

Contents

1	An Overview of Speech Recognition Systems	1
1.1	Introduction	1
1.2	Speech Recognition Architectures	5
1.2.1	Front-End Signal Processing	6
1.2.2	Acoustic Model	7
1.2.3	Decoding Using Viterbi Algorithm	9
1.2.4	Training Using Baum–Welch Algorithm	10
1.2.5	Language Model	13
1.2.6	Pronunciation Dictionary	14
	References	15
2	Arabic Speech Recognition Systems	17
2.1	Literature and Recent Works	17
2.2	Arabic Speech Recognition Challenges	20
	References	21
3	The Baseline System	25
3.1	Arabic Speech Corpus	25
3.2	Arabic Phoneme Set	26
3.3	Arabic Pronunciation Dictionary	28
3.3.1	Consonants	30
3.3.2	The Letter Laam	30
3.3.3	Semivowels	30
3.3.4	Tanween	31
3.3.5	Vowels	31
3.4	Arabic Language Model	32
	References	33

4	Cross-Word Pronunciation Variations.....	35
4.1	Introduction	35
4.2	Sources of Cross-Word Problem.....	41
4.3	Arabic Cross-Word Variations Examples	42
	References.....	44
5	Modeling of Arabic Cross-Word Pronunciation Variations	47
5.1	Introduction	47
5.2	Arabic Phonological Rules.....	48
5.2.1	Idgham	48
5.2.2	Iqlaab	51
5.2.3	Hamzat Al-Wasl Deletion	51
5.2.4	Merging of Two Unvoweled Letters	54
5.3	Modeling Arabic Cross-word Variation	55
	References.....	58
6	Performance and Evaluation	59
6.1	Experiment Setup	59
6.2	Performance Metrics	60
6.2.1	Word Error Rate	60
6.2.2	Out of Vocabulary	61
6.2.3	Perplexity	61
6.3	Evaluation and Results.....	62
6.4	Performance Analysis and Discussion.....	63
	References.....	68
	Closing Remarks.....	69
	Appendix: Arabic Terminologies.....	71
	Index	73
