

Rationale Management in Software Engineering

Bearbeitet von
Allen H Dutoit, Raymond McCall, Ivan Mistrik, Barbara Paech

1. Auflage 2006. Buch. xxii, 434 S. Hardcover

ISBN 978 3 540 30997 0

Format (B x L): 15,5 x 23,5 cm

Gewicht: 1433 g

Weitere Fachgebiete > EDV, Informatik > Hardwaretechnische Grundlagen >
Systemverwaltung & Management

schnell und portofrei erhältlich bei

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beack-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

Foreword	VII
<i>John M. Carroll</i>	
Preface	IX
Contributors	XIX
1. Rationale Management in Software Engineering: Concepts and Techniques	1
<i>A.H. Dutoit, R. McCall, I. Mistrík, B. Paech</i>	
1.1. Introduction	1
1.2. Design Rationale Fundamentals.....	3
1.3. Approaches to Design Rationale	7
1.4. Uses of DR and DR methods	16
1.5. Limitations of Current DR Approaches and Software	20
1.6. Rationale Management in Software Engineering.....	24
1.7. Tool Support for Rationale Management.....	35
1.8. Conclusion.....	43
Part 1 Fundamentals – Rationale Representation, Capture and Use	49
<i>R. McCall</i>	
2. Three Studies of Design Rationale as Explanation.....	53
<i>S.R. Haynes</i>	
2.1. Introduction	53
2.2. Explanations of Complex Systems.....	54
2.3. Design Rationale as Explanation Content.....	56
2.4. Three Cases of Design Rationale as Explanation.....	57
2.5. Challenges and Opportunities for Design Rationale as Explanation	67
2.6. Conclusion.....	68
3. Effective Design Rationale: Understanding the Barriers.....	73
<i>J. Horner, M.E. Atwood</i>	
3.1. Introduction	73
3.2. Design Perspectives and Rationale	74

3.3.	The Fundamental Barriers.....	78
3.4.	Transcending the barriers.....	85
3.5.	Conclusions	88
4.	Rationale as a By-Product.....	91
	<i>K. Schneider</i>	
4.1.	Introduction.....	91
4.2.	Origins of Rationale in Software Projects	92
4.3.	Rationale as a By-Product	94
4.4.	Case 1: Capturing Rationale in Software Prototypes	100
4.5.	Case 2: Risk Analysis	104
4.6.	Discussion	106
4.7.	Conclusions	107
5.	Hypermedia Support for Argumentation-Based Rationale: 15 Years on from gIBIS and QOC	111
	<i>S.J. Buckingham Shum, A.M. Selvin, M. Sierhuis, J. Conklin, C.B. Haley, B. Nuseibeh</i>	
5.1.	Introduction and Overview	111
5.2.	The Vision	112
5.3.	The Design Rationale Capture Problem	113
5.4.	Understanding Cognitive Overhead	114
5.5.	Compendium	115
5.6.	Reasoning Services and Verification	122
5.7.	Revisiting ‘Intrusiveness’	123
5.8.	Examples of Compendium in Use	124
5.9.	Lessons Learnt and Conclusions.....	129
	Part 2 Rationale Management for Requirements Engineering.....	133
	<i>A.H. Dutoit</i>	
6.	A Hybrid Approach to Upstream Requirements: IBIS and Cognitive Mapping	137
	<i>J. Rooksby, I. Sommerville, M. Pidd</i>	
6.1.	Introduction	137
6.2.	The Process	138
6.3.	The Tool	144
6.4.	Example	146
6.5.	Experience	148
6.6.	Discussion	150

7. From DREAM to Reality: Specificities of Interactive Systems Development With Respect To Rationale Management	155
<i>X. Lacaze, P. Palanque, E. Barboni, R. Bastide, D. Navarre</i>	
7.1. Introduction	155
7.2. State of Art in Rationale Management for Interactive Systems.....	156
7.3. TEAM Notation.....	157
7.4. DREAM Tool	160
7.5. Case Study.....	165
7.6. Conclusion	170
8. The WinWin Approach: Using a Requirements Negotiation Tool for Rationale Capture and Use.....	173
<i>B. Boehm, H. Kitapci</i>	
8.1. Introduction.....	173
8.2. The Theory W and WinWin Spiral Model in Software Development Process	175
8.3. Fundamental WinWin Concepts.....	178
8.4. Tool Support for WinWin Requirements Negotiation....	182
8.5. An Example Using WinWin in Software Development	184
8.6. Using the Captured Rationale to Improve Later Decisions	188
8.7. Related Work	189
8.8. Future Directions.....	189
9. Design Rationale in Exemplary Business Process Modeling	191
<i>H. Breitling, A. Kornstädt, J. Sauer</i>	
9.1. Overview of EBPM.....	191
9.2. The EBPM Paradigm.....	192
9.3. EBPM Models.....	195
9.4. Capturing Design Rationale.....	199
9.5. Relations to Other Approaches	205
9.6. Conclusion	206
10. Promoting and Supporting Requirements Engineering Creativity.....	209
<i>L. Nguyen, P.A. Swatman</i>	
10.1. Introduction	209
10.2. Overview of Design Rationale.....	210
10.3. Understanding the RE Process.....	213
10.4. RE Creativity in Relation to Psychology of Problem Solving.....	218

10.5.	Using DR to Support Creative RE Process	221
10.6.	Summary and Conclusion	226
Part 3	Design Rationale and Software Architecting	231
	<i>I. Mistrík</i>	
11.	A Framework for Supporting Architecture Knowledge and Rationale Management	237
	<i>M.A. Babar, I. Gorton, B. Kitchenham</i>	
11.1.	Introduction	237
11.2.	Background and Motivation.....	238
11.3.	Managing Architecture Design Knowledge.....	241
11.4.	Conclusions and Open Issues.....	251
12.	Capturing and Using Rationale for a Software Architecture	255
	<i>L. Bass, P. Clements, R.L. Nord, J. Stafford</i>	
12.1.	Introduction	255
12.2.	Structuring Rationale.....	256
12.3.	How Will Architectural Design Rationale Be Used?	262
12.4.	Capturing Rationale	265
12.5.	An Example of Capturing and Using Rationale.....	269
12.6.	Summary	271
13.	Rationale-Based Support for Software Maintenance	273
	<i>J.E. Burge, D.C. Brown</i>	
13.1.	Introduction	273
13.2.	Related Work	274
13.3.	Rationale for Software Maintenance	276
13.4.	The SEURAT System	277
13.5.	SEURAT Evaluation	291
13.6.	Conclusions and Recommendations	293
14.	The Role of Rationale in the Design of Product Line Architectures – A Case Study from Industry	297
	<i>J. Knodel, D. Muthig</i>	
14.1.	Introduction	297
14.2.	Approach	298
14.3.	The TFT-Panel Product Line	302
14.4.	Concept Assessment and Decision Making	307
14.5.	Conclusion	311

15. The Role and Impact of Assumptions in Software Engineering and its Products.....	313
<i>M.M (Manny) Lehman, J. Fernández-Ramil</i>	
15.1. Introduction.....	313
15.2. SPE Classification Scheme and its Implications	314
15.3. E-type Programs and the Role of Assumptions.....	319
15.4. A Principle of Software Uncertainty	322
15.5. Examples of Invalidation of Assumptions	323
15.6. Practical Approaches and Recommendations	324
15.7. Final Remarks.....	325
16. Design Decisions: The Bridge between Rationale and Architecture.....	329
<i>J.S. van der Ven, A.G.J. Jansen, J.A.G. Nijhuis, J. Bosch</i>	
16.1. Introduction	329
16.2. Software Architecture	330
16.3. Rationale in Software Architecture.....	333
16.4. Design Decisions: The Bridge Between Rationale and Architecture.....	335
16.5. Archium	342
16.6. Related Work and Further Developments.....	345
16.7. Summary	346
Part 4 Rationale for Organizing Bodies of Knowledge	349
<i>B. Paech</i>	
17. Reusable Rationale Blocks: Improving Quality and Efficiency of Design Choices.....	353
<i>W. Hordijk, R. Wieringa</i>	
17.1. Introduction.....	353
17.2. Reusable Rationale Blocks and the Design Space	357
17.3. RRB Process.....	361
17.4. Illustrations.....	363
17.5. Discussion and Conclusions	368
18. Defining Agile Patterns.....	373
<i>T. Bozheva, M.E. Gallo</i>	
18.1. Introduction	373
18.2. Motivation for Defining Agile Patterns	375
18.3. Agile Pattern Definition Approach	377

18.4.	Using the Agile Patterns	385
18.5.	Conclusions	389
19.	Capturing and Reusing Rationale Associated with Requirements Engineering Process Improvement: A Case Study.....	391
	<i>B. Palyagar, D. Richards</i>	
19.1.	Introduction.....	391
19.2.	REPI Rationale	393
19.3.	Challenges Associated with REPI Rationale Capture and Reuse.....	396
19.4.	Capturing Rationale: A Tested Method	397
19.5.	A Snapshot of a Case Study.....	401
19.6.	Conclusion	405
20.	Using Patterns for Sharing Requirements Engineering Process Rationales	409
	<i>L. Hagge, F. Houdek, K. Lappe, B. Paech</i>	
20.1.	Introduction	409
20.2.	Capturing Engineering Experience in Patterns.....	410
20.3.	Examples for RE Patterns	415
20.4.	Working With RE Patterns.....	421
20.5.	Conclusion	425
