

Seaside Operations Planning in Container Terminals

Bearbeitet von
Frank Meisel

1. Auflage 2009. Buch. xx, 213 S. Hardcover
ISBN 978 3 7908 2190 1
Format (B x L): 15,5 x 23,5 cm
Gewicht: 990 g

Wirtschaft > Wirtschaftssektoren & Branchen: Allgemeines > Transport- und
Verkehrswirtschaft

DIE FACHBUCHHANDLUNG

Die Online-Fachbuchhandlung beack-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.

Contents

1	Introduction	1
1.1	Motivation and Scope of Research	1
1.2	Outline	3
2	Maritime Container Transport	5
2.1	A Brief History	5
2.2	Organization of Container Transports	7
2.3	Layout and Technical Equipment of a Container Terminal	10
2.3.1	Quay Area and Quay Cranes	11
2.3.2	Transport Area and Transport Vehicles	12
2.3.3	Yard Area and Yard Cranes	14
2.3.4	Truck and Train Area	15
3	Operational Planning Problems	17
3.1	Distinction of Planning Levels	17
3.2	Seaside Operations Planning	18
3.2.1	Berth Allocation	18
3.2.2	Quay Crane Assignment	21
3.2.3	Quay Crane Scheduling	23
3.2.4	Stowage Planning	24
3.3	Internal Operations Planning	25
3.3.1	Yard Management	25
3.3.2	Yard Crane Scheduling	26
3.3.3	Horizontal Transport	27
3.4	Landside Operations Planning	28
3.5	Workforce Planning	29
4	Related Work on Seaside Operations Planning	31
4.1	Related Work on the BAP and the QCAP	31
4.1.1	Classification Scheme	31
4.1.2	Problem Classification	33

4.1.2.1	Discrete Problems	35
4.1.2.2	Continuous Problems	36
4.1.2.3	Hybrid Problems	38
4.2	Related Work on the QCSP	39
4.2.1	Classification Scheme	39
4.2.2	Problem Classification	40
4.2.2.1	Scheduling of Complete Bays	40
4.2.2.2	Scheduling of Container Groups	42
4.2.2.3	Further Problems	43
4.3	Related OR Problems	44
5	Integration Concepts for Seaside Operations Planning	47
5.1	Sequential Solution	47
5.2	Integration Concepts in the Literature	50
5.3	Designing a Comprehensive Integration Concept	52
6	Berth Allocation and Quay Crane Assignment	55
6.1	Modeling the BACAP	55
6.1.1	Problem Description and Assumptions	55
6.1.2	Resource Utilization	56
6.1.3	Cost Structure	58
6.1.4	Optimization Model	59
6.2	Solution Methods	61
6.2.1	Construction Heuristic	61
6.2.2	Local Refinements	64
6.2.2.1	Quay Crane Resource Leveling	64
6.2.2.2	Spatial and Temporal Shifts	65
6.2.3	Meta-heuristics	67
6.2.3.1	Squeaky Wheel Optimization	67
6.2.3.2	Tabu Search	69
6.2.4	Specific Quay Crane Assignment	70
6.3	Computational Study	70
6.4	Summary	82
7	Quay Crane Scheduling	85
7.1	Modeling the QCSP	85
7.1.1	Problem Description and Assumptions	85
7.1.2	Conventional Formulation of Interference Constraints	86
7.1.3	Corrected Formulation of Interference Constraints	89
7.1.4	Optimization Model	91
7.2	Unidirectional Scheduling Heuristic	94
7.2.1	Idea and Outline	94
7.2.2	Assignment of Tasks to Cranes	96
7.2.3	Sequencing of Tasks	99
7.2.4	Scheduling of Tasks	100

7.3	The QCSP with Time Windows	103
7.3.1	Declaration of Time Windows for Cranes	103
7.3.2	Optimization Model	107
7.3.3	Adaptation of the UDS Heuristic	107
7.4	Computational Study	109
7.5	Summary	117
8	Integration of Quay Crane Scheduling into the BACAP	119
8.1	Idea and Outline	119
8.2	Preprocessing Phase	121
8.2.1	Deriving Crane Utilization Rates	122
8.2.2	Applying Crane Utilization Rates Within the BACAP	124
8.3	Feedback Loop Phase	126
8.3.1	Postprocessing of a QCSPTW	126
8.3.2	Reinstalling Quay Crane Schedules	128
8.3.3	Repairing Infeasible BACAP Solutions	131
8.4	Computational Study	134
8.5	Summary	142
9	Conclusions	143
Appendix A		147
A.1	The Berth Allocation and Crane Assignment Model of Park and Kim (2003)	147
Appendix B		149
B.1	Pseudocodes	149
Appendix C		157
C.1	A Lower Bound for the QCSP	157
Appendix D		159
D.1	A Lower Bound for the QCSPTW	159
Bibliography		161
