Table of Contents

List of Tables	xiii
List of Figures and Boxes.....	xv
List of Acronyms and Abbreviations.....	xvii
Acknowledgements	xxi
1. Introduction.....	1
1.1 Objectives of the Study.....	3
1.2 Data, Methodology, and Hypotheses.....	4
1.3 Content Outline.....	4
2. The International Climate Regime, its Clean Development Mechanism (CDM) and the Link to Rural Development	7
2.1. The International Climate Regime and the Clean Development Mechanism (CDM).....	7
2.2. Land Use, Land-Use Change and Forestry (LULUCF) Projects under the CDM and the Generation of ‘Sequestration Credits’	12
2.3. Carbon Sequestration Projects under the Broader Framework of ‘Payments for Environmental Services’ (PES).....	16
2.4. Carbon Mitigation and Potential Developmental Benefits of LULUCF Projects – Some Prospects and Potential Pitfalls.....	19
3. Case study: The International Small Group & Tree Planting Program (TIST).....	27
3.1. TIST: Program Design and Purpose.....	27
3.2. The Agricultural Household Survey – Sampling Procedures and Data Collection	31
3.2.1. Sample size	33
3.2.2. Administrative and geographical characteristics of the survey area.....	34
3.2.3. Village selection and sampling of households	36
3.2.4. Predominant farming systems in the research area	36
3.3. Case Study Results	38
3.3.1. Household Preferences	38
3.3.2. Resource Endowments	43
3.3.3. Market Incentives.....	49
3.3.4. Biophysical Factors	55
3.3.5. Risk and Uncertainty	60
3.3.6. Social Capital	64
4. The Adoption of Carbon Farming – Modeling Farmers’ Decisions	71
4.1. Agroforestry Adoption – Theory and Literature Review.....	71
4.1.1. Economic variables determining adoption decisions	74
4.1.2. Social variables determining adoption decision	77

4.2. A Theoretical Model for the Adoption of Carbon Farming	80
4.3. Factor Categories Determining Participation	83
5. Structural Equation Modeling (SEM) to represent farmer decisions	87
5.1. The Concept of Structural Equation Modeling	89
5.2. Model Specification and Identification	93
5.3. Model Estimation.....	102
5.4. Model Testing and Test Statistics	108
5.5. Model Modification	117
5.6. Model Results.....	123
6. Synthesis – The Model Results and the Issue of Participation	133
6.1. Asset-based Project Impacts on Participants	139
6.1.1. Natural Assets	140
6.1.2. Social Assets	144
6.1.3. Human Assets	145
6.1.4. Physical Assets.....	146
6.1.5. Financial Assets	146
6.1.6. Political Assets.....	149
6.2. Potential Impacts on Other Groups	151
7. Conclusions and Policy Recommendations	153
7.1. Outlook – Limitations and Further Research.....	160
App. 1 Residual Covariances for Initial Model.....	163
App. 2 Standardized Residual Covariances for Initial Model	164
App. 3 Initial Model: Modification Indices Regression Weights	165
App. 4 Household Questionnaire.....	166
App. 5 Community Questionnaire	175
References.....	180
