Part I Nonsmooth Analysis Theory

1	Nonsmooth Concepts	3
1.1	Introduction	3
1.2	From Derivatives to Subdifferentials	4
1.2.1	Unconstrained Minimization Problems	5
1.2.2	Constrained Minimization Problems	8
1.3	Subdifferentials	10
1.3.1	The Generalized Gradient (Clarke Subdifferential)	10
1.3.2	Other Concepts of Subdifferentials	15
1.4	Tangent Cones	17
1.5	Normal Cones	19
1.5.1	The Convexified (Clarke) Normal Cone	20
1.5.2	The Proximal Normal Cone	20
1.5.3	The Fréchet Normal Cone (Prenormal cone)	25
1.5.4	The Basic Normal Cone (Limiting Normal Cone or Mordukhovich Normal Cone)	27
1.6	Commentary to Chap. 1	29

Part II Regularity Concepts in Nonsmooth Analysis Theory

2	Regularity of Sets	33
2.1	Motivations	33
2.1.1	Calculus Rules	33
2.1.2	Differential Inclusions	34
2.2	Tangential Regularity of Sets	35
2.3	Fréchet and Proximal Normal Regularity of Sets	37
2.4	Scalar Regularity of Sets	37
2.5	Scalarization of Tangential Regularity: $[(TR) \Leftrightarrow (DR)]?$	40
2.6	Scalarization of Fréchet Normal Regularity: $[(FNR) \Leftrightarrow (FSR)]?$	44
2.7	Scalarization of Proximal Normal Regularity: $[(PNR) \Leftrightarrow (PSR)]?$	47

2.8	Weak Tangential Regularity of Sets	49
2.9	Uniform Prox-Regularity of Sets	55
2.10	Arc-Wise Essential Tangential Regularity	60
2.11	More on the Regularity of Sets	64
2.11.1	Fréchet Case	64
2.11.2	Proximal Case	68
2.12	Commentary to Chap. 2	71
3	Regularity of Functions	73
3.1	Introduction	73
3.2	Directional Regularity of Functions	77
3.3	Fréchet and Proximal Subdifferential Regularity of Functions	83
3.4	Commentary to Chap. 3	85
4	Regularity of Set-Valued Mappings	87
4.1	Introduction	87
4.2	On the Distance Function to Images Δ_M Around Points on the Graph	88
4.3	Tangential Regularity of $\text{gph } M$ and Directional Regularity of Δ_M	94
4.4	Tangential Regularity of Lipschitz Epigraphic Set-Valued Mappings	103
4.5	Tangential Regularity of Images	112
4.6	On the Distance Function to Images Around Points Outside the Graph	113
4.7	Application of Δ_M : Calmness and Exact Penalization	120
4.8	Commentary to Chap. 4	124
Part III Applications of Nonsmooth Analysis Theory		
5	First Order Differential Inclusions	127
5.1	Nonconvex Sweeping Processes and Nonconvex Differential Inclusions	127
5.1.1	Introduction	127
5.1.2	Equivalence Between Nonconvex Sweeping Process and a Particular Nonconvex Differential Inclusion	128
5.1.3	Existence Results: Finite Dimensional Case	135
5.2	Existence of Viable Solutions of Nonconvex First Order Differential Inclusions	138
5.2.1	Introduction	138
5.2.2	Existence Criteria of Viable Solutions of Nonconvex Differential Inclusions	138
5.3	Existence Results for First Order Nonconvex Sweeping Processes: Infinite Dimensional Case	147
5.4	First Order Perturbed Nonconvex Sweeping Process with Delay ...	155
5.4.1	Introduction	155
5.5	Commentary to Chap. 5	164

6	Second Order Differential Inclusions	165
6.1	Introduction	165
6.2	Existence Theorems: Fixed Point Approach	167
6.3	Existence Theorems: Direct Approach	176
6.4	Properties of Solution Sets	197
6.5	Particular Case	199
6.6	Second Order Perturbed Sweeping Process with Delay	201
6.6.1	Existence Theorems.....	201
6.7	Commentary to Chap. 6	209
7	Quasi-Variational Inequalities	211
7.1	Introduction	211
7.2	Main Theorems	214
7.3	Extensions.....	219
7.4	Commentary to Chap. 7	225
8	Economic Problems and Equilibrium Theory	227
8.1	Introduction	227
8.2	Uniform Prox-Regularity of Level Sets and Uniform Lower- C^2 Property.....	228
8.3	Subdifferential and Co-normal Stability	236
8.4	Nonconvex Nontransitive Economies.....	239
8.5	Existence of Nonconvex Equilibrium.....	243
8.6	Commentary to Chap. 8	246
