

Contents

1	Introduction	1
2	Transdisciplinary Fundamentals	5
2.1	Theories, Models, Structures and Interactions	5
2.2	A Simple Example: Structures in Fluids	8
2.2.1	Static Structures	9
2.2.2	Dynamic Structures	11
2.3	Real-World Structures and Structure-Generating Processes	14
2.4	Modeling Reality	18
2.4.1	State Models	18
2.4.2	Process Models	22
2.4.3	The Economy of Modeling	26
2.4.4	Explicit Modeling of Uncertainty	29
2.5	General Aspects of Optimization	33
2.5.1	A Reflection on Optimality	33
2.5.2	Constraints in Optimum Seeking	36
2.5.3	The Chore of Choice: Trading Off Conflicting Goals	39
2.5.4	Objective and Subjective Quality	44
2.6	Model Optimization with Evolutionary Algorithms	47
2.6.1	Introduction	47
2.6.2	Evolution Strategies	49
2.6.3	Ways to Cope with Uncertainty	52
2.6.4	Multiple Objectives	55
2.6.5	Multimodal Problems	60
2.6.6	Conclusions	62
2.7	Structure Optimization by Decision Support Systems	63
2.7.1	Introduction	63
2.7.2	Forward Planning in Decision Support	63
2.7.3	Practical Multicriteria Decision-Making (MCDM)	65
2.7.4	Ingredients for Practical MCDM	66
2.7.5	Conclusion	73

3	Structures in the Disciplines: Case Studies	75
3.1	Optimal Structures of Injection Molding Tools	75
3.1.1	Modeling Aspects	77
3.1.2	Multiobjective Evolutionary Algorithms	82
3.1.3	Statistical Design and Analysis	84
3.1.4	Results	86
3.1.5	Summary	90
3.2	Treatment Structures in Intensity Modulated Radiotherapy	90
3.3	An Interactive Multicriterial Decision Tool	98
3.3.1	Decision Support Tool Setup	99
3.3.2	Feed-Back from Practice	103
3.3.3	Refinement of the Selection Tool	106
3.4	RNA Structure Optimization on Large Neutral Networks	107
3.4.1	The Darwinian Mechanism	109
3.4.2	Evolution in the Laboratory	111
3.4.3	The RNA Model	113
3.4.4	Modelling Evolution	116
3.4.5	Neutral Networks	121
3.4.6	Multiple Optimization Criteria	125
3.4.7	Applications of Optimization on Neutral Networks	126
3.5	Employment of the Darwinian Principle for the in vitro Evolution of Molecular Structures	127
3.5.1	RNA Aptamers	128
3.5.2	DNA Aptamers	131
3.5.3	Spiegelmers	132
3.5.4	New Ribozymes	134
3.5.5	Ribosome Display	135
3.5.6	Summary and Outlook	140
3.6	Optimal Structures of Residential Heating Systems	141
3.6.1	Problem Definition and Scope	141
3.6.2	Simulation and Optimization	143
3.6.3	Heating System Comparison for Different Usage Scenarios	146
3.6.4	Interpretation of Results	152
3.7	Biochemical Engineering: Knowledge Based Process Design	154
3.7.1	Introduction	154
3.7.2	Design Methodology	155
3.7.3	Process Design for Biochemical Processes	159
3.7.4	Process Design Example	160
3.7.5	Conclusion	163
3.8	Structural Design and Process Shaping with Uncertainty	163
3.8.1	Introduction	163
3.8.2	Lifespan-Oriented Design	164
3.8.3	Computer-Based Demolition of Complex Structural Systems	168

3.8.4	Imperfection-Sensitive Structural Optimization	171
3.8.5	Conclusions	174
3.9	Structures in Operational Transport: Complexity and Optimization .	175
3.9.1	Introduction	175
3.9.2	Basic Scenarios	175
3.9.3	Practical Aspects of Real World Problems	181
3.9.4	Conclusions	186
3.10	Innovation Management: Optimizing the Structures of Innovation Processes	187
3.10.1	Introduction	187
3.10.2	Characteristics of Innovations, Innovation Processes, and Innovation Projects	188
3.10.3	Stochastic Networks for the Planning of Risks and Uncertainties	189
3.10.4	Planning with Multiple Goals	192
3.10.5	A Concept of Integration: The Stochastical, Multi-Goal- Oriented, Interactive Planning of Innovation Projects	194
3.10.6	Discussion	198
3.11	Structuring a Dynamic Environment: Combinatorial Online Optimization of Logistics Processes	199
3.11.1	Introduction	199
3.11.2	Theoretical Analysis	202
3.11.3	Case Study: Elevator Systems	205
3.11.4	Case Study: ADAC Yellow Angels	208
3.11.5	Conclusion	214
3.12	Decision Structures on the Basis of Bounded Rationality	214
3.12.1	Bounded Rationality: Fast and Frugal Heuristics	215
3.12.2	The Recognition Heuristic	216
3.12.3	The Less-is-More Effect	217
3.12.4	Cue-Based Heuristics	220
3.12.5	Lexicographic and Tallying Heuristics	222
3.12.6	Other Tasks	224
3.12.7	Fast and Frugal Heuristics in Technology Development? . .	224
3.13	Continuous Structuring in Open Source Software Development . . .	226
3.13.1	Introduction	226
3.13.2	The Specifics of Open Source and the Linux-Project	229
3.13.3	Self-Organization Within the Linux Kernel Project	233
3.13.4	Outlook	241
3.14	Structure Generation Under Subjectivity: Selected Examples from Acoustics	244
3.14.1	Room Acoustics	244
3.14.2	Further Examples	251
3.14.3	General Aspects of Structure Optimization with Subjective Goal Functions in Acoustics	255

4 Transdisciplinary Perspective	261
4.1 Methodological Survey	261
4.1.1 Classification of Structures	262
4.1.2 Understanding Structures.....	263
4.2 Striving for Optimality	264
4.3 An Hommage to Statistics	267
4.4 Subjectivity and Bounded Rationality	269
4.5 Convergence	270
Contributing Authors	273
Bibliography	289

Emergence, Analysis and Evolution of Structures

Concepts and Strategies Across Disciplines

(Eds.) K. Lucas; P. Roosen

2010, XII, 310 p. 140 illus., 54 in color., Hardcover
