Preface	v
Contributors	xi
PART I. BIOINFORMATICS.....	1
1 Bioinformatics of Nuclear Receptors Mark Danielsen	3
2 Phylogenetic Inference and Parsimony Analysis Llewellyn D. Densmore III	23
PART II. PURIFICATION PROTOCOLS	37
3 Expression and Purification of Recombinant Human Progesterone Receptor in Baculovirus and Bacterial Systems Vida Senkus Melvin and Dean P. Edwards	39
4 High-Yield Purification of Functionally Active Glucocorticoid Receptor Terace M. Fletcher, Barbour S. Warren, Christopher T. Baumann, and Gordon L. Hager	55
5 Production and Purification of Histidine-Tagged Dihydrotestosterone- Bound Full-Length Human Androgen Receptor Mingmin Liao and Elizabeth M. Wilson	67
6 Large Scale Production of Nuclear Receptor Ligand-Binding Domains Li-Zhi Mi and Fraydoon Rastinejad	81
7 Physical Structure of Nuclear Receptor–DNA Complexes Scott A. Chasse and Fraydoon Rastinejad	91
8 Isolation of Steroid-Regulated Genes from the Uterus by mRNA Differential Display Sushma Kumar, Maarit Angervo, Milan K. Bagchi, and Indrani C. Bagchi	105
9 Identification of Nuclear Hormone Receptor Homologs by Screening Libraries with Highly Degenerate Oligonucleotide Probes Bruce Blumberg	119
PART III. STEROID HORMONE-BINDING ASSAYS	131
10 Use of [^{99m} Tc] Technetium-Labeled Steroids as Probes for Steroid Hormone Receptors Frank Wüst	133

11	Steroid Hormone Metabolites and Hormone Binding Assays Rosemary Bland and Martin Hewison	145
12	Vitamin D ₃ Analog Screening Sami Väisänen, Sanna Ryhänen, and Pekka H. Mäenpää	163
PART IV. PROTEIN INTERACTION ASSAYS		177
13	Application of Green Fluorescent Protein to the Study of Dynamic Protein–Protein Interactions and Subcellular Trafficking of Steroid Receptors Steven K. Nordeen, Paul R. Housley, Yihong Wan, and Richard N. Day	179
14	Knockout Mice and Steroid Receptor Research Per Flodby, Stephan Teglund, and Jan-Åke Gustafsson	201
15	Yeast Two-Hybrid Screening for Proteins that Interact with Nuclear Hormone Receptors Bertrand Le Douarin, David M. Heery, Claudine Gaudon, Elmar vom Baur, and Régine Losson	227
16	Isolation of a p300/CBP Cointegrator-Associated Protein Coactivator Complex Rabindra N. Bhattacharjee, Caroline Underhill, and Joseph Torchia	249
17	Nonradioactive Photoaffinity Labeling of Steroid Receptors Using Western Blot Detection System Simon J. Evans and Frank L. Moore	261
18	Analysis of Steroid Hormone-Induced Histone Acetylation by Chromatin Immunoprecipitation Assay James R. Lambert and Steven K. Nordeen	273
19	Analyzing the Contributions of Chromatin Structure in Nuclear Hormone Receptor Activated Transcription In Vivo Christy J. Fryer and Trevor K. Archer	283
20	Cotransfection Assays and Steroid Receptor Biology Shimin Zhang and Mark Danielsen	297
21	Estrogen Receptor mRNA <i>In Situ</i> Hybridization Using Microprobe System Hironobu Sasano, Sachiko Matsuzaki, and Takashi Suzuki	317
PART V. CANCER RESEARCH AND DRUG DISCOVERY		327
22	Solid Tumor Cancer Markers and Applications to Steroid Hormone Research Marcia V. Fournier, Katherine J. Martin, and Arthur B. Pardee	329

23	Assessing Modulation of Estrogenic Activity of Environmental and Pharmaceutical Compounds Using MCF-7 Focus Assay Kathleen F. Arcaro and John F. Gierthy	341
24	Combinatorial Chemistry in Steroid Receptor Drug Discovery John A. Flygare, Daniel P. Sutherlin, and S. David Brown	353
25	Identification of Nuclear Receptor Interacting Proteins Using Yeast Two-Hybrid Technology: <i>Applications to Drug Discovery</i> Sunil Nagpal, Corine R. Ghosn, and Roshantha A.S. Chandraratna	359
	Index	377
