

Infinite Matrices and their Finite Sections

An Introduction to the Limit Operator Method

Bearbeitet von
Marko Lindner

1. Auflage 2006. Taschenbuch. xv, 191 S. Paperback

ISBN 978 3 7643 7766 3

Format (B x L): 17 x 24 cm

Gewicht: 374 g

[Weitere Fachgebiete > Mathematik > Mathematische Analysis > Funktionalanalysis](#)

schnell und portofrei erhältlich bei

The logo for beck-shop.de features the text 'beck-shop.de' in a bold, red, sans-serif font. Above the 'i' in 'shop' are three red dots of increasing size. Below the main text, 'DIE FACHBUCHHANDLUNG' is written in a smaller, red, all-caps sans-serif font.

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

Introduction	vii
1 Preliminaries	1
1.1 Basic Conventions	1
1.1.1 Numbers and Vectors	1
1.1.2 Banach Spaces and Banach Algebras	2
1.1.3 Operators	3
1.2 The Spaces	4
1.2.1 Functions	4
1.2.2 Sequences	4
1.2.3 Discretization: Functions as Sequences	5
1.2.4 The System Case	5
1.3 The Operators	5
1.3.1 Operators of Shift and Multiplication	5
1.3.2 Adjoint and Pre-adjoint Operators	6
1.3.3 An Approximate Identity	8
1.3.4 Compact Operators and their Substitutes	9
1.3.5 Matrix Representation	16
1.3.6 Band- and Band-dominated Operators	20
1.3.7 Comparison	27
1.4 Invertibility of Sets of Operators	36
1.5 Approximation Methods	38
1.5.1 Definition	38
1.5.2 Discrete Case	39
1.5.3 Continuous Case	40
1.5.4 Additional Approximation Methods	40
1.5.5 Which Type of Convergence is Appropriate?	41
1.6 $\mathcal{P}$ -convergence	41
1.6.1 Definition and Equivalent Characterization	42
1.6.2 $\mathcal{P}$ -convergence in $L(E, \mathcal{P})$	44
1.6.3 $\mathcal{P}$ -convergence vs. $*$ -strong Convergence	46
1.7 Applicability vs. Stability	47

1.8	Comments and References	49
2	Invertibility at Infinity	51
2.1	Fredholm Operators	51
2.2	Invertibility at Infinity	53
2.2.1	Invertibility at Infinity in BDO^p	56
2.3	Invertibility at Infinity vs. Fredholmness	56
2.4	Invertibility at Infinity vs. Stability	59
2.4.1	Stacked Operators	60
2.4.2	Stability and Stacked Operators	63
2.5	Comments and References	74
3	Limit Operators	75
3.1	Definition and Basic Properties	77
3.2	Limit Operators vs. Invertibility at Infinity	81
3.2.1	Some Questions Around Theorem 1	81
3.2.2	Proof of Theorem 1	82
3.3	Fredholmness, Lower Norms and Pseudospectra	86
3.3.1	Fredholmness vs. Limit Operators	86
3.3.2	Pseudospectra vs. Limit Operators	89
3.4	Limit Operators of a Multiplication Operator	90
3.4.1	Rich Functions	90
3.4.2	Step Functions	93
3.4.3	Bounded and Uniformly Continuous Functions	94
3.4.4	Intermezzo: Essential Cluster Points at Infinity	95
3.4.5	Slowly Oscillating Functions	97
3.4.6	Admissible Additive Perturbations	101
3.4.7	Slowly Oscillating and Continuous Functions	101
3.4.8	Almost Periodic Functions	102
3.4.9	Oscillating Functions	106
3.4.10	Pseudo-ergodic Functions	108
3.4.11	Interplay with Convolution Operators	109
3.4.12	The Big Picture	114
3.4.13	Why Choose Integer Sequences?	116
3.5	Alternative Views on the Operator Spectrum	116
3.5.1	The Matrix Point of View	116
3.5.2	Another Parametrization of the Operator Spectrum	118
3.6	Generalizations of the Limit Operator Concept	125
3.7	Examples	126
3.7.1	Characteristic Functions of Half Spaces	126
3.7.2	Wiener-Hopf and Toeplitz Operators	128
3.7.3	Singular Integral Operators	130
3.7.4	Discrete Schrödinger Operators	132
3.8	Limit Operators – Everything Simple Out There?	133

3.8.1	Limit Operators of Limit Operators of ...	134
3.8.2	Everyone is Just a Limit Operator!	136
3.9	Big Question: Uniformly or Elementwise?	138
3.9.1	Reformulating Richness	139
3.9.2	Turning Back to the Big Question	140
3.9.3	Alternative Proofs for ℓ^∞	144
3.9.4	Passing to Subclasses	145
3.10	Comments and References	147
4	Stability of the Finite Section Method	149
4.1	The FSM: Stability vs. Limit Operators	149
4.1.1	Limit Operators of Stacked Operators	149
4.1.2	The Main Theorem on the Finite Section Method	152
4.1.3	Two Baby Versions of Theorem 4.2	154
4.2	The FSM for a Class of Integral Operators	156
4.2.1	An Algebra of Convolutions and Multiplications	156
4.2.2	The Finite Section Method in $\mathcal{A}_{\mathfrak{s}}$	159
4.2.3	A Special Finite Section Method for BC	162
4.3	Boundary Integral Equations on Unbounded Surfaces	166
4.3.1	The Structure of the Integral Operators Involved	166
4.3.2	Limit Operators of these Integral Operators	172
4.3.3	A Fredholm Criterion in $I + \mathcal{K}_f$	176
4.3.4	The BC-FSM in $I + \mathcal{K}_f$	176
4.4	Comments and References	179
	Index	181
	Bibliography	185
