

Global Analysis of Minimal Surfaces

Bearbeitet von
Ulrich Dierkes, Stefan Hildebrandt, Anthony Tromba

erweitert, überarbeitet 2010. Buch. xvi, 537 S. Hardcover

ISBN 978 3 642 11705 3

Format (B x L): 15,5 x 23,5 cm

Gewicht: 992 g

[Weitere Fachgebiete > Mathematik > Geometrie > Differentialgeometrie](#)

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

Part I. Free Boundaries and Bernstein Theorems

Chapter 1. Minimal Surfaces with Supporting Half-Planes	3
1.1 An Experiment	4
1.2 Examples of Minimal Surfaces with Cusps on the Supporting Surface	7
1.3 Setup of the Problem. Properties of Stationary Solutions	11
1.4 Classification of the Contact Sets	13
1.5 Nonparametric Representation, Uniqueness, and Symmetry of Solutions	18
1.6 Asymptotic Expansions for Surfaces of Cusp-Types I and III. Minima of Dirichlet's Integral	21
1.7 Asymptotic Expansions for Surfaces of the Tongue/Loop- Type II	23
1.8 Final Results on the Shape of the Trace. Absence of Cusps. Optimal Boundary Regularity	26
1.9 Proof of the Representation Theorem	28
1.10 Scholia	34
Chapter 2. Embedded Minimal Surfaces with Partially Free Boundaries .	37
2.1 The Geometric Setup	38
2.2 Inclusion and Monotonicity of the Free Boundary Values	44
2.3 A Modification of the Kneser–Radó Theorem	50
2.4 Properties of the Gauss Map, and Stable Surfaces	52
2.5 Uniqueness of Minimal Surfaces that Lie on One Side of the Supporting Surface	60
2.6 Uniqueness of Freely Stable Minimal Surfaces	66
2.7 Asymptotic Expansions	74

2.8	Edge Creeping	86
2.9	Embedded Minimizers for Nonsmooth Supporting Surfaces . .	96
2.10	A Bernstein Theorem for Minimal Surfaces in a Wedge	108
2.11	Scholia	126
Chapter 3. Bernstein Theorems and Related Results		135
3.1	Entire and Exterior Minimal Graphs of Controlled Growth . .	137
3.1.1	Jörgens's Theorem	137
3.1.2	Asymptotic Behaviour for Solutions of Linear and Quasilinear Equations, Moser's Bernstein Theorem . .	140
3.1.3	The Interior Gradient Estimate and Consequences . .	144
3.2	First and Second Variation Formulae	145
3.2.1	First and Second Variation of the Area Integral	146
3.2.2	First and Second Variation Formulae for Singular Minimal Surfaces	152
3.3	Some Geometric Identities	156
3.3.1	Covariant Derivatives of Tensor Fields	159
3.3.2	Simons's Identity and Jacobi's Field Equation	161
3.4	Nonexistence of Stable Cones and Integral Curvature Estimates. Further Bernstein Theorems	163
3.4.1	Stability of Minimal Cones	164
3.4.2	Nonexistence of Stable Cones	172
3.4.3	Integral Curvature Estimates for Minimal and α -Minimal Hypersurfaces. Further Bernstein Theorems	180
3.5	Monotonicity and Mean Value Formulae. Michael–Simon Inequalities	198
3.6	Pointwise Curvature Estimates	217
3.7	Scholia	236
3.7.1	References to the Literature on Bernstein's Theorem and Curvature Estimates for $n = 2$	236
3.7.2	Bernstein Theorems and Curvature Estimates for $n \geq 3$ dimensions	238
3.7.3	Bernstein Theorems in Higher Codimensions	242
3.7.4	Sobolev Inequalities	245

Part II. Global Analysis of Minimal Surfaces

Chapter 4. The General Problem of Plateau: Another Approach		249
4.1	The General Problem of Plateau. Formulation and Examples	249
4.2	A Geometric Approach to Teichmüller Theory of Oriented Surfaces	255
4.3	Symmetric Riemann Surfaces and Their Teichmüller Spaces .	263

4.4	The Mumford Compactness Theorem	271
4.5	The Variational Problem	276
4.6	Existence Results for the General Problem of Plateau in $\mathbb{R}^3$.	285
4.7	Scholia	296
Chapter 5. The Index Theorems for Minimal Surfaces of Zero and Higher Genus		299
5.1	Introduction	299
5.2	The Statement of the Index Theorem of Genus Zero	302
5.3	Stratification of Harmonic Surfaces by Singularity Type . . .	304
5.4	Stratification of Harmonic Surfaces with Regular Boundaries by Singularity Type	318
5.5	The Index Theorem for Classical Minimal Surfaces	324
5.6	The Forced Jacobi Fields	329
5.7	Some Theorems on the Linear Algebra of Fredholm Maps . .	341
5.8	Generic Finiteness, Stability, and the Stratification of the Sets $\mathcal{M}_{\lambda_0}$	347
5.9	The Index Theorem for Higher Genus Minimal Surfaces Statement and Preliminaries	353
5.10	Review of Some Basic Results in Riemann Surface Theory . .	354
5.11	Vector Bundles over Teichmüller Space	359
5.12	Some Results on Maximal Ideals in Sobolev Algebras of Holomorphic Functions	364
5.13	Minimal Surfaces as Zeros of a Vector Field, and the Conformality Operators	365
5.14	The Corank of the Partial Conformality Operators	369
5.15	The Corank of the Complete Conformality Operators	377
5.16	Manifolds of Harmonic Surfaces of Prescribed Branching Type	380
5.17	The Proof of the Index Theorem	385
5.18	Scholia	399
Chapter 6. Euler Characteristic and Morse Theory for Minimal Surfaces		401
6.1	Fredholm Vector Fields	402
6.2	The Gradient Vector Field Associated to Plateau's Problem .	405
6.3	The Euler Characteristic $\chi(W_\alpha)$ of W_α	411
6.4	The Sard–Brown Theorem for Functionals	423
6.5	The Morse Lemma	424
6.6	The Normal Form of Dirichlet's Energy about a Generic Minimal Surface in $\mathbb{R}^3$	436
6.7	The Local Winding Number of W_α about a Generically Branched Minimal Surface in $\mathbb{R}^3$	442
6.8	Scholia	447

6.8.1	Historical Remarks and References to the Literature ..	447
6.8.2	On the Generic Nondegeneracy of Closed Minimal Surfaces in Riemannian Manifolds and Morse Theory	449
	Bibliography	477
	Index	531
