1	Introduction to Diabetic Neuropathies	1
	Definition	1
	Epidemiology and Natural History	2
	Incidence and Prevalence	2
	Risk Factors	3
	Natural History	4
	References	4
2	Classification and Clinical Features	7
	Classification	7
	Sensory Neuropathies	8
	Chronic Sensorimotor Distal	
	Symmetrical Polyneuropathy	8
	Acute Sensory Neuropathy	11
	The Effects of Painful Neuropathic	
	Symptoms on Negative Affect	
	and Quality of Life	13
	Focal and Multifocal Neuropathies	15
	Mononeuropathies	15
	Cranial Neuropathies	17
	Diabetic Amyotrophy	17
	Diabetic Truncal Radiculoneuropathy	18
	Chronic Inflammatory Demyelinating	
	Polyneuropathy	18
	Autonomic Neuropathy	19
	References	21

3	Diagnosis and Staging	23
	Patient History	23
	Patient Description of Pain	25
	Positive and Negative Sensory Symptoms	26
	Assessment Scales	27
	Visual Analogue and Verbal	
	Descriptor Scales	27
	Likert Scales	28
	McGill Pain Questionnaire	28
	Brief Pain Inventory	28
	Neuropathic Pain Scale	28
	Leeds Assessment of Neuropathic	
	Symptoms and Signs Pain Scale	29
	NeuroQoL	29
	Other Assessment Scales	29
	Clinical Examination	30
	Quantitative Sensory Testing	30
	Electrophysiological Testing	33
	Diagnosing Cardiovascular	
	Autonomic Neuropathy	33
	Staging of Neuropathy	35
	When to Refer to a Neurologist	36
	References	37
4	Management of Neuropathic Pain	41
	Metabolic Control	41
	Pharmacological Treatments	43
	Tricyclic Antidepressants	43
	Selective Serotonin Reuptake Inhibitors	45
	Serotonin and Noradrenaline	
	Reuptake Inhibitors	45
	Anticonvulsants	46
	Local Anaesthetic/Anti-arrhythmic	
	Agents	47
	Opioids	48
	Comparative Trials	49

Topical Treatments	49
Capsaicin	50
Lidocaine Patches.....	50
Isosorbide Dinitrate Spray	50
Non-pharmacological Treatments	51
Acupuncture	51
Electrical Therapy	51
Treatment of Cardiovascular	
Autonomic Neuropathy	52
Guidelines on the Pharmacological Treatment	
of Diabetic Neuropathic Pain.....	52
