Towards Equity in Mathematics Education

Gender, Culture, and Diversity

Bearbeitet von
Helen Forgasz, Ferdinand Rivera

ISBN 978 3 642 27701 6
Format (B x L): 15,5 x 23,5 cm
Gewicht: 1082 g

Weitere Fachgebiete > Pädagogik, Schulbuch, Sozialarbeit > Schulpädagogik > Naturwissenschaften, Mathematik (Unterricht & Didaktik)

DIE FACHBUCHHANDELUNG

Die Online-Fachbuchhandlung beck-shop.de ist spezialisiert auf Fachbücher, insbesondere Recht, Steuern und Wirtschaft. Im Sortiment finden Sie alle Medien (Bücher, Zeitschriften, CDs, eBooks, etc.) aller Verlage. Ergänzt wird das Programm durch Services wie Neuerscheinungsdienst oder Zusammenstellungen von Büchern zu Sonderpreisen. Der Shop führt mehr als 8 Millionen Produkte.
Equity in Mathematics Education: Unions and Intersections of Feminist and Social Justice Literature

Reprinted from ZDM (2008), 40(4)

Laura Jacobsen Spielman

1 Introduction ............................................. 40
2 Gender Differences in Mathematics .......................... 40
3 Situating Gender Equity Within Broader Equity Concerns .... 41
4 Global Picture of Gender Equity ................................ 42
5 Reconstructing Mathematics: Mathematics Education in the Public Interest .................................................. 43
   5.1 Setting New Goals in Mathematics Education .............. 44
   5.2 Why Mathematical Literacy? ................................ 47
   5.3 Why Critical Literacy? ..................................... 48
   5.4 Why Community Literacy? ................................... 49
   5.5 Unions and Intersections of Feminist and Social Justice Literature ................................................. 51
6 Summary .................................................. 52
References .................................................. 53

Preface to “Adolescent Girls’ Construction of Moral Discourses and Appropriation of Primary Identity in a Mathematics Classroom”

Jae Hoon Lim

References .................................................. 61

Adolescent Girls’ Construction of Moral Discourses and Appropriation of Primary Identity in a Mathematics Classroom

Reprinted from ZDM (2008), 40(4)

Jae Hoon Lim

1 Introduction ............................................. 63
   1.1 Theoretical Framework: Bakhtin’s Theory of Language and Identity ............................................. 65
2 Methodology .............................................. 66
3 The Teacher and Classroom Contexts ....................... 69
4 Three Students ........................................... 70
   4.1 Jessica: They Call Us “Smarties” ......................... 70
   4.2 Stella: Between Two Worlds ................................ 73
   4.3 Amanda: Political Dissent ................................ 76
5 Discussion ................................................. 79
References .................................................. 83

Shall We Do Politics or Learn Some Maths Today? Representing and Interrogating Social Inequality

Paul Dowling and Jeremy Burke

1 Strategies of Representation ................................ 87
2 Texts, Contexts and Patriarchy ............................. 90
3 Putting the Class into Texts ................................ 96
4 Critical Mathematics Education? ............................ 99
References .................................................. 101
Commentary on the Chapter by Paul Dowling and Jeremy Burke, 
“Shall We Do Politics or Learn Some Maths Today? Representing 
and Interrogating Social Inequality” .......................... 105

Gender Role Stereotypes in the Perception of Mathematics: 
An Empirical Study with Secondary Students in Germany ...... 115
Gabriele Kaiser, Maren Hoffstall, and Anna B. Orschulik
1 State of the Art ........................................ 115
2 Design of the Study .................................... 117
2.1 Description of the Instrument and Data Analysis .... 117
2.2 Description of the Sample .......................... 120
3 Central Results of the Quantitative Study .................. 121
4 Gender-Specific Differences in the Perception of Mathematics: Qualitative Results ................................ 130
4.1 General Results ....................................... 130
4.2 Analysis of Reasons ................................... 132
5 Possible Educational Consequences ........................ 136
Appendix ................................................. 138
References .............................................. 140

of Mathematics: Results of an Empirical Study with Secondary 
Students in Germany” ..................................... 145
Colleen Vale
1 Affective Factors Matter ................................ 145
2 Impact of Affective Factors ............................ 147
References .............................................. 148
Students’ Attitudes, Engagement and Confidence in Mathematics and Statistics Learning: ICT, Gender, and Equity Dimensions

Anastasios N. Barkatsas

1 Background and Context of the Chapter

1.1 The MTAS Hypothesised Model

2 Selected Research Findings

2.1 (I) MTAS Studies: Aims, Methods, Samples, Data Analyses and Findings

2.2 Study 1. The Development of the MTAS Scale

2.3 Study 2. Investigating the Complex Relationship Between Students’ Mathematics Confidence, Confidence with Computers, Attitude to Learning Mathematics with Computers, Affective Engagement, and Behavioural Engagement, Achievement, Gender, and Year Level Using MTAS

2.4 Study 3. Attitudes to Using CAS Calculators in the Classrooms of Middle and Senior Secondary Mathematics Students

2.5 (II) Survey of Attitudes Toward Statistics [SATS] Scale Studies: Aims, Methods, Samples, Data Analyses and Findings

2.6 Study 4. The Construct Validity of the SATS

2.7 Study 5. Postgraduate Students’ Attitudes Toward Statistics

3 What do the Findings from the Five Studies Tell Us? Conclusions and Implications

3.1 Secondary Mathematics Students’ Attitudes, Engagement and Use of ICT for Learning Mathematics

3.2 Tertiary Students’ Attitudes Toward Statistics

Appendix 1 Mathematics and Technology Attitudes Scale

Appendix 2 Factor Structure of the MTAS Scale

References

### Israeli Jewish and Arab Students’ Gendering of Mathematics
*Reprinted from ZDM (2008), 40(4)*
Helen J. Forgasz and David Mittelberg

1 Introduction

1.1 Contextualising the Study

1.2 Gendered Beliefs About Mathematics

2 Aims and Methods

2.1 Instruments

2.2 Sample

2.3 Data Analyses

3 Results and Discussion

3.1 Israeli and Australian Grade 9 Students’ Perception of Mathematics Achievement

3.2 Perceptions of Mathematics Achievement: Ethnic Comparisons

3.3 Results from the Two Instruments

3.4 Mathematics as a Gendered Domain: Gender Differences Within Ethnic Groups

3.5 Gender Differences Among Israeli Jews

3.6 Gender Differences Among Israeli Arabs

4 Conclusions and Implications

Appendix
