

Microfacies of Carbonate Rocks

Analysis, Interpretation and Application

Bearbeitet von
Erik Flügel

1. Auflage 2009. Buch. xxiii, 984 S. Hardcover

ISBN 978 3 642 03795 5

Format (B x L): 20,3 x 25,4 cm

Gewicht: 2620 g

[Weitere Fachgebiete > Geologie, Geographie, Klima, Umwelt > Geologie > Bodenkunde, Sedimentologie](#)

schnell und portofrei erhältlich bei

The logo for beck-shop.de features the text 'beck-shop.de' in a bold, red, sans-serif font. Above the 'i' in 'shop' are three red dots of increasing size. Below the main text, the words 'DIE FACHBUCHHANDLUNG' are written in a smaller, red, all-caps, sans-serif font.

beck-shop.de
DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

1	New Perspectives in Microfacies	1
1.1	The Microfacies Concept	1
1.2	New Perspectives	1
2	Carbonate Depositional Environments	7
2.1	Introduction	7
2.1.1	Carbonates are Born not Made	7
2.1.2	The ‘Sorby Principle’: Limestones are Predominantly Biogenic Sediments	7
2.1.3	Modern Carbonates: Obligatory Reading	7
2.2	Carbonate Sediments Originate on Land and in the Sea	8
2.3	Classification of Marine Environments	8
2.3.1	Boundary Levels	8
2.3.2	Vertical and Horizontal Zonations	9
2.3.2.1	Vertical Zonations	9
2.3.2.2	Horizontal Zonations	10
2.4	Review of Modern Carbonate Depositional Environments	10
2.4.1	Non-Marine Carbonate Environments	10
2.4.1.1	Pedogenic Carbonates, Paleosols, and Caliche/Calcretes	10
2.4.1.2	Palustrine Carbonates	13
2.4.1.3	Cave Carbonates, Speleothems and Karst	13
2.4.1.5	Glacial Carbonates	14
2.4.1.6	Travertine, Calcareous Tufa and Calcareous Sinter	14
2.4.1.7	Lacustrine Carbonates: Lakes	18
2.4.1.8	Fluvial Carbonates	21
2.4.2	Transitional Marginal-Marine Environments: Shorelines and Peritidal Sediments	24
2.4.2.1	Beach (Foreshore), Barriers and Coastal Lagoons	24
2.4.2.2	Peritidal Environments	24
2.4.3	Shallow-Marine Sedimentary Environments: ‘Shallow’ and ‘Deep’	25
2.4.3.1	Pericontinental vs Epicontinental Shallow Seas	26
2.4.3.2	Carbonate Shelves, Ramps and Platforms	26
2.4.3.3	Shelf Margins	28
2.4.3.4	Reefs	29
2.4.4	Tropical and Non-Tropical Carbonates: Different in Composition, Controls and Significance	30
2.4.4.1	Latitudinal Zonation and Diagnostic Criteria of Tropical and Non-Tropical Carbonates	31
2.4.4.2	Tropical and Subtropical Shallow-Marine Carbonates	34
2.4.4.3	Non-Tropical Shelf and Reef Carbonates	37
2.4.5	Deep-Marine Environments	46
2.4.5.1	Settings	46
2.4.5.2	Sedimentation Processes	47
2.4.5.3	Pelagic Sedimentation	47
2.4.5.4	Resedimentation (‘Allochthonous Carbonates’)	49

2.4.5.5	Carbonate Plankton and Carbonate Oozes	49
2.4.5.6	Preservation Potential and Dissolution Levels	49
2.4.5.7	Carbonate Slopes, Periplatform Carbonates and Carbonate Aprons	50
2.4.6	Seep and Vent Carbonates	51
	Microfacies Analysis	
3	Methods	53
3.1	Field Work and Sampling	53
3.1.1	Field Observations	53
3.1.1.1	Lithology, Texture and Rock Colors	53
3.1.1.2	Bedding and Stratification, Sedimentary Structures and Diagenetic Features	55
3.1.1.3	Fossils and Biogenic Structures	59
3.1.1.4	Field Logs and Compositional Logs	60
3.1.2	Sampling	61
3.1.2.1	Search Sampling and Statistical Sampling	62
3.1.2.2	How Many Samples?	62
3.1.2.3	Practical Advice for Microfacies Sampling	63
3.2	Laboratory Work: Techniques	64
3.2.1	Slices, Peels and Thin Sections	64
3.2.2	Casts, Etching and Staining	65
3.2.3	Microscopy	66
3.2.3.1	Petrographic Microscopy	66
3.2.3.2	Stereoscan Microscopy	66
3.2.3.3	Fluorescence, Cathodoluminescence and Fluid Inclusion Microscopy	67
3.2.4	Mineralogy and Geochemistry	70
3.2.5	Trace Elements and Stable Isotope Analysis	70
4	Microfacies Data: Matrix and Grains	73
4.1	Fine-Grained Carbonate Matrix: Micrite, Microspar, Calcisiltite	73
4.1.1	Micrite	74
4.1.2	Modes of Formation of Micrite and Other Fine-Grained Matrix Types	80
4.1.3	Microspar	94
4.1.4	Calcisiltite	95
4.1.5	Practical Aids in Describing and Interpreting Fine-Grained Limestones	98
4.1.6	Significance of Fine-Grained Carbonates	98
4.2	Carbonate Grains	100
4.2.1	Bioclasts (Skeletal Grains)	101
4.2.2	Peloids: Just a Term of Ignorance?	110
4.2.3	Cortoids – Carbonate Grains Characterized by Micrite Envelope	118
4.2.4	Oncoids and Rhodoids	121
4.2.4.1	Oncoids	124
4.2.4.2	Rhodoids and Macroids	137
4.2.5	Ooids	142
4.2.6	Pisoids and Vadoids – Simply ‘Larger Ooids’ or Carbonate Grains on their Own?	157
4.2.7	Aggregate Grains: Grapestones, Lumps and Other Composite Grains	163
4.2.8	Resediments: Intra-, Extra- and Lithoclasts – Insiders and Foreigners	166
4.2.8.1	Intraclasts: Origin and Facies-Diagnostic Types	167
4.2.8.2	Extraclasts: Strange Foreigners	172
4.3	Morphometry of Carbonate Grains	173
4.3.1	Intentions and Methods	174
4.3.2	Significance of Morphometric Data for Carbonate Grains	175

5	Microfacies Data: Fabrics	177
5.1	Depositional and Diagenetic Fabrics	177
5.1.1	Geopetal Fabrics	177
5.1.2	Biofabrics and Grain Orientation	181
5.1.3	Bedding and Lamination Fabrics	184
5.1.4	Burrowing and Bioturbation Fabrics	185
5.1.5	Birdseyes, Fenestral Fabrics and Stromatactis	190
5.1.5.1	Birdseyes	192
5.1.5.2	Fenestral Fabrics	192
5.1.5.3	Stromatactis	193
5.1.5.4	Significance of Birdseyes, Fenestral Fabrics and Stromatactis	197
5.1.6	Nodular Fabrics	198
5.2	Discontinuity Surfaces: From Microfacies to Sequence Stratigraphy	203
5.2.1	Classification of Discontinuities	203
5.2.2	Major Criteria of Discontinuities	203
5.2.3	Microfacies Criteria and Significance of Exposure Surfaces	205
5.2.4	Microfacies Criteria and Significance of Condensation Surfaces and Hardgrounds	206
5.2.4.1	Hardgrounds	206
5.2.4.2	Condensation Surfaces and Condensed Sections	211
5.2.5	Discontinuities and Sequence Stratigraphy	215
5.3	Syn- and Postdepositional Features: Fissures, Veins, Breccias	216
5.3.1	Sediment-Filled Fissures: Neptunian Dikes and Fissure Fills	217
5.3.1.1	Origin, Development and Filling of Sedimentary Fissures	217
5.3.1.2	Microfacies Analysis of Neptunian Dikes	221
5.3.1.3	Case Studies of Neptunian Dikes in Carbonates	221
5.3.1.4	Significance of Sediment-Filled Fissures	223
5.3.2	Microfractures and Veins (Calcite Veins)	223
5.3.2.1	Origin and Classification of Calcite Veins	224
5.3.2.2	Descriptive Criteria of Calcite-Filled Microfractures	225
5.3.2.3	Significance of Microfractures in Carbonate Rocks	225
5.3.3	Carbonate Breccias and Conglomerates	228
5.3.3.1	Terminology	228
5.3.3.2	How to Describe Carbonate Breccias?	229
5.3.3.3	Carbonate Breccia Types: Origin, Classification, Criteria	233
5.3.3.4	Carbonate Conglomerates	239
5.3.3.5	Significance of Carbonate Breccias and Conglomerates	242
6	Quantitative Microfacies Analysis	243
6.1	Grain-Size Analysis	243
6.1.1	Grain-Size Analysis: Methods and Aims	244
6.1.1.1	Measuring Grain Sizes and Describing Size Distributions	244
6.1.1.2	Approaches to the Environmental Interpretation of Grain-Size Data	246
6.1.1.3	Grain-Size Analysis in Thin Sections	247
6.1.2	Grain-Size Studies of Modern and Ancient Carbonates	248
6.1.2.1	Grain-Size Studies of Modern Carbonate Sediments	248
6.1.2.2	Application of Grain-Size Analyses to Carbonate Rocks	251
6.1.2.3	Significance of Grain-Size Studies of Carbonate Rocks	253
6.2	Frequency Analysis of Microfacies Data	254
6.2.1	Methods of Frequency Analyses	254
6.2.1.1	Counting	254
6.2.1.2	Estimating	257
6.2.1.3	Image Analysis	259

6.2.1.4	Constituent Ranking, Diversity and Maturity	260
6.2.1.5	Integrated Frequency Studies of Reef Carbonates	260
6.2.2	Practical Advice	261
6.3	Multivariate Microfacies Studies	262
6.3.1	Methods: Variations between Constituents and between Samples	262
6.3.2	Significance of Multivariate Studies: Constituent Analysis as a Clue to Environmental Conditions and Depositional Settings	263
7	Diagenesis, Porosity, and Dolomitization	267
7.1	Carbonate Mineralogy and Diagenetic Processes	267
7.1.1	Modern Carbonate Sediments and Ancient Carbonate Rocks	267
7.1.2	Common Carbonate Minerals	270
7.1.3	Diagenetic Processes and Controls	271
7.1.4	From Soft Sediments to Hard Rocks	272
7.1.5	Oscillating Trends in Phanerozoic Carbonate Mineralogy	272
7.1.5.1	Secular Variations	272
7.1.5.2	How to Recognize Former Aragonite and Mg-Calcite Mineralogy in Ancient Low-Calcite Limestones?	272
7.2	Major Diagenetic Environments	274
7.2.1	Meteoric, Marine and Burial Diagenesis	276
7.2.1.1	Meteoric (Freshwater) Diagenesis	276
7.2.1.2	Mixing Zone and Marine Vadose Environment	276
7.2.1.3	Marine Diagenesis	277
7.2.1.4	Burial Diagenesis	277
7.2.2	Early and Late Diagenesis	278
7.3	Porosity of Carbonate Rocks	278
7.3.1	Porosity Categories, Pore Geometry and Permeability	278
7.3.1.1	Basic Definitions	278
7.3.1.2	Pore Geometry and Permeability	282
7.3.1.3	Porosity Measurements and Pore Types in Thin Sections	282
7.3.2	Porosity Terminology and Classification	283
7.3.3	Porosity in Limestones and Dolomites	288
7.4	Pore-Filling Processes: Cementation	289
7.4.1	Controls on Carbonate Cementation	292
7.4.2	Morphology and Fabrics of Cement Types	295
7.4.2.1	Cement Types	295
7.4.2.2	Cement Fabrics	299
7.4.3	Cement Types and Diagenetic Environments	299
7.4.4	Facies-Controlled Diagenesis	301
7.4.4.1	Carbonate Platforms and Ramps	301
7.4.4.2	Reefs	302
7.4.4.3	Cold-Water vs. Warm-Water Diagenesis	308
7.4.5	Diagenetic Pathways and Patterns	308
7.5	Diagenetic Textures	310
7.5.1	Mechanical Processes: Compaction	311
7.5.2	Chemical Processes: Pressure Solution and Stylolitization	314
7.5.3	Significance of Compaction and Pressure Solution	321
7.6	Neomorphic Processes: Alteration and Recrystallization	321
7.6.1	Recrystallized Carbonate Rocks: What to do?	321
7.6.2	How to Describe Recrystallized Carbonate Rocks?	324
7.7	Sparite: Recrystallization Product or Carbonate Cement?	324
7.8	Dolomitization and Dedolomitization	325
7.8.1	Descriptive Criteria and Terminology of Dolomite Fabrics	328

7.8.1.1	Thin-Section Description and Terminology of Dolomite Rocks	328
7.8.1.2	Dolomite Cement	329
7.8.1.3	Value of Dolomite Textures	330
7.8.2	Some Dolomitization Models	330
7.8.2.1	Dolomites Associated with Evaporites	330
7.8.2.2	Mixing-Water and Seawater Models	331
7.8.2.3	Subsurface Burial Dolomites	332
7.8.3	Dedolomitization	332
7.8.3.1	Textural Criteria for Recognizing Dedolomitization	333
7.8.3.2	Origin of Dedolomite	333
7.8.3.3	Significance of Dedolomitization	334
7.9	Metamorphic Carbonate and Marbles	334
8	Classification – A Name for Your Sample	339
8.1	Basic Concepts	339
8.2	Reef Limestones and Microbial Carbonates (Autochthonous Carbonates) .	340
8.3	Classifications Based on Depositional Texture	348
8.3.1	Prerequisites	348
8.3.2	Original and Expanded Dunham Classification	348
8.3.2.1	Concepts	349
8.3.2.2	Discussion	350
8.3.2	Original and Expanded Folk Classification	356
8.3.2.1	Concepts	356
8.3.2.2	Discussion	361
8.4	Specific Classifications	361
8.4.1	Diagenetic Changes in Depositional Textures	361
8.4.2	Some Nonmarine Carbonates Need very Specific Names	361
8.5	Classification of Mixed Siliciclastic-Carbonate Rocks	361
8.6	A Name for Your Samples: Some Practical Advice	364
9	Limestones are Biological Sediments	369
9.1	Microbial Carbonates and Stromatolites	369
9.1.1	Bacterial Contribution to Carbonate Precipitation	369
9.1.2	How to Recognize Microbial Carbonates?	370
9.1.3	Describing and Classifying Benthic Microbial Carbonates	370
9.1.3.1	Terminology and Descriptive Criteria	370
9.1.3.2	Classification of Benthic Microbial Carbonates	371
9.1.4	Stromatolites are Laminated Microbialites	374
9.1.5	Occurrence and Significance of Microbialites and Stromatolites	377
9.1.5.1	Development through Time	377
9.1.5.2	Paleoenvironmental Significance of Microbial Carbonates	379
9.1.5.3	Economic Importance of Stromatolites	379
9.2	Biogenic Encrustations	379
9.2.1	Criteria and Constraints of Encrusters	381
9.2.2	Phanerozoic Encrusters	384
9.2.3	Significance of Encrustation Patterns in Recognizing Depositional Settings and Environmental Controls	384
9.3	Bioerosion, Boring and Grazing Organisms	386
9.3.1	Recent and Fossil Microborers	387
9.3.2	Recent and Fossil Macroborers	388
9.3.3	Micro- and Macroboring through Time	392
9.3.3.1	Qualitative Changes in Micro- and Macroborer Groups	392
9.3.3.2	Quantitative Changes in the Intensity of Macroboring in Coral Reefs	394

9.3.4	Microborer Associations are Proxies for Paleo-Water Depths	396
9.4	Practical Advice: How to Describe Microbialites and Stromatolites, Biogenic Encrustations and Borings?	396
10	Fossils in Thin Section: It is Not That Difficult	399
10.1	Specifics of Thin-Section Fossils	399
10.1.1	How to Determine Fossils in Thin Sections?	399
10.1.2	Which Fossils in which Time Interval?	400
10.1.3	Practical Advice	401
10.2	Diagnostic Criteria of Fossils in Thin Sections	402
10.2.1	Cyanobacteria and Calcareous Algae	404
10.2.1.1	Cyanobacteria and Calcimicrobes	408
10.2.1.2	Corallinacean and Peyssoneliacean Red Algae	412
10.2.1.3	Solenoporacean Red Algae	418
10.2.1.4	Ancestral Red Algae and Problematic Red Algae	422
10.2.1.5	Udoteacean Green Algae and Gymnocodiacean Algae	422
10.2.1.6	Phylloid Algae	427
10.2.1.7	Dasyclad Green Algae	430
10.2.1.8	Charophyta: Fresh-Water and Brackish-Water Algae	447
10.2.1.9	‘Calcispheres’ and Algal Cysts	452
10.2.2	Foraminifera and other Protozoa	453
10.2.2.1	Foraminifera	453
10.2.2.2	Radiolaria	482
10.2.2.3	Calpionellids	487
10.2.3	Benthic Sessile Organisms	491
10.2.3.1	Sponges	491
10.2.3.2	Hydrozoans	508
10.2.3.3	Corals	509
10.2.3.4	Bryozoans	514
10.2.4	Shells	518
10.2.4.1	Brachiopods	519
10.2.4.2	Bivalves	522
10.2.4.3	Gastropods	529
10.2.4.4	Cephalopods	533
10.2.4.5	Tentaculitids and Other Conical Shells (Cricoconarida; Hyolithida)	537
10.2.4.6	Serpulids and Other Worm Tubes	540
10.2.4.7	Crustacean Arthropods	542
10.2.4.8	Trilobites	547
10.2.4.9	Echinoderms	548
10.2.5	Rare Thin-Section Fossils	558
10.2.6	Microproblematica	559
10.2.6.1	Inventory of Microproblematica	559
10.2.6.2	Discussion of Selected Microproblematica	560
10.3	Biozonation of Platforms with Thin-Section Fossils	570
10.4	Where to Look for Thin-Section Pictures of Fossils and Microfacies Types	571
	Microfacies Interpretation	
11	Summarizing Microfacies Criteria: Microfacies Types	575
11.1	MFT Concepts	575
11.2	How to Differentiate Meaningful Microfacies Types	576
11.3	Making Microfacies Types	584

12	Recognizing Paleoenvironmental Conditions	587
12.1	Reconstructing Environmental Constraints	587
12.1.1	Hydrodynamic Controls	588
12.1.1.1	Hydrodynamic Energy Levels	589
12.1.1.2	Classifying Low-Energy and High-Energy Environments	591
12.1.1.3	Paleocurrent Data	593
12.1.2	Storms	593
12.1.2.1	Storm Deposits (Tempestites) on Shelves, Ramps and Platforms	594
12.1.2.2	Impact of Tropical Storms on Reefs	600
12.1.2.3	Significance of Carbonate Storm Deposits	604
12.1.3	Marine Carbonate Substrates	605
12.1.3.1	Carbonate Substrate Types and Organism-Sediment Interactions	606
12.1.3.2	Recognizing Substrate Types	607
12.1.4	Light	610
12.1.4.1	Zonation and Light Conditions	611
12.1.4.2	Recognition of Photic and Aphotic Conditions	611
12.1.5	Oxygen	612
12.1.5.1	Terminology and Classification	613
12.1.5.2	Recognizing Paleo-Oxygenation	613
12.1.5.3	Case Study: Black Shale Development on a Carbonate Platform	614
12.1.6	Seawater Temperature	615
12.1.6.1	Seawater Temperature: Biotic Proxies	616
12.1.6.2	Geochemical Proxies of Seawater Temperatures	616
12.1.7	Salinity	617
12.1.7.1	Biotic and Microfacies Proxies of Paleosalinity	618
12.1.7.2	Geochemical Proxies of Paleosalinity	619
12.1.7.3	Microfacies Proxies for Hypersaline and Evaporitic Conditions	622
12.1.8	Productivity and Nutrients	623
12.1.8.1	Nutrients	623
12.1.8.2	Estimating Paleonutrient Levels	624

15.1.1	Microfacies Criteria of Paleocaliche	726
15.1.2	Significance of Paleocaliche and Paleosols	728
15.2	Paleokarst and Ancient Speleothems	730
15.2.1	Diagnostic Criteria of Paleokarst and Paleospeleothem Structures	731
15.2.2	Significance of Paleokarst and Cave Carbonates	734
15.3	Travertine, Calcareous Tufa and Calcareous Sinter	734
15.4	Lacustrine and Palustrine Carbonates	737
15.4.1	Microfacies of Lacustrine Carbonates	738
15.4.1.1	Microfacies Criteria	738
15.4.1.2	Microfacies Types of Lacustrine Limestones	740
15.4.1.3	Distribution of Lacustrine Microfacies Types	740
15.4.2	Palustrine Carbonates	742
15.5	Peritidal Carbonates	745
15.5.1	Criteria of Peritidal Limestones	745
15.5.1.1	Definitions	745

15.5.1.2	Major Facies Criteria of Peritidal Carbonates	746
15.5.1.3	Synopsis of Diagnostic Criteria	749
15.5.2	Case Study: Middle Devonian Peritidal Carbonates from Poland	752
15.6	Carbonate Platforms and Ramps	753
15.6.1	Ecological Controls on Platforms and Ramps	753
15.6.2	The Response of Carbonate Platforms to Drowning	756
15.6.2.1	Microfacies Signals of Drowning History	756
15.6.2.2	Case Study: Platform Drowning Reflected by Microfacies	757
15.6.3	Case Studies: Platform and Ramp Carbonates	759
15.6.3.1	A Late Jurassic Bahamian-Type Carbonate Platform from the Northern Calcareous Alps	760
15.6.3.2	A Middle Devonian Ramp from Graz, Southern Austria	768
15.6.3.3	A Late Jurassic/Early Cretaceous Ramp from the Subsurface of Southern Bavaria, Germany	768
15.7	Platform-Slope-Basin Transects	769
15.7.1	Types and Composition of Carbonate Slopes	769
15.7.2	Allochthonous Slope and Basin Deposits: Diagnostic Criteria	771
15.7.2.1	Submarine Rockfalls	771
15.7.2.2	Breccias and Megabreccias	772
15.7.2.3	Debris-Flow Deposits	772
15.7.2.4	Grain-Flow Deposits	773
15.7.2.5	Turbidites	773
15.7.2.6	Sliding and Slumping	779
15.7.3	Microfacies of Slope Carbonates: Case Studies	780
15.7.3.1	Permian of Sicily: Megablocks and Base-of-Slope Carbonates	780
15.7.3.2	Triassic of the Southern Alps: Allochthonous Slope Sediments	781
15.7.3.3	Jurassic of Morocco: Platform-Slope-Basin Transect	784
15.7.3.4	Jurassic of the Northern Calcareous Alps: Detailed Information from Limestone Turbidites on Source and Deposition Patterns	786
15.7.4	Slope Stability Reflected by Texture and Microfacies	786
15.7.5	Tracing Platform-Basin Transitions Using Grain Composition Logs	788
15.7.5.1	Concept and Methods	788
15.7.5.2	Case Study: Late Triassic of the Gosaukamm Region, Austria	789
15.8	Pelagic Deep-Marine Carbonates	793
15.8.1	Setting, Controls and Biota of Pelagic Limestones	793
15.8.2	Examples and Case Studies of Pelagic Carbonates	795
15.8.2.1	Microfacies of Paleozoic Basinal Carbonates	795
15.8.2.2	Microfacies of Mesozoic Basinal Carbonates	796
15.8.3	Contourites	801
16	Realizing Depositional Constraints and Processes	803
16.1	Cyclic Carbonates, Microfacies and Sequence Stratigraphy	803
16.1.1	Cyclic Carbonates	803
16.1.1.1	Cyclic Carbonates: Some Basics	804
16.1.1.2	Microfacies and Cyclic Carbonates	805
16.1.1.3	Case Studies: The Lofer Cycle and the Latemar Cycle (Triassic of the Alps)	808
16.1.2	Carbonate Sequence Stratigraphy	815
16.1.2.1	Sequence Analysis: Some Basics	816
16.1.2.2	Microfacies Data Applied to Sequence Stratigraphy	818
16.1.2.3	Case Studies: Sea-Level Fluctuations and Systems Tracts Documented by Microfacies	822
16.2	Understanding Reef Carbonates	830

16.2.1	What is a Reef?	830
16.2.2	Reef Types	830
16.2.3	Reef Fossils	831
16.2.3.1	Reef Biota: Compositional Changes during Time	831
16.2.3.2	Reef Guilds: Ecologic Units	831
16.2.4	How to Classify Reef Carbonates?	833
16.2.5	Microfacies Approach to Reef Studies	833
16.2.5.1	Basic Constituents of Reef and Mound Carbonates	834
16.2.5.2	Describing Reef Carbonates: A Practical Guide	836
16.2.6	Case Studies of Some Ancient Reefs	836
16.2.6.1	Mud Mounds: The Early Devonian 'Kess Kess' Mounds in the Anti-Atlas, Southern Morocco	838
16.2.6.2	Waulsortian Mud Mounds: Early Carboniferous (Lower Mississippian) Muleshoe Mound, Sacramento Mountains, New Mexico, U.S.A.	842
16.2.6.3	Reefs: The Capitan Reef, Permian Reef Complex, Guadalupe Mountains, Texas and New Mexico, U.S.A.	843
16.3	Fingerprinting Lost Platforms	847
16.3.1	Methods	847
16.3.2	Case Studies	848
16.3.2.1	Case Study: Platform Facies Patterns Derived from the Microfacies of Early Carboniferous Conglomerates (Southern Spain)	848
16.3.2.2	Case Study: Reconstruction of Paleo-Escarpments from Microfacies Data	849
16.4	Recognizing Ancient Cool-Water Carbonates	852
16.4.1	Microfacies Criteria of Non-Tropical Cold-Water Shelf and Reef Limestones	852
16.4.2	Case Study: Early Tertiary Cool-Water Coral Reef	856
16.5	Testing for Ancient Vent and Seep Carbonates	857
16.5.1	Diagnostic Criteria of Ancient Seep and Vent Carbonates	857
16.5.2	Case Studies	858
16.5.2.1	Late Eocene 'Whiskey Creek' Seep Carbonates of Washington State, U.S.A.	859
16.5.2.2	Early Cretaceous Seep Carbonates in the Canadian Arctic	860
16.6	Mixed Carbonate-Siliciclastic Settings and Limestone/Marl Sequences . . .	862
16.6.1	Carbonate-Siliciclastic Environments	862
16.6.1.1	Modern Carbonate-Siliciclastic Environments	862
16.6.1.2	Ancient Mixed Carbonate-Siliciclastic Environments	864
16.6.1.3	Describing Carbonate-Siliciclastic Sediments: Practical Advice	864
16.6.2	Limestone-Marl Sequences: Primary or/and Diagenetic Origin?	866
16.7	Secular Variations in Carbonate Depositional Patterns and Temporal Changes in Microfacies Criteria	868
16.7.1	Changes of Major Carbonate Depositional Environments During Time . . .	868
16.7.1.1	Phanerozoic Carbonate Platforms	869
16.7.1.2	Phanerozoic Reef Patterns	870
16.7.1.3	Pelagic Carbonates	872
16.7.2	Differences in Phanerozoic Benthic Carbonate Factories	873
16.7.3	Temporal Changes in Non-Skeletal and Skeletal Mineralogy	874
16.7.4	Temporal Changes in the Abundance and Significance of Microfacies Criteria	874
	Practical Use of Microfacies	
17	Reservoir Rocks and Host Rocks	877
17.1	Carbonate Hydrocarbon Reservoirs	877
17.1.1	Distribution of Carbonate Reservoirs during Time	878
17.1.2	Depositional Setting and Environmental Controls of Carbonate Reservoirs	878
17.1.2.1	Depositional Setting	878

Contents		XXI
17.1.2.2	Environmental Controls	881
17.1.3	Diagenetic Controls on Carbonate Reservoirs	881
17.1.3.1	Reservoir Properties	881
17.1.3.2	Diagenetic Controls on Reservoir Properties	881
17.1.4	Methods	884
17.1.4.1	Seismic Interpretation	884
17.1.4.2	Log Response	884
17.1.4.3	Cores and Cuttings	885
17.1.4.4	Reservoir-Related Outcrop Analog Studies	885
17.1.5	Microfacies, Lithofacies and Reservoir Rock Types	888
17.1.5.1	Reservoir Heterogeneity	888
17.1.5.2	Relevant Microfacies Data	888
15.1.5.3	Reservoir Rock Types and Facies Criteria	890
17.2	Carbonate-Hosted Mineral Deposits	892
17.2.1	Ore Deposits and Carbonate Settings	892
17.2.2	Microfacies and Ore Deposits	893
18	Carbonate Rock Resources, Facies, Weathering, Preservation	895
18.1	Industrial Use of Carbonate Rocks	895
18.2	Exploration and Exploitation of Carbonate Rocks	895
18.3	Facies and Physical-Chemical Properties of Carbonate Rocks	896
18.4	Weathering, Decay and Preservation of Carbonate Rocks	897
18.4.1	Weathering of Carbonate Rocks	897
18.4.2	Preservation	899
19	Microfacies and Archaeology	903
19.1	Questions and Methods	903
19.2	Building Stones	903
19.2.1	Building Stones: Methods	903
19.2.2	Building Stones: Examples	904
19.3	Mosaic Material	905
19.3.1	Mosaic Material: Methods	905
19.3.2	Mosaic Material: Examples	906
19.4	Works of Art	907
19.4.1	Works of Art: Methods	907
19.4.2	Works of Art: Example	907
19.5	Ceramics	910
19.5.1	Ceramics: Methods	910
19.5.2	Ceramics: Example	912
19.6	Marble Studies	913
19.7	Antony and Cleopatra: Tracing a Famous Love Affair	913
20	Adding Some Samples by Axel Munnecke	916
	Appendix	
1	Answers to Exercises	925
2	Looking at the Attached CD	927
2.1	Comparison Charts	927
2.2	Using the List of References	927
3	Permissions	927
Index		929

Microfacies of Carbonate Rocks

Analysis, Interpretation and Application

Flügel, E.

2010, XXIII, 984 p. 549 illus., 35 in color. With CD-ROM.,

Hardcover

ISBN: 978-3-642-03795-5
