

True Visions

The Emergence of Ambient Intelligence

Bearbeitet von
Emile H.L Aarts, José Luis Encarnação

1. Auflage 2006. Buch. xxvii, 437 S. Hardcover
ISBN 978 3 540 28972 2
Format (B x L): 15,5 x 23,5 cm
Gewicht: 1565 g

[Weitere Fachgebiete > EDV, Informatik > Informationsverarbeitung > Ambient Intelligence, RFID](#)

schnell und portofrei erhältlich bei

The logo for beck-shop.de features the text 'beck-shop.de' in a bold, red, sans-serif font. Above the 'i' in 'shop' are three red dots of increasing size. Below the main text, the words 'DIE FACHBUCHHANDLUNG' are written in a smaller, red, all-caps, sans-serif font.

beck-shop.de
DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

1 Into Ambient Intelligence

<i>E. Aarts and J. Encarnação</i>	1
1.1 The Vision	1
1.2 Trends and Opportunities	2
1.2.1 “More Moore” and “More than Moore”	3
1.2.2 Weaving the Web	3
1.2.3 The Experience Economy	4
1.2.4 Advances in Design	5
1.3 A Brief History of Ambient Intelligence	6
1.3.1 Early Developments at Philips	6
1.3.2 Opening up the Vision	7
1.3.3 Where Are We Headed?	8
1.4 Realizing Ambient Intelligence	10
1.4.1 For the Well-Being	10
1.4.2 Reorientation	11
1.4.3 Impact Through Integration	13
1.4.4 Turning Vision into Reality	14
1.5 Ambient Intelligence Becomes a Success	16

2 Information, Society and Technology

<i>J.-C. Burgelman and Y. Punie</i>	17
2.1 Introduction	17
2.2 The AmI Vision: A Different Encounter Between Technology and Society	19
2.2.1 Shifts from Technology to Usage	19
2.2.2 Shifts in EU RTD Framework Programmes	20
2.2.3 Designing Ambient Intelligence is Designing Social Structures	21
2.3 IST, the European Social Model and the Lisbon Objectives	22
2.4 Foresight in IST in Europe	24
2.4.1 Social Drivers	24
2.4.2 Promising IST Applications	25

2.5	AmI Innovation in Europe	27
2.5.1	Sharing of Knowledge, Learning and Experiences	27
2.5.2	Health Care	28
2.5.3	eGovernance	30
2.5.4	Biometric Identification	31
2.6	Conclusions	32
3 Ambient Culture		
	<i>S. Marzano</i>	35
3.1	Prelude	35
3.2	Questions, Questions, Questions	35
3.3	What Should Ambient Intelligence Do?	36
3.3.1	Fundamental Human Drives	36
3.3.2	Social and Physical Constraints	38
3.3.3	Potential for Growth, Profit, and Wealth	39
3.4	How Will Ambient Intelligence Do What It Does?	39
3.4.1	Relevant, Meaningful, Understandable	40
3.5	Some Examples	41
3.5.1	La Casa Prossima Futura	41
3.5.2	New Nomads	42
3.5.3	Living Memory	43
3.6	How Do We Create the “Right” Ambient Intelligence – the Relevant Hypothesis for a Desirable Future?	44
3.6.1	Imagineering	45
3.6.2	Communication	46
3.6.3	Getting Real	46
3.6.4	Into Production	47
3.7	Business Issues	47
3.7.1	Partnerships	47
3.7.2	Bottom of the Pyramid	48
3.8	Deeper Issues	49
3.8.1	Educating Our Intelligent Objects	49
3.8.2	The Next Challenge	50
3.8.3	Where Is the Boundary?	50
3.8.4	Which Reality Is Real?	51
3.9	How to Measure Intelligence?	52
3.10	The Culture of Ambient Intelligence – Human Culture in the Broadest Sense	52
4 Smart Materials		
	<i>D.J. Broer, H. van Houten, M. Ouwerkerk, J.M.J. den Toonder, P. van der Sluis, S.I. Klink, R.A.M. Hikmet, and R. Balkenende</i>	53
4.1	Introduction	53
4.2	Chromogenic Materials	54

4.3	Thermochromic Skins Based on Liquid Crystals	56
4.4	Switchable Mirrors	58
4.5	Switchable Cholesteric Mirrors	61
4.6	Electronic Skins and Paintable Displays	63
4.7	Polymers with a Mechanical Response	66
4.7.1	Electrically Stimulated Responsive Polymers	68
4.7.2	Temperature-Driven Responsive Polymers	76
4.7.3	Light-Driven Polymer Smart Materials	79
4.7.4	Other Stimuli	81
5 Electronic Dust and e-Grains		
	<i>H. Reichl and M. J. Wolf</i>	83
5.1	Introduction	83
5.2	Basic Construction of Self-Sufficient Wireless Sensor Nodes – e-Grains	85
5.3	System Design	87
5.4	System Integration Technologies	89
5.4.1	Stacking of Organic Substrates	90
5.4.2	Integration of Flexible Functional Layers	93
5.5	Embedded Components in Organic Substrates	101
5.6	Wafer-Level Integration by Chip or Wafer Stacking	102
5.7	Autonomous Energy Supply for e-Grains	105
5.8	Wafer-Level Integration of Lithium-Polymer Batteries	106
5.9	Micro-fuel Cell Integration	107
5.10	Summary and Outlook	110
6 Electronic Textiles		
	<i>H. Reichl, C. Kallmayer, and T. Linz</i>	113
6.1	Introduction	113
6.2	Conductors	115
6.2.1	Textile Wires	115
6.2.2	Metallized Threads	115
6.2.3	Intrinsically Conductive Yarn	116
6.2.4	Resistance	116
6.3	Textile Processing with Conductive Threads	117
6.3.1	Weaving	117
6.3.2	Embroidery	118
6.4	Interconnection and Packaging	119
6.4.1	Embroidered Contacts	119
6.4.2	Detachable Interconnections	120
6.4.3	Dimensions and Precision	121
6.4.4	Encapsulation	121
6.5	Applications	122
6.5.1	ECG Shirt	122
6.5.2	Communication Jacket	124
6.5.3	Textile Transponder	125

6.6	Future Challenges	127
6.7	Conclusion and Outlook	129
7 Computing Platforms		
	<i>H. De Man and R. Lauwereins</i>	131
7.1	Reconsidering the Vision	131
7.2	“More-Moore”: Managing Giga-complexity	132
	7.2.1 Managing the Architectural Gap	133
	7.2.2 Managing the Physical Gap: Nano-scale Realities Hit Platform Architects	136
	7.2.3 Future Computing Platforms: Towards Highly Parallel Tile-based Network-on-a-Chip (NoC)	139
	7.2.4 The Devil Is in the Software	143
7.3	“More-Than-Moore”: Ultra-creativity for Ultra-low Power and Cost	144
7.4	Conclusions	146
8 Software Platforms		
	<i>N. Georgantas, P. Inverardi, and V. Issarny</i>	149
8.1	Introduction	149
8.2	Software Systems for Ambient Intelligence	150
	8.2.1 Software Architectures	151
	8.2.2 Middleware	152
	8.2.3 Architectural Framework for Software Systems	153
8.3	Aura: User Task-Driven Environment Configuration	155
	8.3.1 Architecture	155
	8.3.2 Triggers to Dynamic Behavior	156
	8.3.3 Dynamic Behavior	157
8.4	Gaia: Programmable Active Spaces	158
	8.4.1 Architecture	158
	8.4.2 Triggers to Dynamic Behavior	160
	8.4.3 Dynamic Behavior	161
8.5	WSAMI: Ad hoc, Decentralized AmI Environments	162
	8.5.1 Architecture	162
	8.5.2 Triggers to Dynamic Behavior	164
	8.5.3 Dynamic Behavior	165
8.6	Assessment and Research Challenges	166
9 Mobile Computing		
	<i>B. Svendsen</i>	169
9.1	Computing Everywhere and Anywhere	169
9.2	Applications of Mobile Computing	170
	9.2.1 Your Personal Economy Will Be in Your Pocket	170
	9.2.2 Electronic Tags Replace Bar Codes and Add More to It ...	171
	9.2.3 The House Knows What You Are Up To	171
	9.2.4 Attentive Vehicles – Road and Transport Safety	172

9.2.5	Public Services for Citizens	173
9.2.6	Monitoring Product Quality Improves Food Safety	173
9.3	In the Bottom Lies the Technology	174
9.3.1	Wireless Communication	174
9.3.2	Wireless Location	175
9.3.3	Multistandard and Flexible – Software Radio	176
9.3.4	Wireless Proximity Technologies – Electronics Tags	176
9.3.5	Wireless Concepts and Technologies for Novel Applications	178
9.4	Challenges Imposed on the Domain by Ambient Intelligence	179
9.5	How Far Have We Come?	180
9.5.1	Buying and Paying by the Mobile Phone	180
9.5.2	Retail Chains Is Starting to Use Electronic Tags	180
9.5.3	Electronic Luggage Tags at Airports	181
9.5.4	United States Introduces Electronic Passports	181
9.5.5	Electronic Shepherds and Surveillance	182
9.5.6	Mobile Phone as Tourist Guide	183
9.5.7	Attentive Vehicles Seek to Prevent Road Accidents	183
9.6	Concluding Remarks	184
10 Broadband Communication		
	<i>P. Lagasse and I. Moerman</i>	185
10.1	Vision	185
10.2	Ongoing Evolutions in Broadband Communication	186
10.3	Too Many Wireless Technologies Today?	187
10.3.1	Overview of Existing Wireless Technologies	187
10.3.2	Do We Really Need All Those Technologies?	190
10.4	How to Deal with All These Wireless Technologies?	192
10.4.1	The Concept of Personal Networking	192
10.4.2	Main Challenges of Personal Networks	196
10.4.3	Some Personal Network Solutions	199
10.5	Conclusions	204
11 e-Infrastructure and e-Science		
	<i>T. Hey, D. De Roure, and A.E. Trefethen</i>	209
11.1	Introduction	209
11.2	e-Science and the Grid	210
11.2.1	The e-Science Vision	210
11.2.2	The e-Science Infrastructure	211
11.2.3	Web Service Grids	212
11.2.4	The “Data Deluge” as a Driver for e-Science	213
11.3	Pervasive Computing and Ambient Intelligence	215
11.3.1	Sensor Networks	216
11.3.2	Interaction	217
11.3.3	Intelligence	217

XVIII Contents

11.4	The Semantic Web	218
11.4.1	Towards a Semantic Grid.....	219
11.4.2	Semantic Web and Pervasive Computing	220
11.5	The Symbiosis of Grid and Ambient Intelligent Computing	221
11.5.1	Devices Need the Grid for Computation	221
11.5.2	Devices Need the Grid for Integration.....	221
11.5.3	The Grid Needs Devices to Interface with the Physical World.....	222
11.5.4	Virtualization	222
11.5.5	The Information Systems Perspective	222
11.5.6	Grid Computation on Networks of Devices	223
11.5.7	Self-organization	223
11.6	Case Studies	223
11.6.1	CombeChem.....	224
11.6.2	Grid Based Medical Devices for Everyday Health	225
11.6.3	FloodNet.....	226
11.7	Challenges to the Vision.....	227
11.8	Conclusions.....	228
12 Context Aware Services		
<i>J.L. Crowley, P. Reignier, and J. Coutaz</i>		231
12.1	Introduction	231
12.2	A Brief History of Context	232
12.2.1	Context in Artificial Intelligence.....	232
12.2.2	Context in Computer Vision	233
12.2.3	Context in Mobile Computing	233
12.2.4	Defining Context	233
12.3	A Conceptual Framework for Context Aware Systems	234
12.3.1	A Layered Model for Context Aware Services	235
12.4	Defining Situation Models as Interaction Scripts	236
12.4.1	Principle 1: Keep It Simple	237
12.4.2	Principle 2: Behaviour Drives Design.....	237
12.5	Example: Context Aware Automatic Video Acquisition.....	238
12.5.1	Sample Recording from Context Aware Automatic Video Acquisition System	242
12.6	Learning Context Models: Adaptation and Development	242
12.7	Conclusions.....	244
13 Computational Intelligence		
<i>E. Aarts, H. ter Horst, J. Korst, and W. Verhaegh</i>		245
13.1	Introduction	245
13.2	Machine Intelligence	246
13.2.1	Artificial Intelligence.....	246
13.2.2	Movie Script Scenarios for Ambient Intelligence	247
13.2.3	Social Versus Cognitive Intelligence	249

13.3	AmI Elements of Social Intelligence	250
13.3.1	See, Hear, Feel	251
13.3.2	Understand, Interpret, Relate	252
13.3.3	Look, Find, Remember	253
13.3.4	Act, Adapt, Learn	255
13.3.5	Create, Express, Emerge	256
13.4	Computational Paradigms	257
13.4.1	Search	257
13.4.2	Reasoning	261
13.4.3	Learning	265
13.4.4	Evolution	268
13.5	Intrinsic Limitations	271
13.6	Concluding Challenges	272
14 Social User Interfaces		
	<i>A. Nijholt, D. Heylen, B. de Ruyter, and P. Saini.</i>	275
14.1	Introduction	275
14.2	Social Interfaces and Multimodal Interaction	277
14.3	The Impact of Affect and Social Intelligence: the iCat Case	280
14.3.1	Experiment	281
14.3.2	Tasks	283
14.3.3	Measures	283
14.3.4	Results	284
14.4	Modeling Affect in a Dialogical Robot	285
14.4.1	Multimodal Interaction	285
14.4.2	Affective Interactions	287
14.5	Conclusions and Future Research	289
15 Multi-modal Human–Environment Interaction		
	<i>R. Wasinger and W. Wahlster.</i>	291
15.1	Introduction	291
15.2	Tangible Multi-modal Dialog Scenario	292
15.3	Instrumented Environment Infrastructure	294
15.4	Symmetric Multi-modal Interaction	296
15.4.1	Base Modalities	297
15.4.2	Symmetric Modality Combinations	298
15.4.3	Output Modality Allocation Strategy	299
15.5	Anthropomorphized Products	300
15.5.1	The Role of Anthropomorphization	300
15.5.2	Adding Human-like Characteristics	301
15.5.3	State-Based Object Model	302
15.6	Usability Study	303
15.6.1	Method	303
15.6.2	Results	304
15.6.3	Lessons Learnt	305
15.7	Conclusions and Future Work	305

16 Intelligent Media

<i>P. Treleaven and S. Emmott</i>	307
16.1 Introduction	307
16.2 Emergence of Intelligent Media	308
16.3 Economic Importance of the Creative Industries	309
16.4 Intelligent Media: Key Concepts and Technologies	309
16.4.1 Key Concepts	310
16.4.2 Key Technologies	311
16.5 Intelligent Media and the Creative Sectors	312
16.5.1 Film and Television	313
16.5.2 Music	313
16.5.3 Cultural Sectors	315
16.5.4 Design	316
16.5.5 Leisure Sectors	316
16.5.6 Advertising	317
16.6 Conclusion	319

17 Smart Environments

<i>T. Kirste</i>	321
17.1 Introduction	321
17.2 Smart Environments	322
17.3 Building Smart Environments:	
the Ensemble Challenge	325
17.3.1 Another Scenario	325
17.3.2 ... and Its Implications	326
17.3.3 Significant Changes	327
17.4 The Source of Strategy	329
17.5 Goal-Based Interaction	330
17.6 Appliances and Event Processing Pipelines	333
17.6.1 Looking at Appliances	333
17.6.2 Towards a Middleware for Self-Organizing Ensembles	334
17.6.3 Ensemble Organization by SodaPop	336
17.7 Conclusion	337

18 Sensory Augmented Computing

<i>B. Schiele</i>	339
18.1 Introduction	339
18.2 Sensing Opportunities for Ambient Intelligence	340
18.2.1 The Logical View: Dimensions of Sensing	340
18.2.2 Physical View: Placement of Sensors	341
18.2.3 Sensors in AmI Research	341
18.2.4 Discussion	343
18.3 Proactive Furniture	343
18.4 Sensing a Furniture Assembly	344
18.4.1 The IKEA PAX Wardrobe	344

18.4.2	Assembly Plan	345
18.4.3	Observing the User's Actions	347
18.4.4	Sensor Experiments	348
18.4.5	Detecting Partial Actions	349
18.4.6	Detecting Complete Actions	350
18.5	Situation-Aware Affordances	351
18.5.1	General Concept	351
18.5.2	Specific Solution	352
18.5.3	Summary of a User Study	354
18.6	Conclusions and Discussion	355
19 Experience Design		
	<i>B. Eggen and S. Kyffin</i>	359
19.1	Introduction	359
19.2	Looking to the Future	360
19.2.1	Disappearing Technology	360
19.2.2	The Future Seen from a People's Point of View	363
19.3	The Home Experience	364
19.4	Design Insights of AmI Systems	365
19.5	New Directions	370
19.5.1	Multimodal Interaction	370
19.5.2	Interaction with Intelligent Tangible Objects	372
19.5.3	Ambient Culture	373
19.5.4	User-Centered Design	374
19.6	Conclusion	376
20 Experience Research		
	<i>E.T. Hvannberg</i>	377
20.1	Introduction	377
20.2	Goals of Experience Research	379
20.3	EARC Life Cycle Model	380
20.3.1	Exploration of the Problem Situation	381
20.3.2	Feasibility and Quality of Interaction	382
20.3.3	Demonstration and Validation	383
20.3.4	Assisted Reality	384
20.4	Facilitators of Experience Research	385
20.4.1	Prototypes	385
20.4.2	Experiments	387
20.4.3	Experience and Knowledge Management	388
20.4.4	Cooperation	388
20.5	Example Developments in Experience Research	389
20.5.1	Living Tomorrow	389
20.5.2	Philips HomeLab	389
20.5.3	Telenor's House of the Future	390
20.5.4	Brazilian Sao Paulo e-Government Facility	390
