Survey of this Book	
<i>Bernd J. Krämer</i>	VII

Part I Supporting Mobility, Self-Healing and Self-Organisation

1 Building Adaptable Mobile Middleware Services Using Logical Mobility Techniques	
<i>Stefanos Zachariadis, Manish Lad, Cecilia Mascolo, Wolfgang Emmerich</i>	3
2 Towards Self-healing Composition of Services	
<i>Luciano Baresi, Carlo Ghezzi, Sam Guinea</i>	27
3 Wireless Sensor Networks	
<i>Yusuf Öztürk</i>	47
4 Common-interest Based Self-organising E-Learner Communities	
<i>Fan Yang, Bernd J. Krämer, Peng Han</i>	71
5 A Service Component Architecture to Federate E-Universities: A Case Study in Virtual Mobility	
<i>Bernd J. Krämer</i>	95

Part II Components and Solutions for Business and Industry

6 Wireless Asset Management	
<i>Peter Neumann</i>	123
7 Knowledge Management for E-Maintenance of Industrial Automation Systems	
<i>Wei Zhang</i>	139

VI Contents

8 Using Formal Concept Analysis for Semantic Web Applications	
<i>Yi Zhao</i>	157
9 A Fair Off-line Electronic Payment System	
<i>Weidong Qiu</i>	177
10 A UML Profile to Model Safety-Critical Embedded Real-Time Control Systems	
<i>Shourong Lu, Wolfgang A. Halang</i>	197
Part III Distributed Systems Management, Effective Communication and Security	
11 Probabilistic Management of Distributed Systems	
<i>Jianguo Ding</i>	221
12 Denial of Service Detection in Mobile Agent Systems with Dependencies in Computations	
<i>Biljana Cubaleska, Markus Schneider</i>	249
13 Fighting Internet Congestion by Means of Chaos Control	
<i>Zhong Li</i>	269
14 Securing Communication by Chaos-based Encryption	
<i>Ping Li, Zhong Li, Wolfgang A. Halang, Guanrong Chen</i>	285
15 A Chip Performing Chaotic Stream Encryption	
<i>Yaobin Mao, Wenbo Liu, Zhong Li, Ping Li, Wolfgang A. Halang</i>	307
Index	333
