stability Analysis	124
Planar Failure	124
<i>Example</i>	127
Three-Dimensional Wedge Failure	127
Toppling Failure	129
<i>Rockfall</i>	131
References	135
 7 Selection of Stabilisation Design	137
J. A. R. Ortigao	
Introduction	137
Soil Slopes	137
Slopes with a Rock to Soil Interface	141
Rock Slopes and Rockfall	142
Summary of Stabilisation Methods and Remedial Measures	143
 8 Drainage and Surface Protection	147
D. Gerscovich and H. Costa	
Introduction	147
Hydrological Cycle	147
Surface Drainage	150
Hydraulic Design	153
Maximum Discharge	153

<i>Catchment Area</i>	154
<i>Average Rainfall Intensity</i>	154
<i>Runoff Coefficient</i>	156
<i>Admissible Flow Velocity</i>	157
<i>Flow Regime</i>	157
<i>Flow Velocity</i>	159
<i>Calculation Procedure</i>	159
<i>Freeboard</i>	161
<i>Example of Hydraulic Design</i>	163
<i>Design of Surface Drainage Systems</i>	165
<i>General Considerations</i>	165
<i>Drainage Devices</i>	167
<i>Slope Ditches</i>	168
<i>Downslope Channels, Stepped Channels</i>	170
<i>Catchpits</i>	171
<i>Dumping Basins</i>	174
Subsurface Drainage	175
<i>Horizontal Drains</i>	176
<i>Cut-off Drains</i>	180
<i>Granular Filters and Drains</i>	181
<i>Geosynthetics</i>	182
<i>Drainage Trenches</i>	186
<i>Drain Blanket</i>	186
<i>Relief Wells</i>	188
<i>Retaining Wall Drainage Systems</i>	188
<i>Drainage of Very Large Slopes</i>	194
Maintenance Works	194
Surface Protection	195
<i>Vegetation</i>	198
<i>Grass</i>	198
<i>Trees and Shrubs</i>	199
<i>Geomembranes</i>	199
<i>Impermeable Surface</i>	201
<i>Soil-Cement-Lime Mixture (Chunam)</i>	203
<i>Sprayed Concrete (Shotcrete)</i>	204
<i>Blocks</i>	204
Debris-Flow Protection Works	204
<i>Works for Restricting the Occurrence of Debris Flows</i>	205
<i>Slope Supporting Dams and Stepped Check Dams</i>	205
<i>Debris-Flow Capturing Works or Sabo Dams</i>	206
<i>Sediment Control Dams and Reservoirs or Debris-Flow Depositing Works</i>	207

Downstream Control-works	207
Diverting and Deflecting Works	209
Example	209
References	209
 9 Retaining Walls	 213
A. S. F. J. Sayao	
 Introduction	 213
Earth Pressures	213
Active and Passive States	214
Rankine Method	216
Coulomb's Theory	217
Groundwater Effect	223
Stability of Walls	223
Global or Generalised Stability	224
Slipping at the Base of a Wall	225
Check for Overturning	225
Check on the Bearing Capacity	227
Reinforced Concrete Walls	228
L-Shaped Walls	229
Walls with Ground Anchors at the Base	229
Rock Dowelled Concrete Walls	230
Gravity Walls	232
Masonry Walls	232
Unreinforced Concrete Walls	233
Gabion Walls	233
Scrap Tyre Wall	236
Cement Bags for Slope Failure Rehabilitation	237
Reinforced Earth Walls	240
References	241
 10 Geosynthetic Reinforced Walls and Slopes	 243
E. M. Palmeira	
 Introduction	 243
Geosynthetic Relevant Properties	246
Introduction	246
Design Parameters	250
<i>Soil-Related Parameters</i>	<i>250</i>

<i>Geosynthetic Mechanical Properties</i>	251
Design of Geosynthetic Reinforced Walls	254
Stability Conditions for Geosynthetic Reinforced Walls	254
External Stability	254
<i>Sliding of the Reinforced Mass Along Its Base</i>	256
<i>Stability Against Wall Overturning</i>	257
<i>Vertical Stress Distribution on the Wall Base and Foundation</i>	
<i>Soil-Bearing Capacity</i>	258
Overall Stability	260
Internal Stability Analysis	260
<i>Reinforcement Spacing</i>	261
<i>Reinforcement Anchorage Length</i>	264
<i>Localised Surcharge and Compaction</i>	269
Horizontal Displacements of the Wall Face	272
Other Design Approaches	277
Geosynthetic-Reinforced Steep Slopes	278
Earth Pressure Calculation	278
Design Charts by Jewell (1989)	279
Vertical Stresses on the Slope Base and Foundation Soil Bearing	
Capacity	284
Overall Stability	286
Construction of Geosynthetic Reinforced Walls	
and Steep Slopes	286
Facing of the Structure	286
Drainage Systems	295
Handling and Storage of the Geosynthetics	297
Worked Example	297
Soils	298
Foundation Soil (Design Values)	298
Reinforcement	298
External Stability	299
<i>Earth Thrust and Active Stresses Along the Rear Face</i>	
<i>of the Wall</i>	299
<i>Sliding Along the Base</i>	299
<i>Wall Overturning</i>	300
<i>Distribution of Vertical Stresses on the Wall Base and Foundation</i>	
<i>Soil-Bearing Capacity</i>	300
Internal Stability	302
<i>Reinforcement Design Properties</i>	302
<i>Reinforcement Spacing</i>	302
<i>Reinforcement Anchorage Length</i>	304
<i>Reinforcement Anchorage at the Wall Face</i>	305

Evaluation of Expected Maximum Wall Face Horizontal Displacement	306
References	309

11 Anchors, Bolts and Nails 311

J. A. R. Ortigao and H. Brito

Introduction	311
Anchors	311
Recommended Anchor Characteristics	311
Materials	314
Grout	314
Grease	315
Plastics	315
Strain Compatibility of the Bonded Length Protection	315
Anchor, Bolts and Nail Types	317
Test and Working Loads	317
Installation	318
Drilling	318
Grouting	319
Pull-out Capacity of the Bonded Length	319
Soil Anchors	319
Rock Anchors	321
Anchor Load Tests	321
Definitions	321
Pull-out Tests	322
Load Application	323
<i>Test Set-up</i>	323
<i>Criterion for Starting the Tension Load Test</i>	323
<i>Safety Criterion</i>	323
Load Measurement	323
Displacement Measurements	324
Interpretation of the Results	324
Acceptance Criteria	325
Results Interpretation	325
Interpretation of Pull-out Test on Nails	325
Bolts and Nails	327
Corrosion Protection	327
Final Protection to the Anchor Head	328
References	329

12 Tieback Walls	331
J. A. R. Ortigao and H. Brito	
Introduction	331
Stability Analysis	334
Stability Analysis Methodology	337
Wedge Method	337
Pre-design Charts	339
Stability Analysis of Complex Cases	343
Anchor Spacing	344
Error in Plane Strain Assumption	344
Tieback Walls Supported by Micropiles	345
Worked Example of Tieback Wall Design	345
Stresses and Deformation Analysis	350
References	352
13 Soil Nailing	355
J. A. R. Ortigao and E. M. Palmeira	
Introduction	355
Origin	355
Experience in Residual and Saprolitic Soils	356
Construction Methods and Soil Nailing Application	356
Installation of Nails	357
Nail Head Details	359
The Slope Facing	359
Comparison with Tieback Walls	361
Comparison with Reinforced Walls	363
Advantages of Soil Nailing	364
Limitations of Soil Nailing	365
Examples of Soil Nailing	365
35-m-High Wall at Icaraí Beach, Niterói, RJ	365
Slope Stabilisation in Phyllite at the Abutment of a Railway Bridge	366
Retrofitting of Slopes in Hong Kong	367
Analysis of Soil Nailed Structures	367
Soil-nail Interaction	372
Limit Equilibrium and the Effect of Nails	373
Computer Programs	374
Design Optimisation	377
Analysis of Mixed Soil Nailed Structures	379
Stability Charts	381

Deformation Analysis	381
Stability Analysis Through FEM	385
References	386
 14 Stabilisation of Rock Slopes	 389
J. A. R. Ortigao and H. Brito	
Introduction	389
Techniques to Prevent Block Move-out	390
Risk Reduction Measures	398
Protective Wire Mesh	400
Flexible Barriers	400
Design of Anchors and Bolts for Rock Block Stabilisation	406
Design of Bolts as Dowels	408
Design of Bolts for Tension and Shear	409
Design Charts	411
Example	412
References	412
 15 Shotcrete	 413
M. Carnio and J. A. R. Ortigao	
Introduction	413
Shotcrete Reinforcement	415
Performance of SFRS (Steel Fibre Reinforced Shotcrete)	417
Definitions and Composite Materials	417
Fibres as Reinforcement Elements	418
Toughness	418
Equivalent Strength	419
Toughness Ratio	419
Design with SFRS	419
Stress Distribution in the Cross Section	420
Example	421
Fibre Type Selection	421
Example	422
Concrete Characteristics	422
Equivalent Strengths	422
Fibre Rebound	423
