

Contents

Preface to the second edition	page xiii
Preface	xv
Acknowledgements	xvii
General references	xx
<hr/>	
Chapter 1	Problems of adaptation to a terrestrial environment
	1
Perspective: the origin of vascular plants	1
Structural adaptations	3
Preview of subsequent chapters	5
References	6
Further reading	7
<hr/>	
Chapter 2	An overview of plant structure and development
	8
Perspective: origin of multicellularity	8
Some aspects of the shoot system of the vascular plant	10
Apical meristems	13
Primary tissue regions of the stem and root	17
Vascular bundle types	23
Secondary growth	26
Cells of the xylem	29
Cells of the phloem	33
References	35
Further reading	36
<hr/>	
Chapter 3	The protoplast of the eukaryotic cell
	38
Perspective	38
Morphology of the protoplast	39
Vacuoles	51
Movement of organelles in the protoplast	51
Ergastic substances	53
References	55
Further reading	57
<hr/>	
Chapter 4	Structure and development of the cell wall
	58
Perspective	58
Structure and composition of the cell wall	59
Growth of the cell wall	65
Cell wall development	68

Cambridge University Press

Charles B. Beck

Table of Contents

[More information](#)

Plasmodesmata	72
References	77
Further reading	81

Chapter 5	Meristems of the shoot and their role in plant growth and development	83
------------------	--	----

Perspective	83
Apical meristems	83
Formation of leaf primordia	90
Transitional tissue regions	92
Intercalary meristems	95
The primary peripheral thickening meristem of monocotyledons	96
Cell growth and development	97
The effect of hormones on cell growth and development	98
Genetic control of cell growth and development	99
Role of the cytoskeleton in cell growth and development	100
Cell shaping by microtubules	102
References	103
Further reading	106

Chapter 6	Morphology and development of the primary vascular system of the stem	108
------------------	--	-----

Perspective	108
Cellular composition and patterns of development of primary xylem	109
Cellular composition and patterns of development of primary phloem	112
Differentiation of primary vascular tissues	113
The role of auxin in the development of the primary vascular system	119
References	121
Further reading	122

Chapter 7	Sympodial systems and patterns of nodal anatomy	123
------------------	--	-----

Perspective: leaf traces	123
Nodal structure of pteridophytes	123
Sympodial systems of seed plants	125
Leaf trace lacunae	134
The cauline vs. foliar nature of vascular bundles in the eustele	135
Phyllotaxy	136
References	139
Further reading	140

Chapter 8	The epidermis	141
	Perspective	141
	Epidermis of the shoot	141
	Epidermis of the root	149
	Stomata	149
	Signal transduction and movement in guard cells	152
	Development of stomata	153
	References	155
	Further reading	156
Chapter 9	The origin of secondary tissue systems and the effect of their formation on the primary body in seed plants	157
	Perspective: role of the vascular cambium	157
	The effect of secondary growth on the primary body	160
	The effect of secondary growth on leaf and branch traces	162
	References	165
	Further reading	165
Chapter 10	The vascular cambium: structure and function	166
	Perspective	166
	Structure of the vascular cambium	166
	General overview of cambial activity	169
	Plant hormones and cambial activity	173
	Submicroscopic structure of cambial initials	174
	The onset of dormancy and the reactivation of dormant cambium	175
	Cytokinesis in fusiform initials	177
	The problem of differential growth of cambial cells and immature cambial derivatives	178
	References	179
	Further reading	182
Chapter 11	Secondary xylem	184
	Perspective	184
	Overview of the structure of secondary xylem	184
	Secondary xylem of gymnosperms	187
	Resin ducts	193
	Secondary xylem of dicotyledons	194
	Differentiation of tracheary elements	199
	Patterns of distribution of xylary elements and rays	207
	Tyloses	211
	Evolution in secondary xylem of dicotyledons	213
	Mechanism of water transport	215

Table of Contents

[More information](#)

References	216
Further reading	220

Chapter 12 The phloem	222
--------------------------------	-----

Perspective: evolution of the phloem	222
Gross structure and development of the phloem	223
The nature and development of the cell wall of sieve elements	228
Role of the cytoskeleton in wall development	231
The nature and development of the protoplast of sieve elements	232
Nature and function of P-protein	234
Distinctive features of the phloem of gymnosperms	236
The nature and function of companion cells and Strasburger cells	237
The mechanism of transport in the phloem	241
References	242
Further reading	245

Chapter 13 Periderm, rhytidome, and the nature of bark	247
---	-----

Perspective	247
Periderm: structure and development	247
Formation of rhytidome	250
Lenticels	252
The outer protective layer of monocotyledons	253
References	254
Further reading	254

Chapter 14 Unusual features of structure and development in stems and roots	255
--	-----

Perspective	255
Primary peripheral thickening meristem	255
Secondary growth in monocotyledons	256
Anomalous stem and root structure	257
References	263
Further reading	263

Chapter 15 Secretion in plants	264
---	-----

Perspective	264
Substances secreted by plants	264
Mechanisms of secretion	265
Internal secretory structures	266
External secretory structures	270
References	276
Further reading	278

Chapter 16 The root	279
Perspective: evolution of the root	279
Gross morphology	281
Contractile roots and other highly specialized root systems	282
Apical meristems	283
The quiescent center and its role in development	286
Primary tissues and tissue regions	288
Lateral transport of water and minerals in the young root	295
Development of primary tissues	297
Auxin and tissue patterning	301
Lateral root development	302
Adventitious roots	306
Secondary growth	306
The root cap: its function and role in gravitropism	307
Mycorrhizae	312
Nitrogen fixation in root nodules	313
Root–stem transition	315
References	316
Further reading	321
Chapter 17 The leaf	324
Perspective: evolution of the leaf	324
Basic leaf structure	325
Leaf development	334
The role of the cytoskeleton in leaf development	340
The role of genetics in leaf development	341
Variations in leaf form, structure, and arrangement	343
Structure in relation to function	346
Photosynthesis and phloem loading	346
Leaf structure of C ₃ and C ₄ plants	348
Supporting structures in leaves	349
Transfusion tissue in conifers	350
Leaf abscission	351
References	353
Further reading	357
Chapter 18 Reproduction and the origin of the sporophyte	361
Perspective: the plant life cycle	361
Reproduction in gymnosperms	362
Reproduction in angiosperms	366
Development of the seed in angiosperms	373
Fruit development and the role of fruits in seed dispersal	377
Seed germination and development of the seedling	380
Floral morphogenesis	381
Pollen–pistil interactions	384

Table of Contents
[More information](#)

Self-incompatibility	387
Role of the cytoskeleton in pollen tube growth	388
References	390
Further reading	394
Glossary	398
Index	433
