Lecture Notes in Applied and Computational Mechanics 1

Set-Valued Force Laws

Dynamics of Non-Smooth Systems

Bearbeitet von
Christoph Glocker

1. Auflage 2001. Buch. IX, 222 S. Hardcover
ISBN 978 3 540 41436 0
Format (B x L): 15,5 x 23,5 cm
Gewicht: 1120 g

Weitere Fachgebiete > Mathematik > Mathematische Analysis > Differentialrechnungen und -gleichungen

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

1. Introduction 1
1.1 Friction Laws 1
1.2 Literature Survey 5
1.3 Subjects and Contents 9

2. Fundamental Concepts 17
2.1 Internal and External Forces 17
2.2 The Law of Interaction 19
2.3 The Dynamic Equilibrium 20
2.4 The Virtual Work of a Dynamic System 24
2.5 Resultant Force and Inertia Terms 29

3. Rigid Body Systems 33
3.1 Preliminaries on the Vector Product 33
3.2 Rigid Body Kinematics 34
3.3 Rigid Body Kinetics 37
3.4 The Dynamic Equilibrium of a Rigid Body 39
3.5 The Virtual Work of a Rigid Body System 43
3.6 Classical Bilateral Constraints 45
3.7 Generalized Coordinates 51

4. Motion and Discontinuity Events 55
4.1 Preliminaries on Integration of Functions 55
4.2 Displacements, Velocities, and Accelerations 61
4.3 Restriction to Finite Numbers of Discontinuities 65

5. Displacement and Velocity Potentials 69
5.1 Directional Newton-Euler Equations 69
5.2 Set-Valued Force Laws 71
5.3 Scalar Potential Functions 73
5.4 On the Modeling of Force Laws 75

6. Representation of Scalar Force Laws 79
6.1 Decomposition into Unilateral Primitives 79
6.2 Variational Formulations and Upper Subderivatives 82
6.3 The Convex Case: Conjugate Potentials and Duality 84
6.4 Force Elements in Engineering Dynamics 88

7. Force Laws on Different Kinematic Levels 91
7.1 Continuity Properties of the Trajectories 91
7.2 Displacement Force Laws on Acceleration Level 93
7.3 Velocity Force Laws on Acceleration Level 99

8. Index Sets and LCP-Formulation 103
8.1 Index Sets 104
8.2 Formulation on Different Kinematic Levels 105
8.3 The Linear Complementarity Problem 107
8.4 The Dual Principle of Least Constraints 110

9. Principles in Dynamics 117
9.1 The Principle of Least Constraints 117
9.2 The Principle of Gauß 122
9.3 The Principle of Jourdain 125
9.4 The Principle of d'Alembert/Lagrange 126
9.5 Remarks on d'Alembert/Lagrange's Principle 127

10. Spatial Coulomb Friction 131
10.1 Geometry of Surfaces 132
10.2 Contact Kinematics 134
10.3 Kinetics 135
10.4 Contact Laws 136
10.5 Sliding Contacts 138
10.6 Friction Pyramid for Rolling Contacts 138
10.7 Friction Cones and NCP Formulations 144
10.8 A Differentiable NCP for Rolling Contacts 147
10.9 Example and Remarks 151

11. Velocity Jumps due to C^0-Constraints 155
11.1 On Impacts in Mechanical Systems 156
11.2 Mechanical Model and Problem 157
11.3 Bilaterally Constrained Motion 160
11.4 Velocity Jump by Time-Scaling 163
11.5 Velocity Jump by Reflection 167
11.6 Reflections and Collisions - Remarks 170

12. Electropneumatic Drilling Machine 175
12.1 Mechanical Model 176
12.2 Simulations 180

13. Percussion Drilling Machine 183
13.1 Mechanical Model of the Drilling Machine 183
13.2 Mathematical Model for Non-Contact 184
13.3 The Contact Model 185
13.4 State Transitions 189
13.5 Results 191

14. Turbine Blade Damper 195
14.1 The Damper Model and the Non-Contact Case 195
14.2 Contact Kinematics of the Damping Device 196
14.3 Numerical Results 200

15. Concluding Remarks 205
