

Biologically Inspired Algorithms for Financial Modelling

Bearbeitet von
Anthony Brabazon, Michael O'Neill

1. Auflage 2005. Buch. xv, 277 S. Hardcover
ISBN 978 3 540 26252 7
Format (B x L): 15,5 x 23,5 cm
Gewicht: 1310 g

Wirtschaft > Betriebswirtschaft: Theorie & Allgemeines > Wirtschaftsmathematik und -

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beack-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

1	Introduction	1
1.1	Biologically Inspired Algorithms	2
1.1.1	Artificial Neural Networks	2
1.1.2	Evolutionary Computation	2
1.1.3	Social Systems	4
1.1.4	Artificial Immune Systems	4
1.2	Computer Trading on Financial Markets	4
1.3	Challenges in the Modelling of Financial Markets	5
1.3.1	Do Prices Follow a Random Walk?	6
1.3.2	Attack of the Anomalies	7
1.4	Linear Models	8
1.5	Structure of the Book	10

Part I Methodologies

2	Neural Network Methodologies	15
2.1	A Taxonomy of NNs	15
2.2	The Multi Layer Perceptron	16
2.2.1	Training an MLP	20
2.2.2	Practical Issues in Training MLPs	23
2.2.3	Recurrent Networks	28
2.3	Radial Basis Function Networks	29
2.4	Self-organising Maps	32
2.4.1	Implementing a SOM	33
2.5	Summary	35
3	Evolutionary Methodologies	37
3.1	Genetic Algorithm	37
3.1.1	Canonical GA	40
3.1.2	Example of the GA	41

3.1.3	Extending the Canonical GA	43
3.1.4	Schema and Building Blocks	48
3.2	Differential Evolution	49
3.2.1	DE Algorithm	49
3.3	Genetic Programming	54
3.3.1	More Complex GP Architectures	58
3.4	Combining EA and MLP Methodologies	63
3.5	Applying EAs to Evolve Trading Rules	68
3.6	Recent Developments in Evolutionary Computation	70
3.7	Summary	71
4	Grammatical Evolution	73
4.1	Grammatical Evolution	73
4.1.1	Biological Analogy	74
4.1.2	Mapping Process	76
4.1.3	Mapping Example	79
4.2	Mutation and Crossover in GE	82
4.3	Recent Developments in GE	84
4.3.1	Search Engine	84
4.3.2	Meta-grammars	85
4.3.3	π GE	87
4.3.4	Applications and Alternative Grammars	87
4.4	Summary	88
5	The Particle Swarm Model	89
5.1	PSO Algorithm	89
5.1.1	Constriction Coefficient Version of PSO	92
5.1.2	Parameter Settings for PSO	93
5.2	Discrete PSO	94
5.3	Comparing PSO and the GA	94
5.4	MLP-Swarm Hybrids	95
5.5	Grammatical Swarm	95
5.6	Example of a Financial Application of PSO	96
5.7	Recent Developments in PSO	96
5.8	Summary	97
6	Ant Colony Models	99
6.1	Ant-Foraging Models	99
6.1.1	Ant-Foraging Algorithm	100
6.2	A Financial Application of ACO	104
6.3	Ant-Inspired Classification Algorithms	105
6.4	Hybrid Ant Models	105
6.5	Summary	106

7	Artificial Immune Systems	107
7.1	Overview of Natural Immune Systems	108
7.1.1	Innate vs Adaptive Immunity	108
7.1.2	Components of the Immune System	108
7.2	Designing Artificial Immune Algorithms	113
7.2.1	Negative Selection Algorithm	113
7.2.2	Clonal Expansion and Selection Algorithm	114
7.3	Financial Application of the Negative Selection Algorithm	116
7.4	Summary	118

Part II Model Development

8	Model Development Process	121
8.1	Project Goals	121
8.1.1	What to Forecast?	121
8.1.2	What Performance Measure Is Appropriate?	123
8.2	Data Collection	124
8.2.1	Trading Philosophy	124
8.2.2	How Much Data Is Enough?	128
8.3	Selecting and Preprocessing the Data	130
8.3.1	Selection	130
8.3.2	Preprocessing	130
8.4	Postprocessing the Output	134
8.4.1	Entry Strategy	134
8.4.2	Exit Strategy	134
8.4.3	Money Management	135
8.5	Validating the System	135
8.6	Implementation and Maintenance	140
8.7	Summary	142
9	Technical Analysis	143
9.1	Technical Indicators	144
9.1.1	Moving Average	146
9.1.2	Momentum	148
9.1.3	Breakout	149
9.1.4	Stochastic Oscillators	150
9.1.5	Volume Data	152
9.1.6	Other Indicators	153
9.2	Using Technical Indicators in a Trading System	154
9.3	Summary	155

Part III Case Studies

10 Overview of Case Studies	159
11 Index Prediction Using MLPs	161
11.1 Methodology	162
11.1.1 Model Selection	166
11.1.2 Model Stacking	167
11.2 Results	169
11.2.1 RMSE and Correlation	169
11.2.2 Trading System	171
11.3 Discussion	172
12 Index Prediction Using a MLP-GA Hybrid	175
12.1 Methodology	175
12.1.1 Model Construction	176
12.2 Results	178
12.2.1 MLP-GA	179
12.2.2 Analysis of Weight Vectors	180
12.3 Discussion	182
13 Index Trading Using Grammatical Evolution	183
13.1 Methodology	183
13.1.1 GE System Setup	188
13.2 Results	189
13.3 Discussion	190
14 Adaptive Trading Using Grammatical Evolution	193
14.1 Introduction	193
14.2 Methodology	193
14.2.1 Moving Window	194
14.2.2 Variable Position Trading	194
14.2.3 Return Calculation	195
14.3 Results	196
14.3.1 Training Returns	197
14.3.2 Out-of-Sample Returns	199
14.4 Discussion	201
15 Intra-day Trading Using Grammatical Evolution	203
15.1 Background	203
15.2 Methodology	204
15.2.1 Trading System	206
15.2.2 GE System Setup	207
15.3 Results	208
15.4 Discussion	210

16	Automatic Generation of Foreign Exchange Trading Rules	211
16.1	Background	211
16.2	Methodology	212
16.3	Results	214
16.3.1	US-STG	216
16.3.2	US-Yen	217
16.3.3	US-DM	217
16.4	Discussion	218
17	Corporate Failure Prediction Using Grammatical Evolution	219
17.1	Background	220
17.1.1	Definition of Corporate Failure	220
17.1.2	Explanatory Variables	221
17.2	Methodology	222
17.2.1	GE System Setup	223
17.2.2	LDA Method	224
17.3	Results	224
17.3.1	Form of the Evolved Classifiers	225
17.4	Discussion	226
18	Corporate Failure Prediction Using an Ant Model	229
18.1	Background	229
18.2	Methodology	230
18.2.1	Ant System	231
18.3	Results	235
18.4	Discussion	238
19	Bond Rating Using Grammatical Evolution	239
19.1	Background	240
19.1.1	Rating Process	240
19.2	Methodology	241
19.3	Results	243
19.4	Discussion	247
20	Bond Rating Using AIS	249
20.1	Methodology	249
20.2	Results	252
20.3	Discussion	252
21	Wrap-up	255
	References	257
	Index	271
