

Contents

Preface.....	v
Authors and Acknowledgements	vii
1 Introduction.....	1
Yoshihiko Ohama and Dionys Van Gemert	
2 Principles of TiO₂ Photocatalysis.....	5
Marta Castellote and Nicklas Bengtsson	
2.1 Definition of Photocatalysis.....	5
2.2 Oxidation of Organic Molecules by Photocatalysis.....	6
2.3 Other Chemical Concepts of Interest.....	7
2.4 Principles of TiO ₂ Photocatalysis.....	7
2.4.1 Oxidation-Reduction Reactions	8
2.4.2 Development of Superhydrophilicity	9
3 Application of TiO₂ Photocatalysis to Cementitious Materials for Self-Cleaning Purposes	11
Anibal Maury Ramirez and Nele de Belie	
3.1 Introduction.....	11
3.2 Self-Cleaning on Cementitious Materials	13
4 Application of Antibacterial and Self-Cleaning Effects to Noncementitious Construction Materials.....	17
Yoshimitsu Saeki	
4.1 Introduction.....	17
4.2 How to Form Photocatalyst Films on Surfaces of Construction Materials	18
4.3 Functional Design and Supplement of Photocatalytic Effect in the Dark.....	19

4.3.1	Addition of Silica- or Silicon-Based Water-Retaining Substances.....	19
4.3.2	Addition of Antibacterial Metals Such as Cu and Ag.....	19
4.4	Photocatalysts Applied to Noncementitious Construction Materials.....	20
4.4.1	Exterior Construction Materials.....	20
4.4.2	Interior Construction Materials.....	21
5	Applications of TiO₂ Photocatalysis for Air Purification	23
	Anne Beeldens, Luigi Cassar, and Yoshihiko Murata	
5.1	The TiO ₂ -and-Cement System	23
5.2	Air Purification Systems by Removing NO _x	24
5.3	Photocatalytic Blocks.....	26
5.3.1	Feature of Photocatalytic Blocks	26
5.3.2	NO _x Removal Performance of Photocatalytic Blocks.....	27
5.3.3	Examples of Applications	30
5.4	Photocatalytic Pavements by Coating of Photocatalytic Polymer-Modified Pastes	32
6	Standardization of Testing Methods for Construction Materials with TiO₂ Photocatalyst.....	37
	Kenji Motohashi, Frank Dehn, and Yoshihiko Ohama	
6.1	Introduction.....	37
6.2	The Existing Standards	38
7	Conclusions.....	43
	Yoshihiko Ohama and Dionys Van Gemert	
	References.....	45
